TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

(Footnotes for table 6A)

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.  
(Z) Less than half of the unit of measurement shown (less than 0.1 when rounded).

<sup>1</sup>Current Industrial Reports series MA-36F, "Major Household Appliances," was initiated in 1968. Accordingly, the source of the product detail for 1967 was the census of manufactures.

<sup>2</sup>Figures for electric ranges 33 inches and over in width, high-low oven, are included with "Other electric ranges not listed above" (product code 36311 79).

<sup>3</sup>Excludes kerosene, gasoline, fuel oil, and miscellaneous domestic cooking appliances.

<sup>4</sup>Figures for "Dryers, mechanical, gas" are included with "Washer-dryer combinations (in one cabinet)."

<sup>5</sup>Product class 36333, "Other Household Laundry Equipment and Parts," was expanded to include coin-operated washer-extractor combinations and coin-operated drying tumblers, both 10 pounds maximum load and under. The 1967 Standard Industrial Classification code was 35820 11 and 35820 15, respectively.

<sup>6</sup>Revised from data previously published in Current Industrial Reports series MA-36E(73).

<sup>7</sup>For 1972, electric toothbrushes are included with "Other electric appliances" (36343 98) in order to avoid disclosing figures for individual companies.

<sup>8</sup>For 1967, Air purifiers, portable, are included with "Other electric appliances" (36343 98) in order to avoid disclosing figures for individual companies.

<sup>9</sup>Product 36344 00, Parts and attachments for small electrical household appliances, n.s.k., combined with 36340 00 to avoid disclosing data for individual companies.

<sup>10</sup>Hand-type vacuum cleaners (36350 11) are included with product code 36350 71 in order to avoid disclosing figures of individual companies.

<sup>11</sup>Includes the value of shipments of household sewing machines.

<sup>12</sup>Not collected in 1967.

<sup>13</sup>Cast-iron and steel, and wood tank water heaters are excluded to avoid disclosing operations of individual companies.

<sup>14</sup>Source: 1972 data from Current Industrial Reports series MA-36F, Major Household Appliances.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

- Represents zero.

<sup>1</sup>These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

<sup>2</sup>The individual product codes included in this class of products for 1972 differ significantly from prior years. Products shifting into or out of this class of products represent more than 15 percent of the total shipments value at the U.S. level. See footnote 5, table 6A, of this report.

<sup>3</sup>Excludes parts and accessories for electric water heaters.

# EXPLANATORY TEXT

## ELECTRIC LIGHTING AND WIRING EQUIPMENT

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3641—Electric Lamps
- 3643—Current-Carrying Wiring Devices
- 3644—Noncurrent-Carrying Wiring Devices
- 3645—Residential Electric Lighting Fixtures\*
- 3646—Commercial, Industrial, and Institutional Electric Lighting Fixtures\*
- 3647—Vehicular Lighting Equipment
- 3648—Lighting Equipment, N.E.C.

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

## INDUSTRY 3641.—ELECTRIC LAMPS

This industry comprises establishments primarily engaged in manufacturing electric bulbs, tubes, and related light sources.

Establishments primarily engaged in manufacturing glass blanks for bulbs are classified in industry 3229 (Pressed and Blown Glass, N.E.C.); and lamp components, such as supports, filaments, lead-in wire, and cold cathode fluorescent lamp electrodes, in industry 3699 (Electrical Equipment and Sup-

\*Note that the "short title" for this industry is used throughout the report.

plies, N.E.C.). For a detailed list of products of industry 3641, refer to table 6A, product codes 36410 26 to 36410 63.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Electric Lamps Industry in 1972 totaled \$1,088 million. This included shipments of electric lamps (primary products) valued at \$1,025 million, shipments of other products (secondary products) valued at \$55 million, and miscellaneous receipts (mainly value of resales) of \$8 million.

Shipments of electric lamps (primary products) in 1972 represented 95 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 94 percent.

Shipments of electric lamps (primary products) from establishments classified in industry 3641 in 1972 represented 96 percent (coverage ratio) of these products valued at \$1,069 million shipped by all industries. In 1967, the coverage ratio was 95 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3641, these establishments accounted for less than 1 percent of value of shipments.

## INDUSTRY 3643.—CURRENT-CARRYING WIRING DEVICES

This industry comprises establishments primarily engaged in manufacturing current-carrying wiring devices. Important products of this industry include attachment plugs and caps, convenience outlets, lamp sockets and receptacles, snap switches, conductor connectors, overhead trolley-line materials, rail bonds for both propulsion and signal circuits, lightning arresters, and other lightning protective equipment. For a detailed list of products of industry 3643, refer to table 6A, product codes 36430 04 to 36430 99.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Current-Carrying Wiring Devices Industry in 1972 totaled \$1,217 million. This included shipments of current-carrying wiring devices (primary products) valued at \$972 million, shipments of other products (secondary products) valued at \$203 million, and miscellaneous receipts (mainly value of resales) of \$42 million.

Shipments of current-carrying wiring devices (primary products) in 1972 represented 83 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 78 percent.

Shipments of current-carrying wiring devices (primary products) from establishments classified in industry 3643 in 1972 represented 81 percent (coverage ratio) of these products valued at \$1,207 million shipped by all industries. In 1967, the coverage ratio was 78 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3643, these establishments accounted for 3 percent of value of shipments.

#### **INDUSTRY 3644.—NONCURRENT-CARRYING WIRING DEVICES**

This industry comprises establishments primarily engaged in manufacturing noncurrent-carrying wiring devices. Important products of this industry include conduits and fittings; electrical insulators and insulation materials, except porcelain insulators (industry 3264, Porcelain Electrical Supplies) and glass insulators (industry 3229, Pressed and Blown Glass, N.E.C.); outlet, switch and fuse boxes; and pole-line hardware. For a detailed list of products of industry 3644, refer to table 6A, product codes 36441 12 to 36443 38.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Noncurrent-Carrying Wiring Devices Industry in 1972 totaled \$886 million. This included shipments of noncurrent-carrying wiring devices (primary products) valued at \$648 million, shipments of other products (secondary products) valued at \$179 million, and miscellaneous receipts (mainly value of resales) of \$60 million.

Shipments of noncurrent-carrying wiring devices (primary products) in 1972 represented 78 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 74 percent.

Shipments of noncurrent-carrying wiring devices (primary products) from establishments classified in industry 3644 in 1972 represented 78 percent (coverage ratio) of these products valued at \$833 million shipped by all industries. In 1967, the coverage ratio was 82 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3644, these establishments accounted for 2 percent of value of shipments.

#### **INDUSTRY 3645.—RESIDENTIAL LIGHTING FIXTURES (Short Title)**

This industry comprises establishments primarily engaged in manufacturing residential electric lighting fixtures and equipment, fixed or portable.

Establishments primarily engaged in manufacturing glassware for lighting fixtures are classified in SIC Major Group 32, Stone, Clay, and Glass Products; electric light bulbs, tubes, and related light sources in industry 3641; lamp shades, except glass and metal, in industry 3999 (Manufacturing Industries, N.E.C.); and nonelectric fixtures, portable electric flashlights, lanterns, and similar lamps in industry 3648. For a detailed list of products of industry 3645, refer to table 6A, product codes 36451 11 to 36457 71.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The Residential Lighting Fixtures Industry is included for the first time in the census of manufactures for 1972. No comparable figures are available for 1967.

Value of shipments and other receipts of the Residential Lighting Fixtures Industry in 1972 totaled \$765 million. This included shipments of residential lighting fixtures (primary products) valued at \$695 million, shipments of other products (secondary products) valued at \$23 million, and miscellaneous receipts (mainly value of resales) of \$47 million.

Shipments of residential lighting fixtures (primary products) in 1972 represented 97 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Shipments of residential lighting fixtures (primary products) from establishments classified in industry 3645 in 1972 represented 93 percent (coverage ratio) of these products valued at \$747 million shipped by all industries.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3645, these establishments accounted for 15 percent of value of shipments.

#### **INDUSTRY 3646.—COMMERCIAL LIGHTING FIXTURES (Short Title)**

This industry comprises establishments primarily engaged in manufacturing commercial, industrial, and institutional electric lighting fixtures. Establishments primarily engaged in producing glassware for lighting fixtures are classified in SIC Major Group 32, Stone, Clay, and Glass Products; residential lighting fixtures in industry 3645; and vehicular lighting fixtures in industry 3647. For a detailed list of products of industry 3646, refer to table 6A, product codes 36462 11 to 36463 63.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The Commercial Lighting Fixtures Industry is included for the first time in the census of manufactures for 1972. No comparable figures are available for 1967.

Value of shipments and other receipts of the Commercial Lighting Fixtures Industry in 1972 totaled \$717 million. This included shipments of commercial lighting fixtures (primary products) valued at \$639 million, shipments of other products (secondary products) valued at \$68 million, and miscellaneous receipts (mainly value of resales) of \$10 million.

Shipments of commercial lighting fixtures (primary products) in 1972 represented 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Shipments of commercial lighting fixtures (primary products) from establishments classified in industry 3646 in 1972 represented 91 percent (coverage ratio) of these products valued at \$702 million shipped by all industries.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3646, these establishments accounted for 3 percent of value of shipments.

#### **INDUSTRY 3647.—VEHICULAR LIGHTING EQUIPMENT**

This industry comprises establishments primarily engaged in manufacturing vehicular lighting equipment. For a detailed list of products of industry 3647, refer to table 6A, product codes 36470 01 to 36470 65.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The Vehicular Lighting Equipment Industry is included for the first time in the census of manufactures for 1972.

Value of shipments and other receipts of the Vehicular Lighting Equipment Industry in 1972 totaled \$498 million. This included shipments of vehicular lighting equipment (primary products) valued at \$336 million, shipments of other products (secondary products) valued at \$157 million, and miscellaneous receipts (mainly value of resales) of \$5 million.

Shipments of vehicular lighting equipment (primary products) in 1972 represented 68 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Shipments of vehicular lighting equipment (primary products) from establishments classified in industry 3647 in 1972 represented 94 percent (coverage ratio) of these products valued at \$358 million shipped by all industries.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at

the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3647, these establishments accounted for less than 1 percent of value of shipments.

#### **INDUSTRY 3648.—LIGHTING EQUIPMENT, N.E.C.**

This industry comprises establishments primarily engaged in manufacturing lighting fixtures and equipment, electric and nonelectric, not elsewhere classified, including flashlights and similar portable lamps, searchlights, ultraviolet lamp fixtures, and infrared lamp fixtures. Establishments primarily engaged in manufacturing electric light bulbs, tubes, and related light sources are classified in industry 3641, and those producing glassware for lighting fixtures are classified in SIC Major Group 32, Stone, Clay, and Glass Products. For a detailed list of products of industry 3648, refer to table 6A, product codes 36485 11 to 36489 91.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The Lighting Equipment, N.E.C., Industry is included for the first time in the census of manufactures for 1972. No comparable figures are available for 1967.

Value of shipments and other receipts of the Lighting Equipment, N.E.C., Industry in 1972 totaled \$466 million. This included shipments of lighting equipment, n.e.c., (primary products) valued at \$385 million, shipments of other products (secondary products) valued at \$62 million, and miscellaneous receipts (mainly value of resales) of \$20 million.

Shipments of lighting equipment, n.e.c., (primary products) in 1972 represented 86 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Shipments of lighting equipment, n.e.c., (primary products) from establishments classified in industry 3648 in 1972 represented 79 percent (coverage ratio) of these products valued at \$488 million shipped by all industries.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3648, these establishments accounted for 5.5 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Year <sup>1</sup>	Establishments		All employees		Production workers			Value added by manufacture	Cost of materials, fuels, etc.	Value of industry shipments	Capital expenditures, new	Gross value of fixed assets	End-of-year inventories	Specialization ratio	Coverage ratio

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	1972 industry 3641	1972 industry 3643	1972 industry 3644	1972 industry 3645	1972 industry 3646	1972 industry 3647	1972 industry 3648	1967 industry 3642

1967.....	72	351	158	(NA)	(NA)	(NA)	(NA)	1,148
1963.....	54	431	168	(NA)	(NA)	(NA)	(NA)	1,203

(NA) Not available. \*These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

<sup>1</sup>For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

<sup>2</sup>Industry 3645, Residential Lighting Fixtures, is published as a separate industry for the first time in 1972. It was part of industry 3642 in 1967.

<sup>3</sup>Industry 3646, Commercial Lighting Fixtures, is published as a separate industry for the first time in 1972. It was part of industry 3642 in 1967.

<sup>4</sup>Industry 3647, Vehicular Lighting Equipment, was not a separate industry in the 1958, 1963, or 1967 census of manufactures but was part of SIC 3642, Lighting Fixtures. However, data were published for those years for plants classified in SIC 3642 specializing in the production of vehicular lighting equipment. These data are published in table 8 of Census of Manufactures, Volume II, for the respective years.

<sup>5</sup>Industry 3648, Lighting Equipment, N.E.C., is published as a separate industry for the first time in 1972. It was part of industry 3642 in 1967.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC				
	Establishments		All employees	Value added by manufacture	Value of shipments	Establishments		All employees	Value added by manufacture	Value of shipments
	Total	With 20 employees or more				Total	With 20 employees or more			
	(number)	(number)	(1,000)	(million dollars)	(million dollars)	(number)	(number)	(1,000)	(million dollars)	(million dollars)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent      E3--30 to 39 percent      E5--50 to 59 percent      E7--70 to 79 percent      E9--90 to 99 percent  
 E2--20 to 29 percent      E4--40 to 49 percent      E6--60 to 69 percent      E8--80 to 89 percent      E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

<sup>1</sup>General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees      BB--250 to 499 employees      CC--500 to 999 employees      EE--1,000 to 2,499 employees      FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent      E3--30 to 39 percent      E5--50 to 59 percent      E7--70 to 79 percent      E9--90 to 99 percent  
 E2--20 to 29 percent      E4--40 to 49 percent      E6--60 to 69 percent      E8--80 to 89 percent      E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

<sup>1</sup>Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments	All employees		Production workers			Value added by manufacture	Cost of materials	Value of shipments	Capital expenditures, new
			Number	Payroll	Number	Man hours	Wages

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

36485 33	Runway (except runway approach), taxiway, and ramp light (including fixtures, regulators, and isolating lamp transformers).....	6.2	4.7
	Poles, standards, newels, brackets, and accessories:		
	For street and highway lighting:		
36485 35	Metal, concrete, and integral brackets.....	37.2	28.1
36485 37	Wood pole brackets.....	3.3	2.3
36485 39	For area and sports lighting.....	18.7	9.9
36485 41	For other outdoor lighting.....	5.8	4.3
	Other floodlighting and area lighting equipment:		
36485 43	Spotlights, including indoor and stage, but excluding vehicular.....	6.5	7.9
36485 45	All other outdoor lighting equipment.....	715.8	7.7
36489 --	Other Electric and Nonelectric Lighting Equipment (Including Hand-Portable Equipment) and Parts and Accessories.....	164.7	122.6
	Incandescent hand-portable lighting equipment, except parts:		
36489 11	Flashlights and flashlight lanterns (one to five cells).....	41.2	30.7
36489 19	Other, such as miners' lights, emergency warning lights, and generator flashlights.....	29.4	13.5
36489 21	Other electric lighting equipment, including electrical discharge such as mercury vapor (other than street and highway lighting equipment) and sodium vapor but excluding signs.....	18.9	6.7
36489 31	Other incandescent electric lighting equipment, including marine markers or beacons, railway and other vehicular route lighting equipment, etc., except parts and accessories.....	10.2	12.5
36489 75	Other fluorescent lighting equipment, complete units, including processing and technical equipment.	3.9	7.7
36489 69	Parts and accessories for lighting fixtures, n.e.c.....	9.8	18.3

See footnotes at end of table.

TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

(Includes quantity and value of the products reported not only by establishments classified in this industry, but also by establishments classified in other industries, and shipping these products as "secondary" products. See appendix, Explanation of Terms "Value of shipments")

1972 product code	Product	Total receipts including interplant transfers (million dollars)	
		1972	1967
3648- --	LIGHTING EQUIPMENT, N.E.C.--Continued		
36489 --	Other Electric and Nonelectric Lighting Equipment (Including Hand-Portable Equipment) and Parts and Accessories--Continued		
	Nonelectric lighting equipment, including parts:		
36489 81	Kerosene and gasoline lamps and lanterns.....	20.1	14.2
36489 85	Parts and accessories for nonelectric lighting equipment, including reflectors and fittings, incandescent mantles, etc.....	7.5	4.7
36489 89	Other nonelectric lighting fixtures and equipment, complete units, including carbide lamps of all types.....	2.5	.8
36489 91	Ultraviolet and infrared health lamp fixtures, excluding bulbs sold separately.....	2.2	.3
36489000	Other electric and nonelectric lighting equipment (including hand-portable equipment) and parts and accessories, n.s.k.....	19.0	13.0
36480 00	Lighting equipment, n.e.c., n.s.k. (Represents establishments with 10 employees or more.).....	1.6	(NA)
36480 02	Lighting equipment, n.e.c., n.s.k. (Represents establishments with less than 10 employees.).....	5.2	(NA)

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

(X) Not applicable. (NA) Not available.

<sup>1</sup>The data for 1972 and 1967 present totals as collected in the census of manufactures as well as comparable totals from Current Industrial Reports series. The product detail as shown are those collected on the CIR form specified.

<sup>2</sup>Product code 36410 63, cold cathode fluorescent lamps, etc., is included with product code 36410 10, electric lamps (bulbs only), as reported in the census of manufactures.

<sup>3</sup>Also includes products not specified by kind for industries 3646, 3647, and 3648. These industries include, respectively: Commercial, industrial, and institutions electric lighting fixtures; vehicular lighting equipment; and lighting equipment, not elsewhere classified.

<sup>4</sup>Data for 1967 are not comparable with data for 1972; 1967 data are not available for product codes 36463 31, 36463 63, 36460 00, and 36460 02.

<sup>5</sup>Not included on MA-36L.

<sup>6</sup>Data for product code 36470 24 are combined with product code 36470 22 to avoid disclosing figures for individual companies.

<sup>7</sup>Data for 36485 16 combined with code 36485 45 to avoid disclosing figures for individual companies.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)		Product class and geographic area	Value of shipments (million dollars)

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

(X) Not applicable.

<sup>1</sup>These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

<sup>2</sup>Value of products, not specified by kind, for industries 3646, 3647, and 3648 are included in industry 3645 prior to 1972. All products not specified by kind for administrative records and most for other records are included in industry 3645 in 1972.

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.  
(Z) Less than \$50 thousand.

<sup>1</sup>This item represents the total cost of materials for establishments that did not report detailed materials data.

<sup>2</sup>Includes cost for materials indicated by the symbol (D).

<sup>3</sup>Excludes quantities produced and consumed in the same establishment.

# EXPLANATORY TEXT

## COMMUNICATION EQUIPMENT, INCLUDING RADIO AND TV, AND ELECTRONIC COMPONENTS AND ACCESSORIES

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3651—Radio and Television Receiving Sets, Except Communication Types\*
- 3652—Phonograph Records and Prerecorded Magnetic Tape
- 3661—Telephone and Telegraph Apparatus
- 3662—Radio and Television Transmitting, Signaling, and Detection Equipment and Apparatus\*
- 3671—Radio and Television Receiving-Type Electron Tubes, Except Cathode Ray\*
- 3672—Cathode Ray Television Picture Tubes
- 3673—Transmitting, Industrial, and Special-Purpose Electron Tubes\*
- 3674—Semiconductors and Related Devices
- 3675—Electronic Capacitors
- 3676—Resistors, for Electronic Applications\*
- 3677—Electronic Coils, Transformers, and Other Inductors\*
- 3678—Connectors, for Electronic Applications\*
- 3679—Electronic Components, N.E.C.

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### INDUSTRY 3651.—RADIO AND TV RECEIVING SETS (Short Title)

This industry comprises establishments primarily engaged in manufacturing electronic equipment for home entertainment.

\*Note that the "short title" for this industry is used throughout the report.

This industry also includes establishments primarily engaged in manufacturing public address systems and music distribution apparatus, except records. Establishments primarily engaged in manufacturing records are classified in industry 3652; radio and television receiving-type tubes in industry 3671; and television receiving-type cathode-ray tubes are classified in industry 3672. For a detailed list of products of industry 3651, refer to table 6A, product codes 36511 01 to 36515 90.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Radio and TV Receiving Sets Industry in 1972 totaled \$4,440 million. This included shipments of radio and TV receiving sets (primary products) valued at \$3,560 million, shipments of other products (secondary products) valued at \$168 million, and miscellaneous receipts (mainly resales) of \$711 million.

Shipments of radio and TV receiving sets (primary products) in 1972 represented 95 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 94 percent.

Shipments of radio and TV receiving sets (primary products) from establishments classified in industry 3651 in 1972 represented 99 percent (coverage ratio) of these products valued at \$3,610 million shipped by all industries. In 1967, the coverage ratio was also 99 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3651, these establishments accounted for 2 percent of value of shipments.

### INDUSTRY 3652.—PHONOGRAPH RECORDS AND PRERECORDED MAGNETIC TAPE

This industry comprises establishments primarily engaged in manufacturing phonograph records and prerecorded magnetic tape. Establishments primarily engaged in manufacturing electronic equipment for home entertainment, except records and prerecorded magnetic tape, are classified in industry 3651. Establishments primarily engaged in manufacturing blank

magnetic recording tape are classified in industry 3679. For a detailed list of products of industry 3652, refer to table 6A, product codes 36520 22 to 36520 91.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President. The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system. Under the old SIC, however, the title of this industry was "Phonograph Records."

Value of shipments and other receipts of the Phonograph Records and Prerecorded Magnetic Tape Industry in 1972 totaled \$568 million. This included shipments of phonograph records and tapes (primary products) valued at \$533 million, shipments of other products (secondary products) valued at \$11 million, and miscellaneous receipts (mainly resales) of \$24 million.

Shipments of phonograph records and prerecorded magnetic tape (primary products) in 1972 represented 98 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 99 percent.

Shipments of phonograph records and prerecorded magnetic tape (primary products) from establishments classified in industry 3652 in 1972 represented 99 percent (coverage ratio) of these products valued at \$537 million shipped by all industries. In 1967, the coverage ratio was 96 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3652, these establishments accounted for 12 percent of value of shipments.

#### INDUSTRY 3661.—TELEPHONE AND TELEGRAPH APPARATUS

This industry comprises establishments primarily engaged in manufacturing wire telephone and telegraph equipment and parts especially designed for telephone and telegraph use. For a detailed list of products of industry 3661, refer to table 6A, product codes 36611 11 to 36612 81.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of

Management and Budget, Executive Office of the President. The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Data on cost of materials and value of shipments of the Telephone and Telegraph Apparatus Industry include extensive duplication resulting from the transfer of products such as telephone and telegraph components to establishments producing complete telephone and telegraph equipment. The value of such shipments are duplicated in the total value of shipments. A corresponding duplication enters into the total cost of materials. The data shown for value added by manufacture (value of shipments less cost of materials, etc.) avoid this duplication.

Value of shipments and other receipts of the Telephone and Telegraph Apparatus Industry in 1972 totaled \$4,498 million. This included shipments of telephone and telegraph apparatus (primary products) valued at \$3,922 million, shipments of other products (secondary products) valued at \$334 million, and miscellaneous receipts of \$241 million.

Shipments of telephone and telegraph apparatus (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 88 percent.

Shipments of telephone and telegraph apparatus (primary products) from establishments classified in industry 3661 in 1972 represented 99 percent (coverage ratio) of these products valued at \$3,974 million shipped by all industries. In 1967, the coverage ratio was 96 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3661, these establishments accounted for less than 1 percent of value of shipments.

#### INDUSTRY 3662.—RADIO AND TV COMMUNICATION EQUIPMENT (Short Title)

This industry comprises establishments primarily engaged in manufacturing (1) radio and television broadcasting equipment; (2) electric communication equipment and parts, except telephone and telegraph; (3) electronic field detection apparatus, light and heat emission operating apparatus, object detection apparatus and navigational electronic equipment, and aircraft and missile control systems; (4) high-energy particle accelerator systems and equipment designed and sold as a complete package for radiation therapy, irradiation, radiographic inspection, and research (linear accelerators, betatrons,

dynamotrons, Vandergraff generators, resonant transformers, insulating core transformers, etc.); (5) high-energy particle electronic equipment and accessories sold separately for the construction of linear accelerators, cyclotrons, synchrotrons, and other high-energy research installations (transmitters/modulators, accelerating waveguide structures, pulsed electron guns, vacuum systems, cooling systems, etc.); and (6) other electric and electronic communication and signaling products, not elsewhere classified. Establishments primarily engaged in manufacturing transmitting tubes are classified in industry 3673. For a detailed list of products of industry 3662, refer to table 6A, product codes 36623 10 to 36629 79.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President. The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Radio and TV Communication Equipment Industry in 1972 totaled \$9,134 million. This included shipments of radio and TV communication equipment (primary products) valued at \$7,610 million, shipments of other products (secondary products) valued at \$762 million, and miscellaneous receipts of \$762 million.

Shipments of radio and TV communication equipment (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 89 percent.

Shipments of radio and TV communication equipment (primary products) from establishments classified in industry 3662 in 1972 represented 91 percent (coverage ratio) of these products valued at \$8,377 million shipped by all industries. In 1967, the coverage ratio was 90 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3662, these establishments accounted for 2 percent of value of shipments.

#### **INDUSTRY 3671.—ELECTRON TUBES, RECEIVING TYPE** (Short Title)

This industry comprises establishments primarily engaged in manufacturing radio and television receiving-type electron

tubes, except cathode-ray tubes. Establishments primarily engaged in manufacturing television receiving-type cathode-ray tubes are classified in industry 3672; transmitting tubes in industry 3673; X-ray tubes in industry 3693 (X-ray Apparatus and Tubes); and electronic equipment for home entertainment, except tubes, in industry 3651. For a detailed list of products of industry 3671, refer to table 6A, product codes 36710 11 to 36710 15.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President. The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Electron Tubes, Receiving Type, Industry in 1972 totaled \$230 million. This included shipments of electron tubes, receiving type, (primary products) valued at \$179 million, shipments of other products (secondary products) valued at \$37 million, and miscellaneous receipts of \$15 million.

Shipments of electron tubes, receiving type, (primary products) in 1972 represented 83 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 85 percent.

Shipments of electron tubes, receiving type, (primary products) from establishments classified in industry 3671 in 1972 represented 94 percent (coverage ratio) of these products valued at \$190 million shipped by all industries. In 1967, the coverage ratio was also 94 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3671, these establishments accounted for 1 percent of value of shipments.

#### **INDUSTRY 3672.—CATHODE-RAY TELEVISION** **PICTURE TUBES**

This industry comprises establishments primarily engaged in manufacturing receiving-type cathode-ray tubes. Establishments primarily engaged in manufacturing other radio and television receiving-type electron tubes are classified in industry 3671; and transmitting tubes in industry 3673. For a detailed list of products of industry 3672, refer to table 6A, product codes 36720 13 and 36720 15.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President. The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Cathode-Ray Television Picture Tubes Industry in 1972 totaled \$696 million. This included shipments of picture tubes (primary products) valued at \$618 million, shipments of other products (secondary products) valued at \$58 million, and miscellaneous receipts (mainly resales) of \$20 million.

Shipments of cathode-ray television picture tubes (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 92 percent.

Shipments of cathode-ray television picture tubes (primary products) from establishments classified in industry 3672 in 1972 represented 98 percent (coverage ratio) of these products valued at \$634 million shipped by all industries. In 1967, the coverage ratio was also 98 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3672, these establishments accounted for 1 percent of value of shipments.

#### **INDUSTRY 3673.—ELECTRON TUBES, TRANSMITTING (Short Title)**

This industry comprises establishments primarily engaged in manufacturing transmitting, industrial, and special-purpose electron tubes. Establishments primarily engaged in manufacturing radio and television receiving tubes are classified in industry 3671; television receiving-type cathode-ray tubes in industry 3672; and X-ray tubes in industry 3693 (X-ray Apparatus and Tubes). For a detailed list of products of industry 3673, refer to table 6A, product codes 36730 11 to 36730 96.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President. The statistics for this industry as classified under the 1972

edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Electron Tubes, Transmitting, Industry in 1972 totaled \$479 million. This included shipments of electron tubes, transmitting, (primary products) valued at \$307 million, shipments of other products (secondary products) valued at \$139 million, and miscellaneous receipts of \$33 million.

Shipments of electron tubes, transmitting, (primary products) in 1972 represented 69 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 79 percent.

Shipments of electron tubes, transmitting, (primary products) from establishments classified in industry 3673 in 1972 represented 84 percent (coverage ratio) of these products valued at \$366 million shipped by all industries. In 1967, the coverage ratio was 72 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3673, these establishments accounted for 1 percent of value of shipments.

#### **INDUSTRY 3674.—SEMICONDUCTORS AND RELATED DEVICES**

This industry comprises establishments primarily engaged in manufacturing semiconductors and related solid-state devices, such as semiconductor diodes and stacks, including rectifiers, integrated microcircuits (semiconductor networks), transistors, solar cells, and light sensing and emitting semiconductor (solid-state) devices. For a detailed list of products of industry 3674, refer to table 6A, product codes 36741 13 to 36749 96.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President. The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Semiconductors and Related Devices Industry in 1972 totaled \$2,687 million. This included shipments of semiconductors and related devices (primary products) valued at \$2,163 million, shipments of other products (secondary products) valued at \$261

million, and miscellaneous receipts (mainly resales) of \$262 million.

Shipments of semiconductors and related devices (primary products) in 1972 represented 89 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 92 percent.

Shipments of semiconductors and related devices (primary products) from establishments classified in industry 3674 in 1972 represented 92 percent (coverage ratio) of these products valued at \$2,361 million shipped by all industries. In 1967, the coverage ratio was also 92 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3674, these establishments accounted for 2 percent of value of shipments.

#### **INDUSTRY 3675.—ELECTRONIC CAPACITORS**

This industry comprises establishments primarily engaged in manufacturing electronic capacitors. For a detailed list of products of industry 3675, refer to table 6A, product codes 36750 12 to 36750 62.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

This industry is published separately for the first time in the census of manufactures for 1972. In prior years, it was included in industry 3679, product class 36792.

Value of shipments and other receipts of the Electronic Capacitors Industry in 1972 totaled \$446 million. This included shipments of electronic capacitors (primary products) valued at \$396 million, shipments of other products (secondary products) valued at \$42 million, and miscellaneous receipts (mainly resales) of \$7 million.

Shipments of electronic capacitors (primary products) in 1972 represented 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Shipments of electronic capacitors (primary products) from establishments classified in industry 3675 in 1972 represented 87 percent (coverage ratio) of these products valued at \$454 million shipped by all industries.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at

the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3675, these establishments accounted for less than 1 percent of value of shipments.

#### **INDUSTRY 3676.—ELECTRONIC RESISTORS (Short Title)**

This industry comprises establishments primarily engaged in manufacturing resistors for electronic end products. Establishments primarily engaged in manufacturing resistors for telephone and telegraph apparatus are classified in industry 3661. For a detailed list of products of industry 3676, refer to table 6A, product codes 36760 11 to 36760 55.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

This industry is published separately for the first time in the census of manufactures for 1972. In prior years, it was part of industry 3679, product class 36793.

Value of shipments and other receipts of the Electronic Resistors Industry in 1972 totaled \$372 million. This included shipments of electronic resistors (primary products) valued at \$324 million, shipments of other products (secondary products) valued at \$36 million, and miscellaneous receipts of \$13 million.

Shipments of electronic resistors (primary products) in 1972 represented 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Shipments of electronic resistors (primary products) from establishments classified in industry 3676 in 1972 represented 74 percent (coverage ratio) of these products valued at \$438 million shipped by all industries.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3676, these establishments accounted for less than 1 percent of value of shipments.

#### **INDUSTRY 3677.—ELECTRONIC COILS AND TRANSFORMERS (Short Title)**

This industry comprises establishments primarily engaged in manufacturing electronic coils, transformers, and inductors.

Establishments primarily engaged in manufacturing transformers and inductors for telephone and telegraph apparatus are classified in industry 3661; electric lamps in industry 3641 (Electric Lamps); and semiconductor (solid state) and related devices in industry 3674. For a detailed list of products of industry 3677, refer to table 6A, product codes 36770 32 to 36770 92.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The Electronic Coils and Transformers Industry is included for the first time in the census of manufactures for 1972. In prior years, it was part of industry 3679, product class 36794.

Value of shipments and other receipts of the Electronic Coils and Transformers Industry in 1972 totaled \$354 million. This included shipments of electronic coils and transformers (primary products) valued at \$304 million, shipments of other products (secondary products) valued at \$47 million, and miscellaneous receipts (mainly resales) of \$3 million.

Shipments of electronic coils and transformers (primary products) in 1972 represented 87 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Shipments of electronic coils and transformers (primary products) from establishments classified in industry 3677 in 1972 represented 79 percent (coverage ratio) of these products valued at \$385 million shipped by all industries. Other industries shipping electronic coils and transformers consisted mainly of industry 3679, Electronic Components, N.E.C., (\$35 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3677, these establishments accounted for less than 1 percent of value of shipments.

#### **INDUSTRY 3678.—ELECTRONIC CONNECTORS** (Short Title)

This industry comprises establishments primarily engaged in manufacturing electronic connectors. Establishments primarily engaged in manufacturing electronic capacitors are classified in industry 3675; and electronic coils, transformers, and other inductors, in industry 3677. For a detailed list of products of industry 3678, refer to table 6A, product codes 36780 81 to 36780 86.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The Electronic Connectors Industry is included for the first time in the census of manufactures for 1972. In prior years, it was part of industry 3679, product class 36795.

Value of shipments and other receipts of the Electronic Connectors Industry in 1972 totaled \$492 million. This included shipments of electronic connectors (primary products) valued at \$422 million, shipments of other products (secondary products) valued at \$61 million, and miscellaneous receipts of \$8 million.

Shipments of electronic connectors (primary products) in 1972 represented 87 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Shipments of electronic connectors (primary products) from establishments classified in industry 3678 in 1972 represented 81 percent (coverage ratio) of these products valued at \$524 million shipped by all industries.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3678, these establishments accounted for less than 1 percent of value of shipments.

#### **INDUSTRY 3679.—ELECTRONIC COMPONENTS,** **N.E.C.**

This industry comprises establishments primarily engaged in manufacturing electronic components, not elsewhere classified, such as receiving antennas, printed circuits, switches, and waveguides. For a detailed list of products of industry 3679, refer to table 6A, product code 36790 20 and 36790 47.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics based on the classification system followed in the 1967 census were split, as a result of the 1972 edition of the SIC manual, into five separate industries: Industry 3675, Electronic Capacitors; industry 3676, Electronic Resistors; industry 3677, Electronic Coils and Transformers; industry 3678, Electronic Connectors; and industry 3679, Electronic Components, N.E.C.

---

## EXPLANATORY TEXT—Continued

Value of shipments and other receipts of the Electronic Components, N.E.C., Industry in 1972 totaled \$3,042 million. This included shipments of electronic components, n.e.c., (primary products) valued at \$2,327 million, shipments of other products (secondary products) valued at \$599 million, and miscellaneous receipts (mainly resales) of \$116 million.

Shipments of electronic components, n.e.c., (primary products) in 1972 represented 80 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Shipments of electronic components, n.e.c., (primary products) from establishments classified in industry 3679 in 1972

represented 72 percent (coverage ratio) of these products valued at \$3,210 million shipped by all industries.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3679, these establishments accounted for 8 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	1972 Industry 3651	1972 Industry 3652	1972 Industry 3661	1972 Industry 3662	1972 Industry 3671	1972 Industry 3672	1972 Industry 3673	1972 Industry 3674	1972 Industry 3675	1972 Industry 3676	1972 Industry 3677	1972 Industry 3678	1967 Industry 3679

(NA) Not available. (S) Withheld because the data did not meet publication standards. \*These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

<sup>1</sup>For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

<sup>2</sup>Some of the small establishments in this industry may have been misclassified as to industry. This does not significantly affect the statistics other than the number of establishments or number of companies.

<sup>3</sup>The value of shipments and cost of materials for this industry include extensive duplication arising from shipments between establishments in the same industry classification.

<sup>4</sup>This industry is published as a separate industry for the first time in 1972, comparable data for prior years are limited to that shown here.

<sup>5</sup>Source: Table 8, "General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization" for the 1967, 1963, and 1958 censuses of manufactures.

<sup>6</sup>Industry 3679 for 1972 is not comparable to industry 3679 for prior years. The sum of 1972 SIC industries 3675, 3676, 3677, 3678, and 3679 is equivalent to 1967 SIC industry 3679. Data for industry 3679 based on the SIC used prior to 1972 are presented below.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee  (dollars)	Assets per employee  (dollars)	Production worker as percent of total employment (percent)	Annual man-hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials per dollar of shipments (dollars)	Cost of materials and payrolls per dollar shipments (dollars)	Assets per dollar of shipments (dollars)	Value added per employee (dollars)	Payrolls as percent of value added (percent)	Value added per man-hour of production worker (dollars)

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC				
	Establishments		All employees	Value added by manufacture	Value of shipments	Establishments		All employees	Value added by manufacture	Value of shipments
	Total	With 20 employees or more				Total	With 20 employees or more			
	(number)	(number)	(1,000)	(million dollars)	(million dollars)	(number)	(number)	(1,000)	(million dollars)	(million dollars)
New industry 3675.--Electronic Capacitors.....	113	101	27.7	298.7	445.8	(X)	(X)	(X)	(X)	(X)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent      E3--30 to 39 percent      E5--50 to 59 percent      E7--70 to 79 percent      E9--90 to 99 percent  
E2--20 to 29 percent      E4--40 to 49 percent      E6--60 to 69 percent      E8--80 to 89 percent      E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underacred figures above. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

<sup>1</sup>Report forms were not mailed to companies that operated only one establishment—generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipmant values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments

(NA) Not available.

<sup>1</sup>Industries 3675, 3676, 3677, and 3678 are published as separate industries for the first time in 1972. These four industries plus industry 3679 (new SIC basis) are equivalent to industry 3679 as tabulated on the old SIC basis.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Radio and TV receiving sets (SIC 3651)	Phonograph records and prerecorded magnetic tapes (SIC 3652)	Telephone and telegraph apparatus (SIC 3661)	Radio and TV communication equipment (SIC 3662)	Electron tubes, receiving type (SIC 3671)	Cathode ray television picture tubes (SIC 3672)	Electron tubes, transmitting (SIC 3673)	Semi-conductors and related devices (SIC 3674)	Electronic capacitors (SIC 3675)	Electronic resistors (SIC 3676)	Electronic coils and transformers (SIC 3677)	Electronic connectors (SIC 3678)	Electronic components, n.e.c. TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

(Includes value of the products reported not only by establishments classified in this industry, but also by establishments classified in other industries, and shipping these products as "secondary" products. See appendix, Explanation of Terms "Value of shipments")

1972 product code	Product	Total product shipments including interplant transfers (million dollars)	
		1972	1967
3679- --	ELECTRONIC COMPONENTS AND ACCESSORIES, N.E.C., INCLUDING PARTS FOR ELECTRON TUBES, EXCEPT GLASS BLANKS.....	3,209.8	(NA)
36790 20	Electronic Components, N.E.C., Except Phonograph Needles and Cutting Styli: <sup>1</sup> As reported in the census of manufactures..... As reported in Current Industrial Reports series MA-36N <sup>6</sup> .....	2,849.8 2,503.0	(NA) 2,156.1
36790 47	Phonograph Needles and Cutting Styli.....	33.0	13.5
36790 00	Electronic components, n.e.c., n.s.k., for establishments with 10 employees or more. (See note.) <sup>7</sup> ...	266.0	230.8
36790 02	Electronic components, n.e.c., n.s.k., for establishments with less than 10 employees. (See note.) <sup>7</sup> ..	61.0	21.0

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

(X) Not applicable. (NA) Not available. <sup>r</sup> Revised.

<sup>1</sup>The data for 1972 and 1967 present totals as collected in the census of manufactures as well as comparable totals from Current Industrial Reports series. The product detail as shown are those collected on the CIR form specified. A substantial difference exists between the Current Industrial Reports series and the 1972 census. Approximately 15 to 20 percent of this difference is attributable to establishments with an annual value of shipments of less than \$100,000 which are not included in the Current Industrial Reports. The remaining differences are due to undercoverage in the Current Industrial Reports and differences in reporting data by companies included in both the census and the Current Industrial Reports. Further reconciliation will be made to eliminate these differences.

<sup>2</sup>For 1967, product code 36511 23 is combined with product code 36511 21.

<sup>3</sup>For 1972, product codes 36514 01, 36514 30, and 36514 40 are combined with product code 36514 67.

<sup>4</sup>For 1972, figures for product code 36520 33, 33-1/3 r.p.m. monaural for own label, is combined with 36520 61, "Other speeds, including 78 r.p.m. and electronic transcriptions, all speeds," to avoid disclosing figures of individual companies.

<sup>5</sup>Includes interplant transfers between establishments of the same company valued between \$200 and \$500 million in 1972 and between \$250 and \$300 million in 1967. The exact figures cannot be published without revealing the operations of individual companies.

<sup>6</sup>See table 6A-2 for detail product data from Annual Survey MA-36N.

<sup>7</sup>Also includes products not specified by kind for industries 3675, 3676, 3677, and 3678. These industries include respectively: Electronic capacitors; electronic resistors; electronic coils and transformers; and electronic connectors.

TABLE 6A-2. Quantity and Value of Shipments of Radio and TV Communication Equipment: 1972 and 1967

(Includes quantity and value of the products reported not only by establishments classified in this industry, but also by establishments classified in other industries, and shipping these products as "secondary" products. See appendix, Explanation of Terms "Value of shipments")

			Quantity	Value (million dollars)	Quantity	Value (million dollars)
	As reported in Current Industrial Reports series MA-36N--Con.					
36625 --	Electronic Search and Detection Apparatus, Including Radar, Infrared, and Sonar.....		(X)	2,102.4	(X)	1,580.8
36625 12	Light reconnaissance and surveillance electronic systems and equipment (infrared, ultraviolet, and visible light).....				(X)	174.8
36625 25	Miscellaneous search, detection, identification and tracking system equipment.....		(X)	356.3	(X)	70.4
	Radar systems and equipment:					
	Search, detection, and acquisition radar systems and equipment (BMEWS, airborne and other early warning radars, air traffic control radars, air defense and fighter control radars, ship radars, harbor control radars, meteorological radars, etc.):					
36625 42	Airborne and missile/space radar.....		(X)	171.2	(X)	115.1
36625 44	Ship (marine) radar.....		(X)	119.3	(X)	32.6
36625 46	Ground radars.....		(X)	260.5	(X)	143.0
	Radar tracking systems and equipment (fire control, bombing, bombing-navigational radars, aircraft and missile tracking radars, etc.):					
36625 62	Airborne and missile/space radars.....		(X)	307.3	(X)	312.0
36625 64	Ship (marine) radars.....		(X)	88.9	(X)	118.2
36625 66	Ground radars.....		(X)	110.9		
	Radar instrumentation systems and equipment (altimeters, highway speed control radars, missile and space satellite tracking range radars, GCA and other precision approach radars, etc.):					
36625 72	Airborne and missile/space radars.....		(X)	16.4	(X)	15.3
36625 74	Ship (marine) radars.....		(X)	47.7	(X)	65.6
36625 76	Ground radars.....		(X)			
36625 82	Electronic checkout, monitoring, evaluation, and other electronic support equipment for radar systems.....		(X)	112.5	(X)	128.4
	Sonar search, detection, and tracking systems and equipment, including ASW (depth finding, fire control, fusing, guidance, hydrophones, mapping, sonabuoys, navigation, sonar fish finders, sonar range instrumentation, and other):					
36625 52	Surface ship applications (destroyers, destroyer escorts, etc.).....		(X)	88.2	(X)	125.0
36625 53	Submarine applications.....		(X)	110.6	(X)	97.4
36625 54	Submerged fixed systems.....		(X)	( <sup>3</sup> )	(X)	16.5
36625 55	Airborne.....		(X)	125.0	(X)	37.2
36625 56	Electronic checkout, monitoring, evaluation, and other electronic support equipment for sonar systems.....		(X)	<sup>3</sup> 83.6	(X)	42.1
36625 91	Specialized command and control data processing and display equipment sold separately from complete systems.....		(X)	109.9	(X)	87.1
36626 --	Electronic Military, Industrial, and Commercial Equipment, N.E.C..		(X)	1,305.4	(X)	1,060.6
	Countermeasures equipment:					
36626 11	Jamming equipment, communications and radar.....				(X)	(NA)
36626 13	Underwater countermeasures equipment.....				(X)	(NA)
36626 15	Other active countermeasure equipment (excluding passive materials such as chaff, window, needles, rope, etc.).....		(X)	( <sup>4</sup> )	(X)	(NA)
36626 41	Specialized electronic and communication intelligence equipment (ELINT and COMINT equipment), n.e.c.....				(X)	(NA)
	Ultrasonic equipment:					
36626 22	Cleaners.....		(X)	6.4	(X)	4.4
36626 24	Drills, solders, and welders.....				(X)	
36626 26	Other.....		(X)	12.0	(X)	10.7
36626 96	Other electronic industrial processing equipment.....		(X)	14.5	(X)	15.5
36626 31	Telemetry systems and equipment, n.e.c., sold separately.....		(X)	77.6	(X)	184.1
	Amplifiers, except audio, RF power, and video, sold separately:					
36626 61	Magnetic.....		(X)	2.3	(X)	2.6
36626 65	Pulse.....		(X)		(X)	( <sup>5</sup> )

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

			California.....	GG	(NA)

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9      CC.....\$5.0 to \$9.9      FF.....\$20.0 to \$49.9  
BB.....\$2.0 to \$4.9      EE.....\$10.0 to \$19.9      GG.....\$50.0 and over

- Represents zero. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

TABLE 6C. Product Classes—Value Shipped by All Manufacturing Establishments:  
1958, 1963, 1967 to 1972

(In millions of dollars)

1972 code	Product class	1972	1971 <sup>1</sup>	1970 <sup>1</sup>	1969 <sup>1</sup>	1968 <sup>1</sup>	1967 <sup>1</sup>	1963	1958
3651	Radio and TV receiving sets.....	3,609.7	3,296.3	2,966.1	3,569.2	3,839.3	3,568.2	2,073.9	1,481.6

36790	Electronic components, n.e.c. <sup>5</sup> .....	3,209.8							

- Represents zero. (S) Withheld because the data did not meet publication standards.

<sup>1</sup>These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

<sup>2</sup>For 1958 product classes 36627 and 36629 were part of product class 36621.

<sup>3</sup>For 1958, product class 36628 was part of product class 36624.

<sup>4</sup>For 1963 and 1958, product class 36741 was partly product class 36790.

<sup>5</sup>Includes products not specified by kind for industries 3675, 3676, 3677, and 3678.

TABLE 7A. Materials Consumed, by Kind: 1972 and 1967

(See appendix, Explanation of Terms)

1972 code	Material	Unit of measure	1972		1967

282140	Thermosetting resins.....	..do.....	15.7	11.9
970099	All other materials and components, parts, containers, and sup- plies consumed.....	.....	(X)	947.2
976000	Materials, parts, containers, and supplies, n.s.k. <sup>3</sup> .....	.....	(X)	184.1

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.  
 (Z) Less than half of the unit of measurement shown.

<sup>1</sup>Includes cost for materials indicated by the symbol (D).

<sup>2</sup>Excludes quantities produced and consumed in the same establishment.

<sup>3</sup>This item represents the total cost of materials for establishments that did not report detailed materials data.

TABLE 7B. Fuels and Electric Energy Consumed: 1971 and 1967

(See appendix, Explanation of Terms)

1972 code	Item	Unit of measure	1971		1967

1A	General Statistics: 1958 to 1972 . . . . .	5
1B	Selected Operating Ratios: 1958 to 1972 . . . . .	6
2	General Statistics by Geographic Area: 1972 and 1967 . . . . .	8
3	Detailed Statistics: 1972 . . . . .	10
4	General Statistics, by Employment Size of Establishment: 1972 . . . . .	11
5A	General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972 . . . . .	12
5B	Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967 . . . . .	13
5C	Industry-Product Analysis—Shipments by Product Class and Industry: 1972 . . . . .	14
6A	Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967 . .	15
6B	Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967 . . . . .	21
6C	Product Classes—Value Shipped by All Manufacturing Establishments: 1958, 1963, 1967 to 1972 . . . . .	23
7A	Materials Consumed, by Kind: 1972 and 1967 . . . . .	24
7B	Fuels and Electric Energy Consumed: 1971 and 1967 . . . . .	26

# EXPLANATORY TEXT

## MISCELLANEOUS ELECTRICAL EQUIPMENT AND SUPPLIES

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

3691—Storage Batteries

3692—Primary Batteries, Dry and Wet

3693—Radiographic X-Ray, Fluoroscopic X-Ray, Therapeutic X-Ray, and Other X-Ray Apparatus and Tubes; Electromedical and Electrotherapeutic Apparatus\*

3694—Electrical Equipment for Internal Combustion Engines\*

3699—Electrical Machinery, Equipment, and Supplies, N.E.C.\*

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### INDUSTRY 3691.—STORAGE BATTERIES

This industry comprises establishments primarily engaged in manufacturing storage batteries. For a detailed list of products of industry 3691, refer to table 6A, product codes 36911 13 to 36912 91.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard

\*Note that the "short title" for this industry is used throughout the report.

Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Storage Batteries Industry in 1972 totaled \$971 million. This included shipments of storage batteries (primary products) valued at \$939 million, shipments of other products (secondary products) valued at \$20 million, and miscellaneous receipts (mainly resales) of \$13 million.

Shipments of storage batteries (primary products) in 1972 represented 98 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 99 percent.

Shipments of storage batteries (primary products) from establishments classified in industry 3691 in 1972 represented 99 percent (coverage ratio) of these products valued at \$953 million shipped by all industries. In 1967, the coverage ratio was 97 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3691, these establishments accounted for 3 percent of value of shipments.

### INDUSTRY 3692.—PRIMARY BATTERIES, DRY AND WET

This industry comprises establishments primarily engaged in manufacturing primary batteries, dry or wet. For a detailed list of products of industry 3692, refer to table 6A, product codes 36920 12 to 36920 95.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Primary Batteries, Dry and Wet, Industry in 1972 totaled \$348 million. This included shipments of primary batteries, dry and wet,

(primary products) valued at \$312 million, shipments of other products (secondary products) valued at \$17 million, and miscellaneous receipts (mainly resales) of \$19 million.

Shipments of primary batteries, dry and wet, (primary products) in 1972 represented 95 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 97 percent.

Shipments of primary batteries, dry and wet, (primary products) from establishments classified in industry 3692 in 1972 represented 98 percent (coverage ratio) of these products valued at \$317 million shipped by all industries. In 1967, the coverage ratio was 86 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3692, these establishments accounted for less than 1 percent of value of shipments.

#### **INDUSTRY 3693.—X-RAY APPARATUS AND TUBES** (Short Title)

This industry comprises establishments primarily engaged in manufacturing radiographic X-ray, fluoroscopic X-ray, and therapeutic X-ray apparatus and tubes for medical, industrial, research, and control applications.

This industry also includes establishments primarily engaged in manufacturing electromedical and electrotherapeutic apparatus except electrotherapeutic lamp units for ultraviolet and infrared radiations (industry 3641).

Establishments primarily engaged in manufacturing radio receiving tubes are classified in industry 3671; television receiving cathode-ray tubes in industry 3672; and transmitting tubes in industry 3673.

For a detailed list of products of industry 3693, refer to table 6A, product codes 36930 19 to 36930 96.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

In 1972, the value of products shipped and miscellaneous receipts of establishments classified in the X-Ray Apparatus and Tubes Industry amounted to \$429 million, an increase of 84 percent compared with 1967.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard

Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

Value of shipments and other receipts of the X-Ray Apparatus and Tubes Industry in 1972 totaled \$444 million. This included shipments of X-ray apparatus and tubes (primary products) valued at \$353 million, shipments of other products (secondary products) valued at \$18 million, and miscellaneous receipts (mainly resales) of \$73 million.

Shipments of X-ray apparatus and tubes (primary products) in 1972 represented 95 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 93 percent.

Shipments of X-ray apparatus and tubes (primary products) from establishments classified in industry 3693 in 1972 represented 92 percent (coverage ratio) of these products valued at \$383 million shipped by all industries. In 1967, the coverage ratio was 86 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3693, these establishments accounted for 2 percent of value of shipments.

#### **INDUSTRY 3694.—ENGINE ELECTRICAL EQUIPMENT** (Short Title)

This industry comprises establishments primarily engaged in manufacturing electrical equipment for internal combustion engines. Important products of this industry include armatures, starting motors, alternators, and generators for automobiles and aircraft; and ignition apparatus for internal combustion engines, including spark plugs, magnetos, coils, and distributors. For a detailed list of products of industry 3694, refer to table 6A, product codes 36941 11 to 36946 98.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Engine Electrical Equipment Industry in 1972 totaled \$2,035 million. This included shipments of engine electrical equipment (primary products) valued at \$1,546 million, shipments of other

products (secondary products) valued at \$420 million, and miscellaneous receipts (mainly resales) of \$69 million.

Shipments of engine electrical equipment (primary products) in 1972 represented 79 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 81 percent. Secondary products shipped by this industry in 1972 consisted mainly of motors and generators (\$83 million) and motor vehicle parts and accessories (\$164 million).

Shipments of engine electrical equipment (primary products) from establishments classified in industry 3694 in 1972 represented 87 percent (coverage ratio) of these products valued at \$1,781 million shipped by all industries. In 1967, the coverage ratio was 85 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3694, these establishments accounted for 3 percent of value of shipments.

#### **INDUSTRY 3699.—ELECTRICAL EQUIPMENT AND SUPPLIES, N.E.C. (Short Title)**

This industry comprises establishments primarily engaged in manufacturing electrical machinery, equipment, and supplies, not elsewhere classified, such as appliance and extension cords, bells and chimes, and insert traps. For a detailed list of products of industry 3699, refer to table 6A, product codes 36992 11 to 36996 00.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Electrical Equipment and Supplies, N.E.C., Industry in 1972 totaled \$520 million. This included shipments of electrical equipment and supplies, n.e.c., (primary products) valued at \$436 million, shipments of other products (secondary products) valued at \$36 million, and miscellaneous receipts (mainly resales) of \$30 million.

Shipments of electrical equipment and supplies, n.e.c., (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 93 percent.

Shipments of electrical equipment and supplies, n.e.c., (primary products) from establishments classified in industry 3699 in 1972 represented 52 percent (coverage ratio) of these products valued at \$845 million shipped by all industries. In 1967, the coverage ratio was 50 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3699, these establishments accounted for 27 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Year <sup>1</sup>	Establishments		All employees		Production workers			Value added by manufacture	Cost of materials, fuels, etc.	Value of industry shipments	Capital expenditures, new	Gross value of fixed assets	End-of-year inventories	Specialization ratio	Coverage ratio

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3691	Industry 3692	Industry 3693	Industry 3694	Industry 3699
1972.....	138	30	94	265	969
1967.....	154	32	78	239	528
1963.....	169	26	56	163	245

(NA) Not available. (S) Withheld because the data did not meet publication standards. \*These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

<sup>1</sup>For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee	Assets per employee	Production worker as percent of total employment	Annual man-hours of production workers	Average hourly earnings of production workers	Cost of materials per dollar of shipments	Cost of materials and payrolls per dollar shipments	Assets per dollar of shipments	Value added per employee	Payrolls as percent of value added	Value added per man-hour of production worker

TABLE 2. General Statistics by Geographic Area: 1972 and 1967—Continued

(See appendix. Explanation of Terms)

[illegible]

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent	E3--30 to 39 percent	E5--50 to 59 percent	E7--70 to 79 percent	E9--90 to 99 percent
E2--20 to 29 percent	E4--40 to 49 percent	E6--60 to 69 percent	E8--80 to 89 percent	E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees

BB--250 to 499 employees

CC--500 to 999 employees

EE--1,000 to 2,499 employees

FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent      E3--30 to 39 percent      E5--50 to 59 percent      E7--70 to 79 percent      E9--90 to 99 percent  
E2--20 to 29 percent      E4--40 to 49 percent      E6--60 to 69 percent      E8--80 to 89 percent      E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

<sup>1</sup>Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)

**TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product special- ization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(million dollars)	(million dollars)	(million dollars)	(million dollars)	Col. B Col. B & C (percent)	(million dollars)	(million dollars)	(million dollars)	Col. B Col. F (percent)
		A	B	C	D	E	F	G	H	I
3691	Storage batteries.....1972..	971.3	939.1	19.6	12.6	98	952.7	939.1	13.6	99
	.....1967..	576.6	563.2	3.4	10.0	99	579.4	563.2	16.2	97

<sup>1</sup>Included in this industry are appliance wire and cord and flexible cord sets which are also primary to industry 3357, Nonferrous Wiredrawing, Etc.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Storage batteries (SIC 3691)	Primary batteries, dry and wet (SIC 3692)	X-ray apparatus and tubes (SIC 3693)	Engine electrical equipment (SIC 3694)	Electrical equipment and supplies, n.e.c. 36996 00	Appliance Wire and Cord and Flexible Cord Sets <sup>1</sup> .....		(X)	374.4	(X)	276.8
33576 00	As reported in Current Industrial Reports Series MA-33L.....	1,000 units...	(NA)	<sup>6</sup> 341.9	140.7	259.8
	As reported in the census of manufactures.....		(X)	374.4	(X)	276.8
33576 00	Made in industry 3357 (drawing and insulating of nonferrous wire).....		(X)	262.9	(X)	179.0
36996 00	Made in industry 3699 (electrical machinery, equipment, n.e.c.), and other industries.....		(X)	111.5	(X)	97.8
36990 00	Electrical equipment, n.e.c., n.s.k., for establishments with 10 employees or more. (See note.).....		(X)	94.0	(X)	20.7
36990 02	Electrical equipment, n.e.c., n.s.k., for establishments with less than 10 employees. (See note.).....		(X)	50.5	(X)	16.4

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

(X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. <sup>T</sup> Revised.

<sup>1</sup>The data for 1972 and 1967 present totals as collected in the census of manufactures as well as comparable totals from Current Industrial Reports series. The product detail as shown are those collected on the CIR form specified.

<sup>2</sup>Figures for product codes 36930 82 and 36930 94 are combined to avoid disclosing the operations of individual companies.

<sup>3</sup>Figures for product codes 36941 15, 36941 19, and 36941 00 are combined.

<sup>4</sup>Figures for product codes 36942 29 and 36942 00 are combined.

<sup>5</sup>Data are limited to rebuilding on a factory basis.

<sup>6</sup>In the Current Industrial Report series, coverage includes all establishments classified in industry 3357 but is limited to the 50 largest companies fabricating appliance wire and cord and flexible cord sets from purchased insulated wire (industry 3699 and other industries).

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)		Product class and geographic area	Value of shipments (million dollars)

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

<sup>1</sup>These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

## **MAJOR GROUP 37**

### **Transportation Equipment**

- 37A Motor vehicles and equipment
- 37B Aerospace equipment, including parts
- 37C Ship and boat building, railroad and miscellaneous transportation equipment

This major group includes establishments engaged in manufacturing equipment for transportation of passengers and cargo by land, air, and water. Important products produced by establishments classified in this major group include motor vehicles, aircraft, guided missiles and space vehicles, ships, boats, railroad equipment, and miscellaneous transportation equipment such as motorcycles, bicycles, and snowmobiles. Establishments primarily engaged in manufacturing mobile homes are classified in industry 2451.

TABLE 1. General Statistics: 1972 and Earlier Years

(See appendix, Explanation of Terms)

Year and item	Establishments		All employees <sup>1</sup>		Production workers			Value added by manufacture <sup>2</sup>	Cost of materials <sup>3</sup>	Value of industry shipments <sup>3</sup>	Capital expenditures, new <sup>4</sup>

(X) Not applicable. (NA) Not available.

<sup>1</sup>The figures for 1939 through 1972 include data for employees of manufacturing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.<sup>2</sup>For the period 1954 to 1972, figures represent adjusted value added by manufacture and for earlier years, unadjusted value added. Adjusted value added is equal to value of shipments (including resales of finished products) less cost of finished products, materials, supplies, fuel, electric energy, and contract work, plus the net change in the value of finished products and work-in-process inventories between the beginning and end of the year, without adjustment for price changes. Unadjusted value added is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work in process during the year. For 1921 to 1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture. See "Value Added by Manufacture" in Introduction.<sup>3</sup>The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.<sup>4</sup>The figures for 1958 to 1972 include expenditures for plants under construction and not yet in operation.<sup>5</sup>Data for 1972 are not directly comparable to 1971 and earlier years. See appendix C of the General Summary for the 1972 changes in the Standard Industrial Classification.<sup>6</sup>Data for 1963 to 1972 have been revised by the exclusion of automotive stamping plants operated by automobile producing companies. As a result of this revision, these plants are classified in the metals stampings industry. Data prior to 1963 have not been revised.<sup>7</sup>Figures for 1958 to 1972 for operating manufacturing establishments are not strictly comparable with prior years due to revisions of the Standard Industrial Classification system. Prior to 1958, establishments primarily engaged in the manufacture of truck and bus bearings, convertible tops for automobiles, rebuilt automotive parts, and aircraft and related engine and power take-off gears were excluded from these data. Establishments primarily engaged in the manufacture of parachutes are included in data prior to 1958.<sup>8</sup>In addition to data for operating establishments, figures for employment and payroll for manufacturing central administrative offices and auxiliary units are shown for the years 1949 to 1953 in the annual survey of manufactures volumes. Data for these units are not available for the years 1955 to 1957, 1959 to 1962, 1964 to 1966, 1968 to 1971, and prior to 1949.<sup>9</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.<sup>10</sup>The figures for 1939, but not for 1937, have been revised for comparability with the figures for later years. The principal revision is the exclusion of data for railroad repair shops reclassified as nonmanufacturing establishments. Value added by manufacture for 1939 on a basis strictly comparable with 1937 was \$1,794 million.<sup>11</sup>The figures for 1935 and earlier years are not sufficiently comparable with those for later years to be shown in this table because the earlier figures exclude data for establishments primarily engaged in the manufacture of aircraft engines and for a number of large establishments classified prior to 1937 in other industry groups.

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

<sup>1</sup>General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

<sup>2</sup>The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

# EXPLANATORY TEXT

## MOTOR VEHICLES AND EQUIPMENT

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

**3711—Motor Vehicles and Passenger Car Bodies\***

**3713—Truck and Bus Bodies**

**3714—Motor Vehicle Parts and Accessories**

**3715—Truck Trailers**

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

## INDUSTRY 3711.—MOTOR VEHICLES AND CAR BODIES (Short Title)

This industry comprises establishments primarily engaged in manufacturing or assembling complete passenger automobiles, trucks, commercial cars and buses (except trackless trolleys, industry 3743), and special-purpose motor vehicles. This industry also includes establishments primarily engaged in manufacturing chassis or passenger car bodies. Such establishments may also manufacture motor vehicle parts, but establishments primarily engaged in manufacturing motor vehicle

parts except chassis and passenger car bodies are classified in industry 3714.

Establishments primarily engaged in manufacturing truck and bus bodies and assembling them on purchased chassis are classified in industry 3713; motorcycles in industry 3751; wheel tractors, except contractors' off-highway types, in industry 3523; tracklaying and contractors' off-highway tractors in industry 3531; combat tanks in industry 3795; and stamped body parts for passenger cars in industry 3465. For a detailed list of products of industry 3711, refer to table 6A, product codes 37111 11 to 37115 11.

The industry definition included in the 1972 edition of the SIC Manual combines two separate industries included in the 1967 SIC Manual: Industry 3711, Motor Vehicles, and industry 3712, Passenger Car Bodies.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

Value of shipments and other receipts of the Motor Vehicles and Car Bodies Industry in 1972 totaled \$42,906 million. This included shipments of motor vehicles and car bodies (primary products) valued at \$40,957 million, shipments of other products (secondary products) valued at \$1,652 million, and miscellaneous receipts (mainly resales) of \$296 million.

Shipments of motor vehicles and car bodies (primary products) in 1972 represented 96 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 96 percent. Secondary products shipped by this industry in 1972 consisted mainly of motor vehicle parts and accessories (\$1,206 million).

Shipments of motor vehicles and car bodies (primary products) from establishments classified in industry 3711 in 1972 represented 100 percent (coverage ratio) of these products valued at \$41,046 million shipped by all industries. In 1967, the coverage ratio was 99 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed

\*Note that the "short title" for this industry is used throughout the report.

from industry averages. For industry 3711, these establishments accounted for less than 1 percent of value of shipments.

#### **INDUSTRY 3713.—TRUCK AND BUS BODIES**

This industry comprises establishments primarily engaged in manufacturing truck and bus bodies, for sale separately or for assembly on purchased chassis.

Establishments primarily engaged in manufacturing complete trucks and buses are classified in industry 3711; stamped body parts for trucks and buses in industry 3465; and truck trailers and demountable cargo containers in industry 3715. For a detailed list of products of industry 3713, refer to table 6A, product codes 37131 12 to 37132 98.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Truck and Bus Bodies Industry in 1972 totaled \$1,569 million. This included shipments of truck and bus bodies (primary products) valued at \$1,320 million, shipments of other products (secondary products) valued at \$152 million, and miscellaneous receipts (mainly resales) of \$96 million.

Shipments of truck and bus bodies (primary products) in 1972 represented 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 85 percent.

Shipments of truck and bus bodies (primary products) from establishments classified in industry 3713 in 1972 represented 91 percent (coverage ratio) of these products valued at \$1,444 million shipped by all industries. In 1967, the coverage ratio was 92 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3713, these establishments accounted for 5 percent of value of shipments.

#### **INDUSTRY 3714.—MOTOR VEHICLE PARTS AND ACCESSORIES**

This industry comprises establishments primarily engaged in manufacturing motor vehicle parts and accessories, but not

engaged in manufacturing complete motor vehicles or passenger car bodies.

Establishments primarily engaged in manufacturing or assembling complete automobiles and trucks are classified in industry 3711; tires and tubes in industry 3011; automobile glass in SIC Major Group 32; automobile stampings in industry 3465; vehicular lighting equipment in industry 3647; ignition systems in industry 3694; storage batteries in industry 3691; and carburetors, pistons, rings, and valves in industry 3592. For a detailed list of products of industry 3714, refer to table 6A, product codes 37141 11 to 37143 98.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Motor Vehicle Parts and Accessories Industry in 1972 totaled \$18,277 million. This included shipments of motor vehicle parts and accessories (primary products) valued at \$16,769 million, shipments of other products (secondary products) valued at \$1,151 million, and miscellaneous receipts (mainly resales) of \$358 million.

Shipments of motor vehicle parts and accessories (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 90 percent.

Shipments of motor vehicle parts and accessories (primary products) from establishments classified in industry 3714 in 1972 represented 86 percent (coverage ratio) of these products valued at \$19,417 million shipped by all industries. In 1967, the coverage ratio was 88 percent. Other industries shipping motor vehicle parts and accessories consisted mainly of industry 3711, Motor Vehicles and Car Bodies (\$1,206 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3714, these establishments accounted for 3 percent of value of shipments.

#### **INDUSTRY 3715.—TRUCK TRAILERS**

This industry comprises establishments primarily engaged in manufacturing truck trailers, truck trailer chassis for sale

---

## EXPLANATORY TEXT—Continued

separately, detachable trailer bodies (cargo containers) for sale separately, and detachable trailer (cargo container) chassis, for sale separately. For a detailed list of products of industry 3715, refer to table 6A, product codes 37151 03 to 37152 55.

Value of shipments and other receipts of the Truck Trailers Industry in 1972 totaled \$1,118 million. This included shipments of truck trailers (primary products) valued at \$1,009 million, shipments of other products (secondary products) valued at \$43 million, and miscellaneous receipts (mainly resales) of \$65 million.

Shipments of truck trailers (primary products) in 1972 represented 96 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 94 percent.

Shipments of truck trailers (primary products) from establishment classified in industry 3715 in 1972 represented 94 percent (coverage ratio) of these products valued at \$1,079 million shipped by all industries. In 1967, the coverage ratio was 91 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3715, these establishments accounted for 3 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3711	Industry 3713	Industry 3714	Industry 3715
1972.....	167	732	1,746	215
1967.....	107	620	1,424	147
1963.....	(NA)	594	(NA)	175

The 1963 company count for industry 3711 and 3714 was 1,655.

(NA) Not available. (S) Withheld because the data did not meet publication standards. \*These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

<sup>1</sup>For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to industries 3713 and 3715. Industries 3711 and 3714 were shown as separate industries for the first time in 1967. For prior years, they made up industry 3717, Motor Vehicles and Parts.

Footnotes continued on next page.

TABLE 1A. General Statistics: 1958 to 1972—Continued

<sup>2</sup>Establishments classified as manufacturers of self-contained motor homes in the 1972 Census of Manufactures are included in industries 3711, if made from chassis own manufacture and in industry 3713, if made from purchased chassis. In order to give the data user an estimate of the total value of shipments of self-contained motor homes for 1972, the following represents the general statistics for those establishments primarily producing such motor homes:

Establishments		All employees		Production workers			Value added by manufacture	Cost of materials, fuels, etc.	Value of industry shipments	Capital expenditures, new	Gross value of fixed assets	End-of-year inventories
Total	With 20 employees or more	Number	Payroll	Number	Man-hours	Wages						
(number)	(number)	(1,000)	(million dollars)	(1,000)	(millions)	(million dollars)	(million dollars)	(million dollars)	(million dollars)	(million dollars)	(million dollars)	(million dollars)
59	54	11.7	94.4	9.1	18.2	65.9	221.1	411.4	608.6	29.9	(NA)	111.2

<sup>3</sup>The 1972 Census of Manufactures capital expenditures data include the value of special automotive tools subject to rapid write off which are not included for 1971 and prior years. In 1972, the value of such tools was approximately .5 billion in industry 3711 and .7 billion in industry 3714. In the 1972 Census of Manufactures, respondents were requested to include in the capital expenditures account all costs actually incurred during 1972 chargeable to the fixed assets accounts and of the type for which depreciation accounts are ordinarily maintained. In years prior to 1972, the reporting instructions did not specifically request that expenditures for those special tools be included as capital expenditures. As a result, there has been some inconsistency in treatment of these expenditures. Some have been reported as capital expenditures in the past, others have not. The data shown for 1972 include expenditures for special automotive tools, such as dies, die sets, jigs, and fixtures, etc., normally included in rapid write off accounts. Generally, these special tools are produced in industry 3544, Special Dies, Tools, Jigs, and Fixtures, and used in the automotive industries (3711 and 3714).

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee	Assets per employee	Production worker as percent of total employment	Annual man-hours of production workers	Average hourly earnings of production workers	Cost of materials per dollar of shipments	Cost of materials and payrolls per dollar shipments	Assets per dollar of shipments	Value added per employee	Payrolls as percent of value added	Value added per man-hour of production worker
	(dollars)	(dollars)	(percent)	(number)	(dollars)	(dollars)	(dollars)	(dollars)	(dollars)	(percent)	(dollars)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other Government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent

E3--30 to 39 percent

E5--50 to 59 percent

E7--70 to 79 percent

E9--90 to 99 percent

E2--20 to 29 percent

E4--40 to 49 percent

E6--60 to 69 percent

E8--80 to 89 percent

E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees

BB--250 to 499 employees

CC--500 to 999 employees

EE--1,000 to 2,499 employees

FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other Government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent      E3--30 to 39 percent      E5--50 to 59 percent      E7--70 to 79 percent      E9--90 to 99 percent  
E2--20 to 29 percent      E4--40 to 49 percent      E6--60 to 69 percent      E8--80 to 89 percent      E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above.

<sup>1</sup>Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)

**TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product special- ization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

**TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972**

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Motor vehicles and car bodies (SIC 3711)	Truck and bus bodies (SIC 3713)	Motor vehicle parts and accessories (SIC 3714)	Truck trailers (SIC 3715)	All other industries

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972—Continued

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Motor vehicles and car bodies (SIC 3711)	Truck and bus bodies (SIC 3713)	Motor vehicle parts and accessories (SIC 3714)	Truck trailers (SIC 3715)	All other industries

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

Footnotes continued on next page.

TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

(Footnotes for table 6A--Continued)

(X) Not applicable. (NA) Not available.

<sup>1</sup>Complete vehicles, except passenger cars, produced on purchased chassis are shown as product codes 37132 71 through 37132 98.<sup>2</sup>Included with product code 37112 49, "Other body types," in 1967.<sup>3</sup>Truck and bus bodies built by garages, service stations, and other establishments primarily engaged in nonmanufacturing activities are excluded.<sup>4</sup>The product class structure for this industry was revised effective with 1972.<sup>5</sup>This figure is limited to shipments of products classified in industry 3714. There were additional shipments of motor vehicle parts by parts producers, including spark plugs, ignition coils, storage batteries, carburetors, pistons and piston rings, and springs which are classified outside industry 3714.<sup>6</sup>Includes \$1,336.6 million for which respondents did not supply information as to whether shipments were for replacement, OEM, or for export.<sup>7</sup>Product code 37141 67 has been combined with 37141 98 in order to avoid disclosing figures of individual companies.<sup>8</sup>Data are limited to rebuilding on a factory basis. Rebuilding operations performed in service stations, garages, etc., are excluded from the census of manufactures. Also, these figures may be somewhat understated because of the exclusion of data for establishments with less than 10 employees. Such establishments were typically not included in the mail portion of the census of manufactures, but were included in the published data by the use of estimates from administrative records. These estimates are included in the value shown for product code 37140 02. Although the use of such administrative records tends to create a small understatement for most specific products, the effect is more significant for those products typically produced in small establishments, such as rebuilding facilities.<sup>9</sup>The data for 1972 and 1967 present totals as collected in the census of manufactures as well as comparable totals from Current Industrial Reports series. The product detail as shown are those collected on the CIR form specified.<sup>10</sup>In 1967, product code 37151 50 is combined with product code 37151 10.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

- Represents zero. (NA) Not available.

<sup>1</sup>These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

<sup>2</sup>Prior to 1967, figures for product class 37114, Combat vehicles, and 37110, Motor vehicles, n.s.k., were included with product class 37140, Motor vehicle parts and accessories.

<sup>3</sup>Prior to 1967, figures for product class 37115, Passenger car bodies, were included with product class 37141, Parts and accessories for motor vehicles.

<sup>4</sup>Data for 1963 to 1966 have been revised to exclude automotive job stampings shipped by establishments operated by automotive companies.

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>Includes cost for materials indicated by the symbol (D).<sup>2</sup>Excludes quantities produced and consumed in the same establishment.<sup>3</sup>Represents estimates published in MC67(1)-8 (Supplement), Selected Materials Consumed, from data collected in a supplemental survey on form MA-131, Consumption of Materials, Parts, Containers, and Supplies During 1967. This survey was limited to large establishments in selected chemical, machinery, and equipment industries and resulted in estimates which are subject to greater error than are the figures on materials consumption collected as a regular part of the census of manufactures.<sup>4</sup>This item represents the total cost of materials for establishments that did not report detailed materials data. Also includes estimates for companies that were not mailed report forms.<sup>5</sup>These figures are understated by \$15 to \$25 million because of apparent undercoverage of carbon steel pipe and tube.

# EXPLANATORY TEXT

## AEROSPACE EQUIPMENT, INCLUDING PARTS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3721—Aircraft
- 3724—Aircraft Engines and Engine Parts
- 3728—Aircraft Parts and Auxiliary Equipment, N.E.C.\*
- 3761—Guided Missiles and Space Vehicles
- 3764—Guided Missile and Space Vehicle Propulsion Units and Propulsion Unit Parts\*
- 3769—Guided Missile and Space Vehicle Parts and Auxiliary Equipment, N.E.C.\*

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

## INDUSTRY 3721.—AIRCRAFT

The Aircraft Industry includes establishments primarily engaged in manufacturing or assembling complete aircraft. This industry also includes establishments primarily engaged in research and development on aircraft or in factory-type aircraft modification on a contract or fee basis.

Establishments primarily engaged in manufacturing engines, propellers, and other aircraft parts and auxiliary equipment are classified in industries 3724 and 3728, and those producing

guided missiles and space vehicles and parts are classified in SIC group 376.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Aircraft Industry in 1972 totaled \$8,779 million. This included value of work done on aircraft (primary products) valued at \$7,237 million, shipments of other products (secondary products) valued at \$1,162 million, and miscellaneous receipts (mainly sales of products bought and resold) of \$380 million.

Value of work done on aircraft (primary products) in 1972 represented 86 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 83 percent. Secondary products shipped by this industry in 1972 consisted mainly of aircraft parts and miscellaneous aircraft equipment (\$939 million).

Shipments of aircraft (primary products) from establishments classified in industry 3721 in 1972 represented 96 percent (coverage ratio) of these products valued at \$7,538 million shipped by all industries. In 1967, the coverage ratio was 97 percent. Other industries shipping aircraft consisted mainly of industry 3728, Aircraft Equipment, N.E.C. (\$160 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3721, these establishments accounted for less than 1 percent of value of shipments.

## INDUSTRY 3724.—AIRCRAFT ENGINES AND ENGINE PARTS

The Aircraft Engines and Engine Parts Industry includes establishments primarily engaged in manufacturing aircraft engines and engine parts. Research and development on aircraft engines is included in this industry.

\*Note that the "short title" for this industry is used throughout the report.

Establishments primarily engaged in manufacturing guided missile and space vehicle propulsion units and parts are classified in industry 3764.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The Aircraft Engines and Engine Parts Industry is included for the first time in the census of manufactures for 1972. The statistics for this industry as classified under the 1967 classification system were split, as a result of the 1972 edition of the SIC manual into industry 3724, Aircraft Engines and Engine Parts; and industry 3764, Space Propulsion Units and Parts. The effect of these revisions can be seen in table 1C. For detailed data on products of industry 3724, Aircraft Engines and Engine Parts, refer to table 6A.

Value of shipments and other receipts of the Aircraft Engines and Engine Parts Industry in 1972 totaled \$3,640 million. This included shipments of aircraft engines and engine parts (primary products) valued at \$2,891 million, shipments of other products (secondary products) valued at \$417 million, and miscellaneous receipts (mainly sales of products bought and resold) of \$332 million.

Shipments of aircraft engines and engine parts (primary products) in 1972 represented 87 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Shipments of aircraft engines and engine parts (primary products) from establishments classified in industry 3724 in 1972 represented 94 percent (coverage ratio) of these products valued at \$3,070 million shipped by all industries. Other industries shipping aircraft engines and engine parts consisted mainly of industry 3728, Aircraft Equipment, N.E.C. (\$80 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3724, these establishments accounted for 1 percent of value of shipments.

#### **INDUSTRY 3728.—AIRCRAFT EQUIPMENT, N.E.C. (Short Title)**

The Aircraft Equipment, N.E.C., Industry includes establishments primarily engaged in manufacturing aircraft parts

and auxiliary equipment, not elsewhere classified. Research and development on aircraft parts is included in this industry.

Establishments primarily engaged in manufacturing or assembling complete aircraft are classified in industry 3721, aircraft engines and parts in industry 3724, aeronautical instruments in industry 3811, aeronautical electrical equipment in industry 3694, and guided missile and space vehicle parts and auxiliary equipment in industry 3769.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The classification system followed in the 1967 census was split, as a result of the 1972 edition of the SIC manual, into two separate industries: 3728, Aircraft Equipment, N.E.C., and 3769, Space Vehicle Equipment, N.E.C., from old SIC industry 3729, Aircraft Parts and Auxiliary Equipment, N.E.C. Old SIC 3723, Aircraft Propellers and Propeller Parts, is also now classified in this industry. The effect of these revisions are summarized in table 1C. For detailed data on products of industry 3728, Aircraft Equipment, N.E.C., see table 6A.

Value of shipments and other receipts of the Aircraft Equipment, N.E.C., Industry in 1972 totaled \$3,032 million. This included shipments of aircraft parts and auxiliary equipment, not elsewhere classified (primary products), valued at \$2,257 million, shipments of other products (secondary products) valued at \$664 million, and miscellaneous receipts (mainly receipts for repair work) of \$111 million.

Shipments of aircraft parts and auxiliary equipment (primary products) in 1972 represented 77 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 included aircraft (\$160 million), aircraft engines and engine parts (\$80 million), and space vehicle equipment (\$82 million).

Shipments of aircraft parts and auxiliary equipment (primary products) from establishments classified in industry 3728 in 1972 represented 66 percent (coverage ratio) of these products valued at \$3,437 million shipped by all industries. Other industries shipping aircraft parts and auxiliary equipment consisted mainly of industry 3721, Aircraft (\$939 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3728, these establishments accounted for 3 percent of value of shipments.

**INDUSTRY 3761.—GUIDED MISSILES AND SPACE VEHICLES**

The Guided Missiles and Space Vehicles Industry includes establishments primarily engaged in manufacturing complete guided missiles and space vehicles. Research and development and other services on or for guided missiles and space vehicles are included in this industry.

Establishments primarily engaged in manufacturing guided missile and space vehicle propulsion units and parts are classified in industry 3764; space satellite, guided missile and space vehicle airborne and ground guidance, checkout and launch electronic systems and components in industry 3662; and guided missile and space vehicle airframes, nose cones, and space capsules in industry 3769.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry, as classified under the 1972 edition of the SIC manual, were changed to code number 3761 from code number 1925 in the previous classification system but were not changed as to content.

Value of shipments and other receipts of the Guided Missiles and Space Vehicles Industry in 1972 totaled \$4,124 million. This included value of work done on guided missiles and space vehicles (primary products) valued at \$3,505 million, shipments of other products (secondary products) valued at \$417 million, and miscellaneous receipts (mainly sales of products bought and resold) of \$201 million.

Shipments of guided missiles and space vehicles (primary products) in 1972 represented 89 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 89 percent. Secondary products shipped by this industry in 1972 included radio and TV communication equipment (\$109 million), and space vehicle equipment (\$36 million).

Shipments of guided missiles and space vehicles (primary products) from establishments classified in industry 3761 in 1972 represented 95 percent (coverage ratio) of these products valued at \$3,705 million shipped by all industries. In 1967, the coverage ratio was 86 percent. Other industries shipping guided missiles and space vehicles included industry 3721, Aircraft (\$84 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other

Government agencies and the remaining statistics constructed from industry averages. For industry 3761, these establishments accounted for less than 1 percent of value of shipments.

**INDUSTRY 3764.—SPACE PROPULSION UNITS AND PARTS (Short Title)**

The Space Propulsion Units and Parts Industry includes establishments primarily engaged in manufacturing guided missile propulsion units and propulsion unit parts. This industry also includes establishments primarily engaged in research and development on guided missile and space vehicle propulsion units and propulsion unit parts.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The Space Propulsion Units and Parts Industry is included for the first time in the census of manufactures for 1972. It was part of industry 3722 in 1967. See table 1C for a summary of the effects of this revision. For detailed data on products of industry 3764, Space Propulsion Units and Parts, refer to table 6A.

Value of shipments and other receipts of the Space Propulsion Units and Parts Industry in 1972 totaled \$716 million. This included shipments of space propulsion units and parts (primary products) valued at \$646 million, shipments of other products (secondary products) valued at \$64 million, and miscellaneous receipts of \$7 million.

Shipments of space propulsion units and parts (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Shipments of space propulsion units and parts (primary products) from establishments classified in industry 3764 in 1972 represented 87 percent (coverage ratio) of these products valued at \$741 million shipped by all industries. Other industries shipping space propulsion units and parts included industry 3724, Aircraft Engines and Engine Parts (\$27 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3764, these establishments accounted for less than 1 percent of value of shipments.

**INDUSTRY 3769.—SPACE VEHICLE EQUIPMENT, N.E.C.**  
**(Short Title)**

The Space Vehicle Equipment, N.E.C., Industry includes establishments primarily engaged in manufacturing guided missile and space vehicle parts and auxiliary equipment, not elsewhere classified. Research and development on guided missile and space vehicle parts and equipment, not elsewhere classified, is also included in this industry.

Establishments primarily engaged in manufacturing navigational and guidance systems are classified in industry 3662.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

This industry is shown as a separate industry for the first time in the census of manufactures for 1972. It is composed of 1967 product classes 37292 and 37294. See table 1C for a summary of the effects of this revision. For detailed data on products of industry 3769, Space Vehicle Equipment, N.E.C., see table 6A.

Value of shipments and other receipts of the Space Vehicle Equipment, N.E.C., Industry in 1972 totaled \$788 million. This included shipments of space vehicle equipment, not else-

where classified (primary products) valued at \$562 million, shipments of other products (secondary products) valued at \$154 million, and miscellaneous receipts (mainly receipts for research and development not attributable to aircraft, missile, or space vehicle engines, parts, or systems) of \$72 million.

Shipments of space vehicle equipment, not elsewhere classified (primary products) in 1972 represented 79 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Shipments of space vehicle equipment, not elsewhere classified (primary products) from establishments classified in industry 3769 in 1972 represented 68 percent (coverage ratio) of these products valued at \$825 million shipped by all industries. Other industries shipping space vehicle equipment consisted mainly of industry 3728, Aircraft Equipment, N.E.C. (\$82 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3769, these establishments accounted for less than 1 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Year <sup>1</sup>	Establishments		All employees		Production workers			Value added by manufacture	Cost of materials, fuels, etc.	Value of industry shipments	Capital expenditures, new	Gross value of fixed assets	End-of-year inventories	Specialization ratio	Coverage ratio

1958 Census.....	1,219	518	229.0	1,380.5	153.7	316.1	831.4	1,909.5	1,261.6	3,266.4	56.1	(NA)	657.0	83	64

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3721	Industry 3724	Industry 3728	Industry 3761	Industry 3764	Industry 3769
1972.....	141	189	649	22	22	45
1967.....	91	(NA)	(NA)	25	(NA)	(NA)
1963.....	82	(NA)	(NA)	25	(NA)	(NA)

(NA) Not available. (S) Withheld because the data did not meet publication standards.

<sup>1</sup>For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

<sup>2</sup>Prior to 1970, establishments in this industry reported value of work done instead of value of shipments. Consequently, the formula for computing value added by manufacture was not adjusted for any inventory change between the beginning and end of the year.

<sup>3</sup>Industries 3724 and 3764 were newly defined in the 1972 edition of the SIC Manual. These two industries are equivalent to the 1967 industry 3722.

<sup>4</sup>Industries 3728 and 3769 were newly defined in the 1972 edition of the SIC Manual. These two industries are equivalent to 1967 industry 3729.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC				
	Establishments		All employees	Value added by manufacture	Value of shipments	Establishments		All employees	Value added by manufacture	Value of shipments
	Total	With 20 employees or more				Total	With 20 employees or more			
	(number)	(number)	(1,000)	(million dollars)	(million dollars)	(number)	(number)	(1,000)	(million dollars)	(million dollars)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent  
E2--20 to 29 percent

E3--30 to 39 percent  
E4--40 to 49 percent

E5--50 to 59 percent  
E6--60 to 69 percent

E7--70 to 79 percent  
E8--80 to 89 percent

E9--90 to 99 percent  
E0-100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees

BB--250 to 499 employees

CC--500 to 999 employees

EE--1,000 to 2,499 employees

FF--2,500 employees and over

(See appendix. Explanation of Terms)

<sup>2</sup>The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

(See appendix, Explanation of Terms)

See footnotes at end of table.

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent      E3--30 to 39 percent      E5--50 to 59 percent      E7--70 to 79 percent      E9--90 to 99 percent  
E2--20 to 29 percent      E4--40 to 49 percent      E6--60 to 69 percent      E8--80 to 89 percent      E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

<sup>1</sup>Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied by other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization:  
1972—Continued

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)
			Number	Payroll	Number	Man-hours	Wages				
			(1,000)	(million dollars)	(1,000)	(millions)	(million dollars)

(0) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product special- ization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(million dollars)	(million dollars)	(million dollars)	(million dollars)	Col. B Col. B & C (percent)	(million dollars)	(million dollars)	(million dollars)	Col. B Col. F (percent)
		A	B	C	D	E	F	G	H	I
3721	Aircraft.....1972..	8,779.3	7,236.6	1,162.4	380.3	86	7,538.2	7,236.6	301.6	96
	.....1967..	11,079.8	8,928.9	1,871.2	279.7	83	9,172.2	8,928.9	243.3	97

<sup>1</sup>Figures represent value of work done rather than value of shipments.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972—Continued

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Aircraft (SIC 3721)	Aircraft engines and engine parts (SIC 3724)	Aircraft equipment, n.e.c. (SIC 3728)	Guided missiles and space vehicles (SIC 3761)	Space propulsion units and parts (SIC 3764)	Space vehicle equipment, n.e.c. (SIC 3769)	Other industries
	Value of receipts of the industry--Continued								
3662	Secondary products--Continued								
	Radio and TV communication equipment.....	(X)	(10-20)	1.4	28.7	108.6	(10-20)	(2-5)	(X)

37694 00	Research and development on missile and space vehicle parts and components, n.e.c., n.s.k.....	8.2	12.3

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. In some cases, figures which are otherwise publishable are withheld to avoid indirect disclosure by subtraction from higher level totals or from related figures.

<sup>1</sup>Data represent shipments or value of work done, including modifications, conversions, and overhaul of previously accepted aircraft and other aeronautical services (including research and development on aircraft). "Value of accepted aircraft or missile systems" was also requested, but due to incomplete reporting, the data are not published.

<sup>2</sup>The comparable total reported in Current Industrial Reports series M-37G, "Complete Aircraft and Aircraft Engines," was \$3,231.8 million.

<sup>3</sup>Data were reported as "receipts or billings."

<sup>4</sup>For 1967, data for product code 37243 23 are combined with product code 37243 00.

<sup>5</sup>Aircraft hydraulic and pneumatic subassemblies were included with "Other aircraft subassemblies and parts" in 1967.

<sup>6</sup>Data reported in the Current Industrial Reports are limited to parts shipped by plants producing complete propellers. See product code 37285 61 for propeller parts produced in other establishments.

<sup>7</sup>Respondents were instructed to report either value of shipments or value of work done in 1972. The 1967 instructions provided for reporting receipts, billings, or value of work done.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)		Product class and geographic area	Value of shipments (million dollars)

- Represents zero. (NA) Not available.

<sup>1</sup>These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and/or, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

<sup>2</sup>For 1954 to 1962, data for complete missile or space vehicle engines and/or propulsion units were included with aircraft engines.

<sup>3</sup>For 1954 to 1962, data on receipts for research and development on complete missile or space vehicle engines and/or propulsion units, and all other services on complete missile or space vehicle engines and/or propulsion units were included with receipts for research and development on aircraft engines.

<sup>4</sup>For 1954 to 1962, data on missile and space vehicle engine and/or propulsion unit parts or accessories were included with aircraft engine parts and accessories.

<sup>5</sup>For 1958, 1963, and 1968 to 1971, n.s.k. data shown for industry 3724 includes n.s.k. for industries 3724 and 3764.

<sup>6</sup>For 1958, 1963, and 1968 to 1971, n.s.k. data shown for industry 3728 includes n.s.k. for industries 3728 and 3769.

970099	All other materials and components, parts, containers, and supplies consumed.....	.....				
976000	Materials, components, parts, containers, and supplies consumed, n.s.k. <sup>2</sup> .....	.....	(X)	224.4		
			(X)	5.3		

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.  
(Z) Less than half of the unit of measurement shown.

<sup>1</sup>Excludes quantities produced and consumed in the same establishment.

<sup>2</sup>This item represents the total cost of materials for establishments that did not report detailed materials data. Also includes estimates for companies that were not mailed report forms.

<sup>3</sup>Includes cost for materials indicated by the symbol (D).

TABLE 7B. Fuels and Electric Energy Consumed: 1971 and 1967

(See appendix, Explanation of Terms)

1972 code	Item	Unit of measure	1971		1967	
			Quantity	Cost (million dollars)	Quantity	Cost (million dollars)
	3721.—AIRCRAFT					
	Purchased fuels and electric energy.....		(X)	43.9	(X)	38.9
	Purchased fuels, total.....		(X)	12.5	(X)	10.8
121005	Coal.....	1,000 s. tons.....	31.7	.3	73.0	.5
331212	Coke.....	...do.....	-	-	(NA)	(NA)

# EXPLANATORY TEXT

## SHIP AND BOAT BUILDING, RAILROAD AND MISCELLANEOUS TRANSPORTATION EQUIPMENT

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

**3731—Ship Building and Repairing**

**3732—Boat Building and Repairing**

**3743—Railroad Equipment**

**3751—Motorcycles, Bicycles, and Parts**

**3792—Travel Trailers and Campers**

**3795—Tanks and Tank Components**

**3799—Transportation Equipment, N.E.C.**

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### INDUSTRY 3731.—SHIP BUILDING AND REPAIRING

This industry comprises establishments primarily engaged in building and repairing all types of ships, barges, and lighters, whether propelled by sail or motor power or towed by other craft. This industry also includes the conversion and alteration of ships.

Establishments primarily engaged in fabricating structural assemblies or components for ships, or subcontractors engaged in ship painting, joinery, carpentry work, electrical wiring installation, etc., are classified in other industries.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard

Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

For a detailed list of products of industry 3731, refer to table 6A, product codes 37311 11 to 37316 59.

Value of work done and other receipts of the Ship Building and Repairing Industry in 1972 totaled \$3,281 million. This included value of ship building and repair (primary products) valued at \$3,124 million, shipments of other products (secondary products) valued at \$73 million, and miscellaneous receipts of \$84 million.

Value of work done on ship building and repairing (primary products) in 1972 represented 98 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 95 percent.

Value of work done on ship building and repairing (primary products) in establishments classified in industry 3731 in 1972 represented 98 percent (coverage ratio) of these products valued at \$3,201 million shipped by all industries. In 1967, the coverage ratio was also 98 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3731, these establishments accounted for 1 percent of value of shipments.

### INDUSTRY 3732.—BOAT BUILDING AND REPAIRING

This Industry includes establishments primarily engaged in building and repairing all types of boats.

Establishments primarily engaged in cleaning and storing boats and in the rental of dock space, and yacht clubs are classified in nonmanufacturing industries. Establishments primarily engaged in manufacturing rubber and nonrigid plastic boats are classified in SIC Major Group 30.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system. The product classes within the industry were revised, however. For a detailed list of products of industry 3732, refer to table 6A, product codes 37322 21 to 37328 21.

Value of shipments and other receipts of the Boat Building and Repairing Industry in 1972 totaled \$1,054 million. This included shipments of boats and a value of boat repairing (primary products) valued at \$990 million, shipments of other products (secondary products) valued at \$33 million, and miscellaneous receipts (mainly resales) of \$30 million.

Shipments of boats and boat repairing (primary products) in 1972 represented 97 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 96 percent.

Shipments of boats and boat repairing (primary products) from establishments classified in industry 3732 in 1972 represented 96 percent (coverage ratio) of these products valued at \$1,031 million shipped by all industries. In 1967, the coverage ratio was 91 percent. Other industries shipping and repairing boats consisted mainly of industry 3731 (\$14 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3732, these establishments accounted for 23 percent of value of shipments.

#### INDUSTRY 3743.—RAILROAD EQUIPMENT

This industry comprises establishments primarily engaged in building and rebuilding locomotives (including frames and parts not elsewhere classified) of any type or gage; and railroad, street, and rapid transit cars and car equipment for operation on rails for freight and passenger service. This industry also includes establishments primarily engaged in manufacturing trackless trolley buses.

Establishments primarily engaged in manufacturing mining cars are classified in industry 3532. Repair shops, owned and operated by railroads or local transit companies, rebuilding or repairing locomotives or cars, or building new locomotives or cars for their own account, are classified in SIC Major Groups 40 and 41.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The Railroad Equipment Industry is included for the first time in the census of manufactures for 1972. It was derived by combining industry 3741, Locomotives and Parts, and industry 3742, Railroad and Street Cars, under the classification system followed in the 1967 census. The effect of the revisions on the data are summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 34 establishments with 19.5 thousand total employment and \$591 million value added would have been classified in industry 3741 under the old SIC. Industry 3742 would have had 129 establishments with 31.3 thousand total employment and \$522 million value added. For a detailed list of products of industry 3743, refer to table 6A, product codes 37431 44 to 37433 51.

Value of shipments and other receipts of the Railroad Equipment Industry in 1972 totaled \$2,446 million. This included shipments of railroad equipment (primary products) valued at \$2,151 million, shipments of other products (secondary products) valued at \$188 million, and miscellaneous receipts of \$106 million.

Shipments of railroad equipment (primary products) in 1972 represented 92 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio for 1967 is not available.

Shipments of railroad equipment (primary products) from establishments classified in industry 3743 in 1972 represented 95 percent (coverage ratio) of these products valued at \$2,284 million shipped by all industries. In 1967, the coverage ratio was 94 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3743, these establishments accounted for 1 percent of value of shipments.

#### INDUSTRY 3751.—MOTORCYCLES, BICYCLES, AND PARTS

This industry comprises establishments primarily engaged in manufacturing motorcycles, bicycles, and similar equipment and parts.

This industry also includes establishments primarily engaged in assembling motorcycles or bicycles from purchased parts.

Establishments primarily engaged in manufacturing children's vehicles, except bicycles, are classified in industry

3944. Establishments primarily engaged in manufacturing golf carts and other similar personnel carriers are classified in industry 3799.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry, as classified under the 1972 edition of the SIC manual, were unchanged as to code number from the previous classification, but were significantly changed in comparison with data classified by the previous system. For a detailed list of products of industry 3751, refer to table 6A, product codes 37511 61 to 37512 53.

Value of shipments and other receipts of the Motorcycles, Bicycles, and Parts Industry in 1972 totaled \$660 million. This included shipments of motorcycles, bicycles, and parts (primary products) valued at \$514 million, shipments of other products (secondary products) valued at \$118 million, and miscellaneous receipts (mainly resales) of \$28 million.

Shipments of motorcycles, bicycles, and parts (primary products) in 1972 represented 81 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Shipments of motorcycles, bicycles, and parts (primary products) from establishments classified in industry 3751 in 1972 represented 95 percent (coverage ratio) of these products valued at \$541 million shipped by all industries. In 1967, the coverage ratio was 96 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3751, these establishments accounted for 4 percent of value of shipments.

#### INDUSTRY 3792.—TRAVEL TRAILERS AND CAMPERS

This industry comprises establishments primarily engaged in manufacturing travel trailers for attachment to passenger cars or other vehicles and pickup coaches (campers) or caps (covers) for mounting on pickup trucks. Travel trailers are generally 35 feet long or less, 8 feet wide or less, and have storage facilities for water and waste.

Establishments primarily engaged in manufacturing mobile homes are classified in industry 2451.

The classification of establishments for which data are tabulated in this report is based upon the definitions and

coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual published by the Office of Management and Budget, Executive Office of the President.

The classification system followed in the 1967 census (old SIC 3791) was split, as a result of the 1972 edition of the SIC manual, into two separate industries: Industry 3792, Travel Trailers and Campers, and industry 2451, Mobile Homes. In addition, small collapsible travel trailers, previously included in SIC 3799, are now included in this industry.

The effect of the revisions on the data are summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 31 establishments with 3.8 thousand total employment and \$45 million value added would have been classified in industry 3799 under the old SIC. For a detailed list of products of industry 3792, refer to table 6A, product codes 37921 31 to 37922 47.

Value of shipments and other receipts of the Travel Trailers and Campers Industry in 1972 totaled \$1,347 million. This included shipments of travel trailers and campers (primary products) valued at \$1,203 million, shipments of other products (secondary products) valued at \$111 million, and miscellaneous receipts (mainly resales) of \$34 million.

Shipments of travel trailers and campers (primary products) in 1972 represented 92 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of transportation equipment, not elsewhere classified, (\$42 million).

Shipments of travel trailers and campers (primary products) from establishments classified in industry 3792 in 1972 represented 94 percent (coverage ratio) of these products valued at \$1,276 million shipped by all industries. Other industries shipping travel trailers and campers consisted mainly of industry 3713 (\$40 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3792, these establishments accounted for 24 percent of value of shipments.

#### INDUSTRY 3795.—TANKS AND TANK COMPONENTS

This industry comprises establishments primarily engaged in manufacturing or assembling complete tanks and specialized components for tanks.

---

## EXPLANATORY TEXT—Continued

Establishments primarily engaged in manufacturing military vehicles other than tanks are classified in SIC group 371, and tank engines in industry 3519.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry, as classified under the 1972 edition of the SIC manual, were changed to code number 3795 from code number 1931 in the previous classification system but were not changed as to content.

Value of shipments and other receipts of the Tanks and Tank Components Industry in 1972 totaled \$272 million. This included shipments of tanks and tank components (primary products) valued at \$220 million, shipments of other products (secondary products) valued at \$11 million, and miscellaneous receipts of \$41 million.

Shipments of tanks and tank components (primary products) in 1972 represented 95 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 85 percent.

Shipments of tanks and tank components (primary products) from establishments classified in industry 3795 in 1972 represented 77 percent (coverage ratio) of these products valued at \$285 million shipped by all industries. In 1967, the coverage ratio was 76 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3795, these establishments accounted for less than 1 percent of value of shipments.

### INDUSTRY 3799.—TRANSPORTATION EQUIPMENT, N.E.C.

This industry comprises establishments primarily engaged in manufacturing transportation equipment, not elsewhere classified.

Establishments primarily engaged in manufacturing industrial trucks, tractors, trailers, and stackers are classified in industry 3537, and children's vehicles, except bicycles, in industry 3944.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The code number for this industry in the 1972 revision of the SIC is unchanged, but the content has been significantly changed. Collapsible camping trailers and travel trailers less than 11 feet in length (1967 product code 37991 21) are included in industry 3792, Travel Trailers and Campers, in 1972. Farm wagons, trucks, and other farm transportation equipment and parts (1967 product code 37992 10) are included in industry 3523, Farm Machinery and Equipment, in 1972. Conversely, self-propelled golf carts, etc., (1972 product code 37993 81) were included in 1967 in industry 3751, Motorcycles, Bicycles, and Parts.

The effect of the revisions on the data are summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 18 establishments with 700 total employment and \$6.4 million value added would have been classified in different industries under the old SIC. For a detailed list of products of industry 3799, refer to table 6A, product codes 37993 81 to 37999 98.

Value of shipments and other receipts of the Transportation Equipment, N.E.C., Industry in 1972 totaled \$655 million. This included shipments of transportation equipment, n.e.c., (primary products) valued at \$581 million, shipments of other products (secondary products) valued at \$44 million, and miscellaneous receipts (mainly resales) of \$30 million.

Shipments of transportation equipment, n.e.c., (primary products) in 1972 represented 93 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 94 percent.

Shipments of transportation equipment, n.e.c., (primary products) from establishments classified in industry 3799 in 1972 represented 74 percent (coverage ratio) of these products valued at \$782 million shipped by all industries. In 1967, the coverage ratio was 75 percent. Other industries shipping transportation equipment, n.e.c., consisted mainly of industry 3751 at \$44 million and industry 3792 at \$42 million.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3799, these establishments accounted for 10 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Year¹	Establishments		All employees		Production workers			Value added by manufacture	Cost of materials, fuels, etc.	Value of industry shipments	Capital expenditures, new	Gross value of fixed assets	End-of-year inventories	Specialization ratio	Cover-age ratio

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3731	Industry 3732	Industry 3743	Industry 3751	Industry 3792	Industry 3795	Industry 3799
1972.....	415	1,716	127	219	945	18	444
1967.....	389	1,565	109	(NA)	(NA)	23	(NA)
1963.....	305	1,626	91	(NA)	(NA)	23	(NA)

(NA) Not available. \*These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability. <sup>†</sup>Revised.

<sup>1</sup>For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

<sup>2</sup>Establishments in this industry reported value of work done rather than value of shipments. Consequently, the formula for computing value added by manufacture was not adjusted for inventory change between the beginning and end of the year. It does include value added by resale.

<sup>3</sup>The products of this industry were revised in the 1972 edition of the SIC manual. Self-propelled golf carts were moved from industry 3751 to industry 3799. This change affected the statistics shown in this table by less than 1 percent for 1972, and these 1972 data are comparable to prior years.

<sup>4</sup>Comparable data prior to 1972 are not available.

<sup>5</sup>Includes data only for privately owned and/or operated establishments. Government owned and operated establishments are excluded.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee  (dollars)	Assets per employee  (dollars)	Production worker as percent of total employment  (percent)	Annual man-hours of production workers  (number)	Average hourly earnings of production workers  (dollars)	Cost of materials per dollar of shipments  (dollars)	Cost of materials and payrolls per dollar shipments  (dollars)	Assets per dollar of shipments  (dollars)	Value added per employee  (dollars)	Payrolls as percent of value added  (percent)	Value added per man-hour of production worker  (dollars)

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC				
	Establishments		All employees	Value added by manufacture	Value of shipments	Establishments		All employees	Value added by manufacture	Value of shipments
	Total	With 20 employees or more				Total	With 20 employees or more			
(number)	(number)	(1,000)	(million dollars)	(million dollars)	(number)	(number)	(1,000)	(million dollars)	(million dollars)	
New industry 3743.—Railroad Equipment.....	163	103	50.8	1,113.3	2,446.2	(X)	(X)	(X)	(X)	(X)
Old industry 3741.—Locomotives and Parts.....	34	16	19.5	591.1	1,059.4	34	16	19.5	591.1	1,059.4
Old industry 3742.—Railroad and Street Cars.....	129	87	31.3	522.2	1,386.8	129	87	31.3	522.2	1,386.8
New industry 3792.—Travel Trailers and Campers.....	1,033	388	37.3	481.6	1,347.1	(X)	(X)	(X)	(X)	(X)
Old industry 3791.—Trailer Coaches.....	1,002	364	33.5	436.6	1,204.1	<sup>1</sup> 1,705	967	105.8	1,491.3	4,488.4
Old industry 3799.—Transportation Equipment, N.E.C.....	31	24	3.8	45.0	143.0	<sup>2</sup> 594	236	22.4	325.0	891.3
New industry 3799.—Transportation Equipment, N.E.C.....	501	192	16.1	232.8	654.6	(X)	(X)	(X)	(X)	(X)
Old industry 3751.—Motorcycles, Bicycles, and Parts ....	18	10	.7	6.4	32.1	227	53	17.7	316.9	663.9
Old industry 3791.—Trailer Coaches.....						<sup>1</sup> 1,705	967	105.8	1,491.3	4,488.4
Old industry 3799.—Transportation Equipment, N.E.C.....						<sup>2</sup> 594	236	22.4	325.0	891.3

(X) Not applicable.

<sup>1</sup>The balance of establishments classified in old industry 3791 are now classified in new industry 2451, Mobile Homes.<sup>2</sup>Of the total establishments shown, approximately 81 establishments classified in old industry 3799 are now classified in new industry 3523, Farm Machinery and Equipment.

TABLE 2: General Statistics by Geographic Area: 1972 and 1967

(See appendix, Explanation of Terms)

Industry and geographic area	1972											1967	
	Establishments		All employees		Production workers			Value added by manufacture	Cost of materials	Value of shipments	Capital expenditures, new	All employees <sup>1</sup>	Value added by manufacture

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent      E3--30 to 39 percent      E5--50 to 59 percent      E7--70 to 79 percent      E9--90 to 99 percent  
E2--20 to 29 percent      E4--40 to 49 percent      E6--60 to 69 percent      E8--80 to 89 percent      E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

<sup>1</sup>General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees      BB--250 to 499 employees      CC--500 to 999 employees      EE--1,000 to 2,499 employees      FF--2,500 employees and over

ESTABS. COVERED BY ADMIN. RECORD <sup>1</sup> .	93	.3	1.9	.3	.5	1.4	3.4	5.7	9.1	.2	1.8

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent      E3--30 to 39 percent      E5--50 to 59 percent      E7--70 to 79 percent      E9--90 to 99 percent  
 E2--20 to 29 percent      E4--40 to 49 percent      E6--60 to 69 percent      E8--80 to 89 percent      E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown.

<sup>1</sup>Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization--the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization--the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

(D) Withheld to avoid disclosing figures for individual companies.

(Z) Less than half of the unit of measurement shown.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through O and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product special- ization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

(NA) Not available.

<sup>1</sup>Represents value of work done rather than value of shipments.

<sup>2</sup>New industry in 1972; no comparable historic data.

<sup>3</sup>These data are not fully comparable to 1972. (See text.)

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

37990 02	Transportation equipment, n.e.c., n.s.k., for establishments with less than 10 employees. (See note.).....		(X)	9.1	(X)	10.9

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>For this industry, value of work done is reported rather than value of shipments. However, the values for product codes 37311 11 through 37311 81 represent value of shipments.

<sup>2</sup>Excludes products manufactured or repaired by facilities operated by the Department of Defense, and at Federal, District of Columbia, and State prisons.

<sup>3</sup>In 1967, the separation by length was based on the following sizes: 13'6" and under, 13'7" to 15'6", 15'7" to 17'6", and 17'7" and over.

<sup>4</sup>For 1967, prefabricated boat construction kits are included with utility boats.

<sup>5</sup>The product class structure for this industry was revised effective in 1972.

<sup>6</sup>In 1967, inboard-outdrive houseboats were included in product codes 37326 73 and 37326 75.

<sup>7</sup>Data for product code 37325 11 are combined with product code 37325 00 to avoid disclosing operations of individual companies.

<sup>8</sup>Excludes railroad equipment shipped by shops of operating railroads. (See section below).

<sup>9</sup>These are 1972 data as published in the 1973 report and may differ from that previously published.

<sup>10</sup>Passenger and freight train cars are defined as rebuilt when the cost of dismantling, improvement, and modernization is more than 50 percent of the replacement cost of a new unit of the same class and kind at the time of rebuilding. Conversions and classification of units by replacement of defective parts are not included.

<sup>11</sup>Value of locomotives and railroad cars built by railroads for own use represents the amounts which are written into property accounts.

In the case of rebuilt units, the values represent the additional values written into the property account.

<sup>12</sup>Railroad equipment shipped by shops of operating railroads.

<sup>13</sup>The 1972 data for other hopper cars (both covered and uncovered), refrigerator cars, cabooses, and "Other cars, including railroad equipment, street, subway, rapid transit, interurban cars, trolley buses and self-propelled cars" are included with the figure for "Rebuilt freight train cars" (code 37433 51).

<sup>14</sup>The 1967 data for covered hopper cars, refrigerator cars, cabooses, and rebuilt passenger train cars are included with the figure for "Other cars..." (code 37433 13).

<sup>15</sup>Establishments producing self-propelled golf carts were included in this industry in 1967 but, for 1972, they are classified in industry 3799.

<sup>16</sup>In 1967, this product was defined as "25 feet to 29 feet 11 inches in length."

<sup>17</sup>These values also include mobile homes not specified by kind.

<sup>18</sup>Self-propelled golf carts were classified in industry 3751 in 1967.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9  
BB.....\$2.0 to \$4.9

CC.....\$5.0 to \$9.9  
EE.....\$10.0 to \$19.9

FF.....\$20.0 to \$49.9  
GG.....\$50.0 and over

(NA) Not available.

<sup>1</sup>Data were not published for this State, Division, or Region in 1967.

<sup>2</sup>The individual product codes included in this class of product for 1972 differ significantly from the prior years. Products shifting into or out of this class of product represent more than 15 percent of the total shipments at the U.S. level.

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

<sup>2</sup>Golf carts, self-propelled, were included in industry 3751 in 1967 and prior years.

<sup>3</sup>Industry 3792 products are equivalent to the sum of 1967 products 37910 31 through 37910 47.

<sup>4</sup>Product class 37921 products are equivalent to the sum of 1967 products 37910 31 through 37910 35.

<sup>5</sup>Product class 37922 products are equivalent to the sum of 1967 products 37910 43 through 37910 47.

<sup>6</sup>Includes n.s.k. for industry 2451.

<sup>7</sup>This product class is equivalent to 1967 product code 37992 93.

<sup>8</sup>The individual product codes included in this class of product for 1972 differ significantly from prior years. Products shifting into or out of this class of product represent more than 15 percent of the total shipments value at the U.S. level.

<sup>9</sup>The value of transportation equipment, not specified by kind (n.s.k.), is not strictly comparable for 1972 and 1967.

(X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

<sup>1</sup>Includes cost for materials indicated by the symbol (D).<sup>2</sup>Excludes quantities produced and consumed in the same establishment.<sup>3</sup>This item represents the total cost of materials for establishments that did not report detailed materials data. Also includes estimates for companies that were not mailed report forms.<sup>4</sup>Data for material code 335301 are combined with code 335008 to avoid disclosing operations of individual companies.

Note: In 1967, data for manufactured mixed gas, blast furnace gas, and coke oven gas were included in code 131300, natural gas. In 1971, data for these gases were included in code 960011, other fuels.

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.  
(S) Withheld because the estimates did not meet publication standards. (Z) Less than half of the unit of measurement shown.

---

## MAJOR GROUP 38

### Instruments and Related Products

- 38A Engineering, measuring and controlling and optical instruments
- 38B Medical instruments; ophthalmic goods; photographic equipment; clocks, watches, and watchcases

This major group includes establishments engaged in manufacturing instruments (including professional and scientific) for measuring, testing, analyzing, and controlling, and their associated sensors and accessories; optical instruments and lenses; surveying and drafting instruments; surgical, medical, and dental instruments, equipment, and supplies; ophthalmic goods; photographic equipment and supplies; and watches and clocks.

(X) Not applicable. (NA) Not available.

<sup>1</sup>The figures for 1939 through 1972 include data for employees of manufacturing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.<sup>2</sup>For the period 1954 to 1972, figures represent adjusted value added by manufacture and for earlier years, unadjusted value added. Adjusted value added is equal to value of shipments (including resales of finished products) less cost of finished products, materials, supplies, fuel, electric energy, and contract work, plus the net change in the value of finished products and work-in-process inventories between the beginning and end of the year, without adjustment for price changes. Unadjusted value added is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work in process during the year. For 1921 to 1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture. See "Value Added by Manufacture" in Introduction.<sup>3</sup>The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.<sup>4</sup>The figures for 1958 to 1972 include expenditures for plants under construction and not yet in operation.<sup>5</sup>Data for 1972 are not directly comparable to 1971 and earlier years. See appendix C of the General Summary for the 1972 changes in the Standard Industrial Classification.<sup>6</sup>The figures for 1947 and later years include establishments primarily engaged in the manufacture of automatic temperature controls.<sup>7</sup>In addition to data for operating establishments, figures for employment and payroll for manufacturing central administrative offices and auxiliary units are shown for the years 1949 to 1953 in the annual survey of manufacturing volumes. Data for these units are not available for the years 1955 to 1957, 1959 to 1962, 1964 to 1966, 1968 to 1971, or prior to 1949.<sup>8</sup>Figures for 1958 to 1972 for operating manufacturing establishments are not strictly comparable with prior years due to revisions of the Standard Industrial Classification system. Prior to 1958, data for the following commodities were excluded: Laboratory precision balances; laboratory furniture; revolution counters; operating room and other hospital furniture; surgical corsets; and hearing aids. Establishments primarily engaged in the manufacture of sanitary napkins and tampons are included prior to 1958.

Footnotes continued on next page.

TABLE 1. General Statistics: 1972 and Earlier Years—Continued

(Footnotes for table 1)--Continued

<sup>11</sup>The figures for 1899 to 1935 exclude, whereas those for later years include, data for establishments primarily engaged in the manufacture of certain mechanical measuring instruments. Value added by manufacture for 1937, excluding data for these establishments and on a basis comparable with 1935, was \$294.5 million.

<sup>12</sup>The figures for 1899 to 1933 exclude, whereas those for later years include, data for establishments primarily engaged in manufacture of certain dental equipment and supplies (chairs, cabinets, and electrical devices).

<sup>13</sup>The figures for 1899 to 1927 include, whereas those for later years exclude, data for establishments primarily engaged in manufacture of gas machines. Value added by manufacture for 1929, including data for these establishments and on a basis comparable with 1927, was \$306.3 million.

<sup>14</sup>The figures for 1899 to 1925 include, whereas those for later years exclude, data for dental laboratories operating on a custom basis. Value added by manufacture for 1927, including data for these laboratories and on a basis comparable with 1925, was \$280.3 million.

<sup>15</sup>The figures for 1899 to 1923 include, whereas those for later years exclude, data for establishments primarily engaged in grinding lenses for spectacles and eyeglasses to individual prescription.

<sup>16</sup>The figures for 1899 to 1909 exclude, whereas those for 1914 and later years include, data for establishments primarily engaged in manufacture of motion picture machines. Value added by manufacture for 1914, excluding data for such establishments, was \$96.4 million.

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

<sup>1</sup>General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

<sup>2</sup>The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

# EXPLANATORY TEXT

## ENGINEERING, MEASURING AND CONTROLLING AND OPTICAL INSTRUMENTS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3811—Engineering, Laboratory, Scientific, and Research Instruments and Associated Equipment\***
- 3822—Automatic Controls for Regulating Residential and Commercial Environments and Appliances\***
- 3823—Industrial Instruments for Measurement, Display, and Control of Process Variables; and Related Products\***
- 3824—Totalizing Fluid Meters and Counting Devices\***
- 3825—Instruments for Measuring and Testing of Electricity and Electrical Signals\***
- 3829—Measuring and Controlling Devices, N.E.C.**
- 3832—Optical Instruments and Lenses**

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### INDUSTRY 3811.—ENGINEERING AND SCIENTIFIC INSTRUMENTS (Short Title)

This industry comprises establishments primarily engaged in manufacturing laboratory, scientific, and engineering instruments such as nautical, navigational, aeronautical, surveying, and drafting; and instruments for laboratory work and scientific research (except optical instruments, in industry 3832).

---

\* Note that the "short title" for this industry is used throughout the report.

Establishments primarily engaged in manufacturing surgical and medical instruments are classified in industry 3841; dental instruments and equipment in industry 3843; measuring, analyzing, and controlling instruments, including instruments for measuring electrical quantities and characteristics, in SIC group 382; watches and clocks in industry 3873; machinists' precision measuring tools in industry 3545; and measuring and dispensing pumps in industry 3586. For a detailed list of products of industry 3811, refer to table 6A, product codes 38111 01 to 38113 89.

The statistics for this industry, as classified under the 1972 edition of the SIC manual, were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Engineering and Scientific Instruments Industry in 1972 totaled \$1,042 million. This included shipments of engineering and scientific instruments (primary products) valued at \$800 million, shipments of other products (secondary products) valued at \$129 million, and miscellaneous receipts (mainly resales) of \$113 million.

Shipments of engineering and scientific instruments (primary products) in 1972 represented 86 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 88 percent.

Shipments of engineering and scientific instruments (primary products) from establishments classified in industry 3811 in 1972 represented 72 percent (coverage ratio) of these products valued at \$1,106 million shipped by all industries. In 1967, the coverage ratio was 74 percent. Other industries shipping engineering and scientific instruments consisted mainly of industry 3662, Radio and TV Communication Equipment, (\$100 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3811, these establishments accounted for 7 percent of value of shipments.

### INDUSTRY 3822.—ENVIRONMENTAL CONTROLS (Short Title)

This industry comprises establishments primarily engaged in manufacturing temperature and related controls for heating

and air-conditioning installations and refrigeration applications, which are electrically, electronically, or pneumatically actuated, and which measure and control variables such as temperature and humidity; and automatic regulators used as components of household appliances.

Establishments primarily engaged in manufacturing industrial process controls are classified in industry 3823; motor control switches in industry 3622 (Industrial Controls); switches for household appliances in industry 3643 (Current-Carrying Wiring Devices); and appliance timers in industry 3873 (Watches, Clocks, and Watchcases).

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Environmental Controls Industry in 1972 totaled \$728 million. This included shipments of automatic temperature controls (primary products) valued at \$591 million, shipments of other products (secondary products) valued at \$99 million, and miscellaneous receipts (mainly resales) of \$38 million.

Shipments of automatic temperature controls (primary products) in 1972 represented 86 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 81 percent.

Shipments of automatic temperature controls (primary products) from establishments classified in industry 3822 in 1972 represented 90 percent (coverage ratio) of these products valued at \$658 million shipped by all industries. In 1967, the coverage ratio was 91 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3822, these establishments accounted for 1 percent of value of shipments.

#### **INDUSTRY 3823.—PROCESS CONTROL INSTRUMENTS (Short Title)**

This industry comprises establishments primarily engaged in manufacturing industrial instruments and related products for measuring, displaying (indicating and/or recording), transmitting, and controlling process variables in manufacturing, energy conversion, and public service utilities. These instruments operate mechanically, pneumatically, electronically, or electrically to measure process variables such as temperature, humidity, pressure, vacuum, combustion, flow, level, viscosity, density, acidity, alkalinity, specific gravity, gas and liquid

concentration, sequence, time interval, mechanical motion, and rotation.

Establishments primarily engaged in manufacturing electrical integrating meters are classified in industry 3825; residential and commercial comfort controls in industry 3822; all liquid-in-glass and bimetal thermometers and glass hydrometers in industry 3829; recorder charts in SIC group 275; and optical instruments in industry 3832.

The classification system followed in the 1967 census was split, as a result of the 1972 edition of the SIC manual, into three separate industries: Industry 3823, Process Control Instruments; industry 3824, Fluid Meters and Counting Devices; and industry 3829, Measuring and Controlling Devices, N.E.C., from old (1967) SIC industry 3821 (Mechanical Measuring Devices).

Value of shipments and other receipts of the Process Control Instruments Industry in 1972 totaled \$907 million. This included shipments of process control instruments (primary products) valued at \$657 million, shipments of other products (secondary products) valued at \$130 million, and miscellaneous receipts (mainly receipts for installation) of \$120 million.

Shipments of process control instruments (primary products) in 1972 represented 83 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of measuring and controlling devices (\$20 million).

Shipments of process control instruments (primary products) from establishments classified in industry 3823 in 1972 represented 83 percent (coverage ratio) of these products valued at \$795 million shipped by all industries.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3823, these establishments accounted for less than 1 percent of value of shipments.

#### **INDUSTRY 3824.—FLUID METERS AND COUNTING DEVICES (Short Title)**

This industry comprises establishments primarily engaged in manufacturing totalizing (registering) meters monitoring fluid flows, such as watermeters and gasmeters; and producers of mechanical and electromechanical counters and associated metering devices.

Establishments primarily engaged in manufacturing electricity integrating meters and electronic frequency counters are

classified in industry 3825; and industrial process instruments in industry 3823. For a detailed list of products of industry 3824, refer to table 6A, product codes 38242 22 to 38244 98.

The Fluid Meters and Counting Devices Industry is included for the first time in the census of manufactures for 1972. In 1967, this was part of industry 3821 (Mechanical Measuring Devices). No comparable figures are available for 1967. For detailed data on products of industry 3824, refer to table 6A.

Value of shipments and other receipts of the Fluid Meters and Counting Devices Industry in 1972 totaled \$298 million. This included shipments of fluid meters and counting devices (primary products) valued at \$259 million, shipments of other products (secondary products) valued at \$30 million, and miscellaneous receipts (mainly resales) of \$9 million.

Shipments of fluid meters and counting devices (primary products) in 1972 represented 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Shipments of fluid meters and counting devices (primary products) from establishments classified in industry 3824 in 1972 represented 79 percent (coverage ratio) of these products valued at \$327 million shipped by all industries.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3824, these establishments accounted for 3 percent of value of shipments.

#### **INDUSTRY 3825.—INSTRUMENTS TO MEASURE ELECTRICITY (Short Title)**

This industry comprises establishments primarily engaged in manufacturing instruments for measuring the characteristics of electricity and electric signals, such as voltmeters, ammeters, wattmeters, watt-hour meters, demand meters, and equipment for testing the electrical characteristics of electrical, radio, and communication circuits, and of internal combustion engines.

Establishments primarily engaged in the manufacturing of electronic checkout, monitoring, evaluating, and other electronic support equipment for electronic navigational, radar, sonar, and other communication systems are classified in industry 3662 (Radio and TV Communication Equipment). For a detailed list of products of industry 3825, refer to table 6A, product codes 38251 10 to 38253 76.

The code number for this industry was changed in the 1972 revision of the SIC manual from the previous classification

system. Also, the content of the industry has been slightly changed. Instrument and relay transformers are now classified in industry 3612.

Value of shipments and other receipts of the Instruments to Measure Electricity Industry in 1972 totaled \$1,494 million. This included shipments of instruments to measure electricity (primary products) valued at \$1,166 million, shipments of other products (secondary products) valued at \$249 million, and miscellaneous receipts (mainly resales) of \$79 million.

Shipments of instruments to measure electricity (primary products) in 1972 represented 82 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 84 percent. Secondary products shipped by this industry in 1972 consisted mainly of electronic components, n.e.c., (\$53 million).

Shipments of instruments to measure electricity (primary products) from establishments classified in industry 3825 in 1972 represented 88 percent (coverage ratio) of these products valued at \$1,330 million shipped by all industries. In 1967, the coverage ratio was 79 percent. Other industries shipping instruments to measure electricity consisted mainly of industry 3662, Radio and TV Communication Equipment, (\$62 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3825, these establishments accounted for 5 percent of value of shipments.

#### **INDUSTRY 3829.—MEASURING AND CONTROLLING DEVICES, N.E.C.**

This industry comprises establishments primarily engaged in manufacturing measuring and controlling devices, not elsewhere classified, including testing instruments to determine the physical properties of materials, nuclear instruments, aircraft engine instruments, and liquid-in-glass and bimetal thermometers. For a detailed list of products of industry 3829, refer to table 6A, product codes 38291 45 to 38294 39.

The Measuring and Controlling Devices, N.E.C., Industry is included for the first time in the census of manufactures for 1972. In 1967, this industry was part of industry 3821, Mechanical Measuring Devices. No comparable figures are available for 1967. For detailed data on products of industry 3829, Measuring and Controlling Devices, N.E.C., refer to table 6A.

Value of shipments and other receipts of the Measuring and Controlling Devices, N.E.C., Industry in 1972 totaled \$578 million. This included shipments of measuring and controlling devices (primary products) valued at \$451 million, shipments of other products (secondary products) valued at \$78 million, and miscellaneous receipts (mainly resales) of \$49 million.

Shipments of measuring and controlling devices (primary products) in 1972 represented 85 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of radio and TV communication equipment (\$14 million).

Shipments of measuring and controlling devices (primary products) from establishments classified in industry 3829 in 1972 represented 77 percent (coverage ratio) of these products valued at \$586 million shipped by all industries.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3829, these establishments accounted for 10 percent of value of shipments.

#### INDUSTRY 3832.—OPTICAL INSTRUMENTS AND LENSES

This industry comprises establishments primarily engaged in manufacturing instruments that measure an optical property; apparatus, except photographic, that projects or magnifies, such as binoculars, prisms, and lenses; optical sighting and fire-control equipment; and related analytical instruments.

Establishments primarily engaged in manufacturing eyeglass lenses, frames, or fittings are classified in industry 3851 (Ophthalmic Goods); laboratory testing and scientific instruments are classified in industry 3811; and electronic tracking and fire-control systems in industry 3662 (Radio and TV

Communication Equipment). For a detailed list of products of industry 3832, refer to table 6A, product codes 38321 01 to 38323 - -.

The code number for this industry was changed in the 1972 revision of the SIC manual from the previous classification system. Also, the content of the industry has been changed. Industry 3832 as classified in the 1972 edition of the SIC manual consists of industries 1941 (Sighting and Fire Control Equipment) and 3831 (Optical Instruments and Lenses) under the 1967 SIC.

Value of shipments and other receipts of the Optical Instruments and Lenses Industry in 1972 totaled \$531 million. This included shipments of optical instruments and lenses (primary products) valued at \$464 million, shipments of other products (secondary products) valued at \$41 million, and miscellaneous receipts (mainly resales) of \$26 million.

Shipments of optical instruments and lenses (primary products) in 1972 represented 92 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 87 percent. Secondary products shipped by this industry in 1972 consisted mainly of engineering and scientific instruments (\$12 million).

Shipments of optical instruments and lenses (primary products) from establishments classified in industry 3832 in 1972 represented 79 percent (coverage ratio) of these products valued at \$585 million shipped by all industries. In 1967, the coverage ratio was 74 percent. Other industries shipping optical instruments and lenses consisted mainly of industry 3662, Radio and TV Communication Equipment, (\$36 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3832, these establishments accounted for 9 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Year <sup>1</sup>	Establishments		All employees		Production workers			Value added by manufacture	Cost of materials, fuels, etc.	Value of industry shipments	Capital expenditures, new	Gross value of fixed assets	End-of-year inventories	Specialization ratio	Coverage ratio

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3811	Industry 3822	Industry 3823	Industry 3824	Industry 3825	Industry 3829	Industry 3832
1972.....	703	117	175	51	606	579	467
1967.....	642	88	(NA)	(NA)	502	(NA)	301
1963.....	571	89	(NA)	(NA)	536	(NA)	285

(NA) Not available. \*These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

<sup>1</sup>For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

<sup>2</sup>Comparable data prior to 1972 are not available.

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows date for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the date in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC				
	Establishments		All employees	Value added by manufacture	Value of shipments	Establishments		All employees	Value added by manufacture	Value of shipments
	Total	With 20 employees or more				Total	With 20 employees or more			
	(number)	(number)				(1,000)	(million dollars)			
New industry 3823.--Process Control Instruments.....	192	133	38.8	632.2	906.9	(X)	(X)	(X)	(X)	(X)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent  
E2--20 to 29 percent

E3--30 to 39 percent  
E4--40 to 49 percent

E5--50 to 59 percent  
E6--60 to 69 percent

E7--70 to 79 percent  
E8--80 to 89 percent

E9--90 to 99 percent  
E0--100 percent

- Represents zero. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees

BB--250 to 499 employees

CC--500 to 999 employees

EE--1,000 to 2,499 employees

FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent      E3--30 to 39 percent      E5--50 to 59 percent      E7--70 to 79 percent      E9--90 to 99 percent  
E2--20 to 29 percent      E4--40 to 49 percent      E6--60 to 69 percent      E8--80 to 89 percent      E0--100 percent

- Represents zero. (D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

<sup>1</sup>Reports forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)
			Number	Payroll	Number	Man-hours	Wages

(D) Withheld to avoid disclosing figures for individual companies.

(Z) Less than half of the unit of measurement shown.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry end census year	Value of shipments					Value of primary product shipments

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972—Continued

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Engineering and scientific instruments (SIC 3811)	Environmental controls (SIC 3822)	Process control instruments (SIC 3823)	Fluid meters and counting devices (SIC 3824)	Instruments to measure electricity (SIC 3825)	Measuring and controlling devices, n.e.c. (SIC 3829)	Optical instruments and lenses (SIC 3832)	Other industries
Shipments and miscellaneous receipts--Continued										
3829	Measuring and controlling devices, n.e.c.....	585.9	15.5	(under 2)	19.5	(under 2)	16.2	450.5	10.1	71.1
38291	Aircraft engine instruments, except electric....	74.5	3.9	(under 2)	(over 2)	-	(2-5)	50.5	-	(over 2)
38292	Physical properties testing and inspection equipment.....	106.3	2.4	-	1.5	(under 2)	5.2	82.6	(under 2)	(over 2)
38293	Commercial meteorological, and general purpose instruments.....	94.5	3.9	-	(over 2)	-	(over 2)	71.2	-	14.0
38294	Nuclear radiation, detection, and monitoring instruments.....	198.2	(over 2)	(under 2)	12.9	-	(over 2)	155.3	(over 2)	11.4
38290	Measuring and controlling devices, n.e.c., n.s.k.	112.4	(under 2)	-	(under 2)	(under 2)	(under 2)	90.9	(2-5)	(over 2)
3832	Optical instruments and lenses.....	584.7	5.2	-	(under 2)	-	(2-5)	7.8	464.4	103.3
38321	Optical instruments and lenses, except sighting and fire control equipment.....	444.4	(over 2)	-	(under 2)	-	(under 2)	(over 2)	368.7	65.0
38322	Sighting and fire control equipment made from manufactured lenses, etc.....	51.1	(under 2)	-	-	-	(over 2)	(2-5)	29.3	(over 2)
38323	Sighting and fire control equipment made from purchased lenses.....	32.0	(under 2)	-	-	-	-	-	10.3	(over 2)
38320	Optical instruments and lenses, n.s.k.....	57.2	(under 2)	-	-	-	-	-	56.1	(under 2)
Other product shipments by 4-digit product group:										
2522	Metal office furniture.....	(X)	(2-5)	-	-	-	-	-	-	(X)

TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

(Includes quantity and value of the products reported not only by establishments classified in this industry, but also by establishments classified in other industries, and shipping these products as "secondary" products. See appendix, Explanation of Terms "Value of shipments")

1972 product code	Product	Unit of measure	Total product shipments including interplant transfers			
			1972		1967	
			Quantity	Value (million dollars)	Quantity	Value (million dollars)
3822- --	AUTOMATIC ENVIRONMENTAL CONTROLS, TOTAL.....		(X)	658.1	(X)	523.6
38220 --	Automatic Temperature Controls for Monitoring Residential and Commercial Environments and Appliance Regulating Controls: <sup>1</sup>					
	As reported in the census of manufactures.....		(X)	658.1	(X)	523.6
	As reported in Current Industrial Reports, series MA-38B.....	1,000 units...	(NA)	645.6	(NA)	522.2
	Automatic temperature controls of the type principally used as components of air conditioning, refrigeration, and comfort heating (including pneumatic controls):					
38220 20	Temperature responsive (thermostats).....	...do.....	(NA)	287.6		
38220 25	Pressure responsive (pressurstats).....	...do.....	(NA)	55.5		
38220 30	Hydronic responsive.....	...do.....				
38220 35	Humidity responsive (humidistats).....	...do.....				
38220 40	Light responsive.....	...do.....				
38220 45	Electrostatic responsive.....	...do.....	(NA)	10.8		
38220 50	Liquid level.....	...do.....				
38220 55	Defrost controls (except appliance regulators).....	...do.....				
38220 60	Igniters.....	...do.....			(NA)	522.2
38220 65	Inherent motor protectors.....	...do.....				
38220 70	Other.....	...do.....	(NA)	92.1		
	Controls for major appliances such as domestic laundry and cooking appliances, refrigerators and freezers, vending machines, and air conditioners:					
38220 75	Temperature responsive.....	...do.....	(NA)	156.1		
38220 80	All other controls for appliances.....	...do.....	(NA)	43.6		
	Product		Total product shipments including interplant transfers			
			Quantity	Value		
			(1,000 units)	(million dollars)		
			1972			
3823- --	PROCESS CONTROL INSTRUMENTS					
38230 --	Industrial Instruments for Measurement, Display and Control of Process Variables: <sup>1</sup>					
	As reported in census of manufactures.....		(X)	794.7		
	As reported in Current Industrial Reports, series MA-38B <sup>1</sup> .....		(X)	729.5		
	Electrical and electronic types (a.c. or d.c. milliampere or millivolt or telemetering signals):					
38230 35	Controllers (recording, indicating, or blind).....			21.4	16.1	
38230 36	Recorders, with or without self-contained set-point stations.....			18.6	12.5	
38230 37	Indicators, with or without self-contained set-point stations.....			15.0	5.5	
38230 38	Auxiliary stations and analog computing devices associated with the above (include manual loaders, auto-to-manual stations, radio stations, adders, multipliers, integrators, etc.).....			30.2	9.5	
	Pneumatic types (3 to 15 and 3 to 27 p.s.i. standardized signals):					
38230 39	Controllers (recording, indicating, or blind).....			24.3	11.0	
38230 40	Recorders, with or without self-contained set-point stations.....			14.8	8.2	
38230 41	Indicators, with or without self-contained set-point stations.....			6.3	2.8	
38230 42	Auxiliary stations and analog computing devices associated with the above (include manual loaders, auto-to-manual stations, radio stations, adders, multipliers, integrators, etc.).....			14.9	6.6	
38230 43	Receiver-type gauges, analog and digital.....					
38230 44	Annunciators (industrial), electro-mechanical and solid-state types.....			(NA)	5.8	
	Temperature instruments, exclude receiver-type instruments:					
	Electrical and electronic measuring types (thermocouple, resistance temperature detector, radiation, optical, thermistor, and other electrical sensors):					
38230 45	Direct-deflecting types (controllers for all types of electrical temperature sensors).....		(NA)	5.7		
38230 46	Direct-deflecting types (indicators and recorders for all types of electrical temperature sensors)..		9.0	1.5		
38230 47	Self-balancing types (electric or pneumatic controllers for all types of electrical temperatures sensors).....		(NA)	14.3		
38230 48	Self-balancing types (indicators, recorders and integrators for all types of electrical temperature sensors).....		10.0	9.8		
38230 49	Potentiometric setpoint electronic controllers for all types of electrical temperature sensors..		(NA)	10.1		
38230 50	Digital types for all types of electrical temperature sensors.....		2.3	2.3		
38230 51	Transmitters, producing standardized electric or pneumatic analog transmission signals for all types of electrical temperature sensors.....		7.8	2.9		
	Mechanical measuring types:					
	Filled system (liquid filled, vapor pressure, gas filled, and mercury filled types):					
38230 52	Indicating or recording controllers.....		119.6	13.9		
38230 53	Recorders, non-control.....		10.7	2.9		
38230 56	Indicators only (exclude indoor-outdoor and other household or appliance type thermometers)..		(X)	20.8		
38230 57	Transmitters producing standardized electric or pneumatic analog transmission signals.....		(X)	2.7		

See footnotes at end of table.

TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

	Standards and calibration equipment for test measuring equipment, including laboratory types:			
38252 72	Electronic.....		(X)	7.4
38252 74	Electrical.....		(X)	5.2
38252 52	Microwave test equipment, n.e.c. (890 megacycles and above)....		(X)	21.8
38252 39	Analyzers for testing characteristics of internal- combustion engines.....		(X)	92.

See footnotes at end of table.

TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

(Includes quantity and value of the products reported not only by establishments classified in this industry, but also by establishments classified in other industries, and shipping these products as "secondary" products. See appendix, Explanation of Terms "Value of shipments")

1972 product code	Product	Unit of measure	Total product shipments including interplant transfers	
			Quantity	Value  (million dollars)
1972				
3825- --	INSTRUMENTS TO MEASURE ELECTRICITY—Continued			
38252 --	Test Equipment for Testing Electrical, Radio, and Communication Circuits, and Motors—Continued			
	As reported in Current Industrial Reports, series MA-38B—Con.			
38252 82	Associated devices for electronic and electrical test and measuring equipment (report electronic component parts (attenuators, connectors, delay lines, filters, headsets, instrument transducers, microphones, etc.) and amplifiers, power supplies, and other electronic subassemblies on Form MA-36N, Selected Electronic and Associated Products).....		(X)	18.0
38252 98	Other test measuring and analyzing equipment for electronic and electrical circuits and equipment.....		(X)	145.1
38253 --	Other Electrical Measuring Instruments, Excluding Instrument Transformers: <sup>1</sup>			
	As reported in census of manufactures.....		(X)	223.4
	As reported in Current Industrial Reports, series MA-38B.....		(X)	200.5
38253 08	Digital panel meters (DPM) between 0.05% and 1% +1-digit accu- racy (excluding precision DVM's and electronic counters).....	Million units.....	(NA)	3.7
	Panel types other than ruggedized or sealed (generally of 2 percent accuracy):			
38253 12	A.c. (including moving iron vane and dynamometer types)....	...do.....	(NA)	6.6
38253 13	D.c. (including rectifier and self-contained thermocouple types).....	...do.....	2,831.8	29.0
38253 11	Panel types ruggedized or sealed (generally of 2 percent accuracy).....	...do.....	(NA)	7.2
	Panel types with control or signal initiating means (including instrument relays):			
38253 16	Indicating.....	...do.....	145.8	4.9
38253 17	Nonindicating.....	...do.....		
38253 19	All other panel type instruments, including ammeters and voltmeters for motor vehicles.....	...do.....	(NA)	11.8
	Switchboard instruments which are generally of 1 percent accuracy:			
38253 23	A.c. (including moving iron vane and dynamometer types).....	...do.....	(NA)	10.1
38253 25	D.c. (including rectifier and thermocouple types).....	...do.....		
38253 27	Elapsed time meters (with and without reset).....	...do.....	(NA)	5.9
	Portable instruments which are generally capable of accuracies within plus or minus 2 percent full scale indication, and can be enclosed in a case so that they can be moved and used at various locations, and which are an end product:			
38253 29	Portable types (accuracy rating 0.11 percent thru 0.50 percent).....	...do.....	(NA)	5.1
38253 30	Portable types (accuracy rating 0.51 percent thru 2 percent).	...do.....		
38253 35	Laboratory portable instruments with accuracies within plus or minus 1 percent up to 1/10 percent of full scale and better (all case sizes).....	...do.....	(NA)	3.0
38253 37	Volt-ohm millimeter (VOM), accuracy 0.10 percent thru 5 percent.....	...do.....		
38253 45	Other electrical indicating instruments (except self-balancing types).....		(NA)	6.1
	Electrical recording instruments (portable and for panel mounting) (do not include potentiometer and bridge self-balancing types which are to be reported elsewhere on this form):			
38253 50	Direct deflecting (direct acting), except temperature calibrated instruments (exclude oscillographic types which are to be reported under 38253 63 and 38253 65).....	Million units.....	35.4	10.1
	Oscillographic recorders			
38253 63	Pen or stylus type.....	...do.....	11.1	27.2
38253 65	Light beam type.....	...do.....	4.5	16.0
38253 72	Other electrical recording instruments.....		(X)	40.8
	Parts and accessories for indicating and recording instruments:			
38253 74	Transducers for volts, amperes, watts, vars, frequency, temperature and power factor.....		(X)	5.9
38253 75	Tachometer generators, except aerospace types.....		(X)	1.4
38253 76	Other, including instrument shunts.....		(X)	5.6
38250 00	Instruments to measure electricity, n.e.c., for establishments with 10 employees or more. (See note.).....		(X)	49.9
38250 02	Instruments to measure electricity, n.e.c., for establishments with less than 10 employees. (See note.).....		(X)	17.9

See footnotes at end of table.

38321 37	Optical components, including lenses (except ophthalmic and photographic), mirror, filters, gratings, coatings, movements, reflectors, reticles, prisms, monochrometers, light amplifiers, Kerr cells, etc. <sup>10</sup> .....	53.4	38321 98*	Lenses, components, and parts.....	39.1
38321 39	Other optical instruments, excluding analytical instruments listed above and sighting and fire control equipment.....	102.0	38322 --	Sighting and Fire Control Equipment Made From Lenses, Prisms, Etc., Produced at Same Establishment: <sup>1</sup>	
				As reported in census of manufactures.....	69.5
38322 --	Sighting and Fire Control Equipment Made From Lenses, Prisms, Etc., Produced at the Same Establishment: <sup>1</sup>			As reported on Census Annual Form MA-38B (product code 38322 62).....	66.7
	As reported in census of manufactures.....	51.1	38323 --	Sighting and fire control equipment: <sup>1</sup>	
	As reported in Current Industrial Reports, series MA-38B (product code 38322 62).....	47.6		As reported in census of manufactures.....	107.2
38323 --	Sighting and Fire Control Equipment Made From Purchased Lenses: <sup>1</sup>			As reported on Census Annual Form MA-38B (product code 38323 62).....	106.8
	As reported in census of Manufactures.....	32.0	38320 00	Optical instruments and lenses, n.s.k., represents establishments with 10 employees or more in 1967. (See note.).....	23.7
	As reported in Current Industrial Reports, series MA-38B (product code 38323 62).....	30.9	38320 02	Optical instruments and lenses, n.s.k., represents establishments with less than 10 employees in 1967. (See note.).....	4.8
38320 00	Optical instruments and lenses, n.s.k., for establishments with 10 employees or more. (See note.)...	40.6			
38320 02	Optical instruments and lenses, n.s.k., for establishments with less than 10 employees. (See note.)...	16.6			

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. \*Not directly comparable to 1972 products.

Footnotes continued on next page.

TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

(Footnotes for table 6A--Continued)

<sup>1</sup>The data for 1972 and 1967 present totals as collected in the census of manufactures as well as comparable totals from Current Industrial Reports series. The product detail as shown are those collected on the CIR form specified.

<sup>2</sup>Data on only selected items in this product class are collected in the current industrial report while the census of manufactures collects data on the aggregate of all the products.

<sup>3</sup>The major difference between these two figures concerns the method of reporting parts and components for aircraft, flight, nautical and navigational instruments, and automatic pilots. Whereas many respondents included such items under the broad heading in the census, parts were not covered in the MA-38B survey in 1967.

<sup>4</sup>Included with 38111 20 to avoid disclosing figures for individual companies.

<sup>5</sup>Included with 38111 98 to avoid disclosing figures for individual companies.

<sup>6</sup>For 1967, product codes 38251 12, 13, 14, and 41 are combined with 38251 51 to avoid disclosing figures for individual companies.

<sup>7</sup>For 1967, product code 38252 92 is combined with code 38252 98. The value for product code 38252 92 is less than 100 thousand.

<sup>8</sup>The product class structure for this industry was revised effective in 1972.

<sup>9</sup>Product codes 38294 17, 19, and 24 were combined with product code 38294 27 for 1967.

<sup>10</sup>The related census total probably includes photographic lenses.

<sup>11</sup>Included with product code 38321 80 to avoid disclosing figures for individual companies.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)		Product class and geographic area	Value of shipments (million dollars)

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9      CC.....\$5.0 to \$9.9      FF.....\$20.0 to \$49.9  
BB.....\$2.0 to \$4.9      EE.....\$10.0 to \$19.9      GG.....\$50.0 and over

(NA) Not available.

<sup>1</sup>Data for 1967 are not shown.

<sup>2</sup>The individual product codes included in this class of products for 1972 differ significantly from the prior years. Products shifting into or out of this class of products represent more than 15 percent of the total shipments value at the U.S. level.

<sup>3</sup>The individual product codes included in this class of products for 1972 differ from the 1967 definition. Products shifting into or out of this class of products represent approximately 9 percent of the total 1967 shipments at the U.S. level.

(NA) Not available. (S) Withheld because the data did not meet publication standards.

<sup>1</sup>These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

<sup>2</sup>The individual product codes included in this class of products for 1972 differ significantly from the prior years. Products shifting into or out of this class of products represent more than 15 percent of the total shipments value at the U.S. level.

<sup>3</sup>The individual product codes included in this class of products for 1972 differ from the 1967 definition. Products shifting into or out of this class of products represent approximately 9 percent of the total 1967 shipments at the U.S. level.

# EXPLANATORY TEXT

## MEDICAL INSTRUMENTS; OPHTHALMIC GOODS; PHOTOGRAPHIC EQUIPMENT; CLOCKS, WATCHES, AND WATCHCASES

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3841—Surgical and Medical Instruments and Apparatus\*
- 3842—Orthopedic, Prosthetic, and Surgical Appliances and Supplies\*
- 3843—Dental Equipment and Supplies
- 3851—Ophthalmic Goods
- 3861—Photographic Equipment and Supplies
- 3873—Watches, Clocks, Clockwork Operated Devices, and Parts\*

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### INDUSTRY 3841.—SURGICAL AND MEDICAL INSTRUMENTS (Short Title)

This industry comprises establishments primarily engaged in manufacturing medical, surgical, ophthalmic, and veterinary instruments and apparatus.

Establishments primarily engaged in manufacturing surgical and orthopedic appliances are classified in industry 3842, and

electrotherapeutic, electromedical, and X-ray apparatus in industry 3693.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Surgical and Medical Instruments Industry in 1972 totaled \$962 million. This included shipments of surgical and medical instruments (primary products) valued at \$803 million, shipments of other products (secondary products) valued at \$85 million, and miscellaneous receipts (mainly products bought and resold) of \$74 million.

Shipments of surgical and medical instruments (primary products) in 1972 represented 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 91 percent.

Shipments of surgical and medical instruments (primary products) from establishments classified in industry 3841 in 1972 represented 82 percent (coverage ratio) of these products valued at \$984 million shipped by all industries. In 1967, the coverage ratio was 69 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3841, these establishments accounted for 3 percent of value of shipments.

### INDUSTRY 3842.—SURGICAL APPLIANCES AND SUPPLIES (Short Title)

This industry comprises establishments primarily engaged in manufacturing orthopedic, prosthetic, and surgical appliances and supplies; arch supports and other foot appliances; fracture appliances, elastic hosiery, abdominal supporters, braces, and trusses; bandages; surgical gauze and dressings; sutures; adhesive tapes and medicated plasters; and personal safety appliances and equipment.

Establishments primarily engaged in manufacturing surgical and medical instruments are classified in industry 3841.

---

\* Note that the "short title" for this industry is used throughout the report.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Surgical Appliances and Supplies Industry in 1972 totaled \$1,456 million. This included shipments of surgical appliances and supplies (primary products) valued at \$1,028 million, shipments of other products (secondary products) valued at \$266 million, and miscellaneous receipts (mainly products bought and resold) of \$162 million.

Shipments of surgical appliances and supplies (primary products) in 1972 represented 79 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 80 percent.

Shipments of surgical appliances and supplies (primary products) from establishments classified in industry 3842 in 1972 represented 90 percent (coverage ratio) of these products valued at \$1,142 million shipped by all industries. In 1967, the coverage ratio was 86 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3842, these establishments accounted for 5 percent of value of shipments.

#### INDUSTRY 3843.—DENTAL EQUIPMENT AND SUPPLIES

This industry comprises establishments primarily engaged in manufacturing artificial teeth, dental metals, alloys and amalgams, and a wide variety of equipment, instruments, and supplies used by dentists, dental laboratories, and dental colleges.

Dental laboratories constructing artificial dentures, bridges, inlays, and other dental restorations on specifications from dentists are classified in industry 8072.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Dental Equipment and Supplies Industry in 1972 totaled \$409 million. This included shipments of dental equipment and supplies (primary products) valued at \$331 million, shipments of other products (secondary products) valued at \$26 million, and miscellaneous receipts (mainly products bought and resold) of \$52 million.

Shipments of dental equipment and supplies (primary products) in 1972 represented 93 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 94 percent.

Shipments of dental equipment and supplies (primary products) from establishments classified in industry 3843 in 1972 represented 94 percent (coverage ratio) of these products valued at \$352 million shipped by all industries. In 1967, the coverage ratio was also 94 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3843, these establishments accounted for 9 percent of value of shipments.

#### INDUSTRY 3851.—OPHTHALMIC GOODS

This industry comprises establishments primarily engaged in manufacturing ophthalmic frames, lenses, and sunglass lenses.

Establishments primarily engaged in manufacturing slit lamps are classified in industry 3841 and molded glass blanks in industry 3229. Establishments primarily engaged in grinding lenses and fitting glasses to prescription are classified in trade industries.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Ophthalmic Goods Industry in 1972 totaled \$568 million. This included shipments of ophthalmic goods (primary products) valued at \$465 million, shipments of other products (secondary products) valued at \$72 million, and miscellaneous receipts (mainly products bought and resold) of \$32 million.

Shipments of ophthalmic goods (primary products) in 1972 represented 88 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 88 percent.

Shipments of ophthalmic goods (primary products) from establishments classified in industry 3851 in 1972 represented 97 percent (coverage ratio) of these products valued at \$484 million shipped by all industries. In 1967, the coverage ratio was 95 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3851, these establishments accounted for 8 percent of value of shipments.

#### **INDUSTRY 3861.—PHOTOGRAPHIC EQUIPMENT AND SUPPLIES**

This industry comprises establishments primarily engaged in manufacturing photographic apparatus, equipment, parts, attachments, and accessories, such as still and motion picture cameras and projection apparatus; photocopy and microfilm equipment; blueprinting and diazotype (white printing) apparatus and equipment; other photographic equipment; sensitized film, paper, cloth, and plates; and prepared photographic chemicals for use therewith.

Establishments primarily engaged in manufacturing photographic paper stock (unsensitized), and paper mats, mounts, easels, and folders for photographic use are classified in SIC Major Group 26; photographic lenses in industry 3832; photographic glass in SIC Major Group 32; chemicals for technical purposes, not specifically prepared and packaged for use in photography, in SIC Major Group 28; and photographic flash, flood, enlarger, and projection lamps in industry 3641.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system.

Value of shipments and other receipts of the Photographic Equipment and Supplies Industry in 1972 totaled \$5,579 million. This included shipments of photographic equipment and supplies (primary products) valued at \$5,047 million, shipments of other products (secondary products) valued at \$255 million, and miscellaneous receipts (mainly products bought and resold) of \$277 million.

Shipments of photographic equipment and supplies (primary products) in 1972 represented 95 percent (specialization ratio) of the industry's total product shipments (primary and

secondary). The industry specialization ratio in 1967 was also 95 percent.

Shipments of photographic equipment and supplies (primary products) from establishments classified in industry 3861 in 1972 represented 96 percent (coverage ratio) of these products valued at \$5,255 million shipped by all industries. In 1967, the coverage ratio was 97 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3861, these establishments accounted for 1 percent of value of shipments.

#### **INDUSTRY 3873.—WATCHES, CLOCKS, AND WATCHCASES (Short Title)**

This industry comprises establishments primarily engaged in manufacturing clocks (including electric), watches, watchcases, mechanisms for clockwork-operated devices, and clock and watch parts. This industry also includes establishments primarily engaged in assembling clocks and watches from purchased movements and cases.

Establishments primarily engaged in manufacturing time clocks are classified in industry 3579, glass crystals in industry 3231, and unbreakable crystals in industry 3079.

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President.

The statistics for this industry, as classified under the 1972 edition of the SIC manual, were changed to code number 3873 from code numbers 3871 and 3872 in the previous classification system, but were not changed as to content.

Value of shipments and other receipts of the Watches, Clocks, and Watchcases Industry in 1972 totaled \$937 million. This included shipments of watches, clocks, and watchcases (primary products) valued at \$825 million, shipments of other products (secondary products) valued at \$75 million, and miscellaneous receipts (mainly receipts for repair work) of \$37 million.

Shipments of watches, clocks, and watchcases (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 84 percent.

Shipments of watches, clocks, and watchcases (primary products) from establishments classified in industry 3873 in

---

## EXPLANATORY TEXT—Continued

1972 represented 94 percent (coverage ratio) of these products valued at \$871 million shipped by all industries. In 1967, the coverage ratio was 91 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small

number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3873, these establishments accounted for 3 percent of value of shipments.

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3841	Industry 3842	Industry 3843	Industry 3851	Industry 3861	Industry 3873
1972.....	449	780	385	445	554	184
1967.....	298	755	314	432	505	198
1963.....	256	525	267	211	499	201

(NA) Not available. (S) Withheld because the data did not meet publication standards.

\* These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

<sup>1</sup>For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

<sup>2</sup>The figures for 1972 are not strictly comparable with those for prior years. The report form used for this industry in the 1972 Census of Manufactures contained an inquiry designed to identify establishments either grinding lenses or fitting glasses to prescription. Such establishments have been reclassified to trade industries. The comparable 1972 estimates published in the Annual Survey of Manufactures are essentially comparable to estimates for 1971 and prior years.

<sup>3</sup>Industry 3873, Watches, Clocks, and Watchcases was published as two separate industries in 1967: 3871, Watches and Clocks; and 3872, Watchcases.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production worker as percent of total employment (percent)	Annual men-hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials per dollar of shipments (dollars)	Cost of materials and payrolls per dollar shipments (dollars)	Assets per dollar of shipments (dollars)	Value added per employee (dollars)	Payrolls as percent of value added (percent)	Value added per man-hour of production worker (dollars)

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC				
	Establishments		All employees	Value added by manufacture	Value of shipments	Establishments		All employees	Value added by manufacture	Value of shipments
	Total	With 20 employees or more				Total	With 20 employees or more			
	(number)	(number)	(1,000)	(million dollars)	(million dollars)	(number)	(number)	(1,000)	(million dollars)	(million dollars)
New industry 3873. Watches, Clocks, and Watchcases.....	202	99	30.8	466.0	937.2	(X)	(X)	(X)	(X)	(X)
Old industry 3871. Watches and Clocks.....	169	80	27.7	427.1	868.7	168	80	(D)	(D)	(D)
Old industry 3872. Watchcases.....	33	19	3.1	38.9	68.5	33	19	3.1	38.9	68.5

(X) Not applicable. (D) Withheld to avoid disclosing figures for individual companies.

TABLE 2. General Statistics by Geographic Area: 1972 and 1967

(See appendix, Explanation of Terms)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent  
E2--20 to 29 percent

E3--30 to 39 percent  
E4--40 to 49 percent

E5--50 to 59 percent  
E6--60 to 69 percent

E7--70 to 79 percent  
E8--80 to 89 percent

E9--90 to 99 percent  
E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

<sup>1</sup>Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization--the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization--the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972—Continued

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product special- ization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 5A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Surgical and medical instruments (SIC 3841)	Surgical appliances and supplies (SIC 3842)	Dental equipment and supplies (SIC 3843)	Ophthalmic goods (SIC 3851)	Photographic equipment and supplies (SIC 3861)	Watches, clocks, and watchcases (SIC 3873)	Other industries

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967

(Includes quantity and value of the products reported not only by establishments classified in this industry, but also by establishments classified in other industries, and shipping these products as "secondary" products. See appendix, Explanation of Terms "Value of shipments")

1972 product code	Product	Unit of measure	Total product shipments including interplant transfers			
			1972		1967	
			Quantity	Value (million dollars)	Quantity	Value (million dollars)
3841- --	SURGICAL AND MEDICAL INSTRUMENTS, TOTAL.....		(X)	984.2	(X)	542.9
38410 12	Surgical Instruments, Including Suture Needles, and Eye, Ear, Nose, and Throat Instruments.....		(X)	54.9	(X)	35.1
38410 31	Orthopedic instruments, such as bone drills and bone plates, excluding eye, ear, nose, and throat instruments.....		(X)	14.2	(X)	6.8
38410 51	Diagnostic apparatus, including such items as metabolism and blood pressure apparatus, ophthalmoscopes, otoscopes, and cystoscopes..		(X)	123.4	(X)	76.4
38410 63	Hypodermic syringes: Reusable.....	Million units.	1.6	5.6	4.8	8.4
38410 66	Disposable: Uniquely designed for prefilling.....	..do.....	(NA)	103.2	(NA)	44.5
38410 68	Other.....	..do.....				
38410 73	Hypodermic needles: Reusable.....	..do.....	(NA)	3.5	(NA)	4.1
38410 75	Disposable.....	..do.....	2,083.3	52.0	1,712.8	42.4
38410 83	Anesthesia apparatus and oxygen tents.....		(X)	53.9	(X)	24.8
38410 85	Other surgical and medical instruments, including transfusion equipment, blood donor kits, and veterinary instruments.....		(X)	367.3	(X)	164.5
38410 91	Operating room furniture, including tables, cases, cabinets, etc..		(X)	31.0	(X)	22.8
38410 93	Patient room furniture, including cabinets, over bed tables, dressers, etc., but excluding beds and chairs.....		(X)	40.8	(X)	27.4
38410 96	Other hospital furniture, excluding operating and patient room furniture, beds, and instruments, but including cases, tables, bassinets, chartracks, backrests, etc.....		(X)	58.9	(X)	56.3
38410 00	Surgical and medical instruments, n.e.c., for establishments with 10 employees or more. (See note.).....		(X)	59.3	(X)	23.1
38410 02	Surgical and medical instruments, n.e.c., for establishments with less than 10 employees. (See note.).....		(X)	16.2	(X)	5.5
3842- --	SURGICAL APPLIANCES AND SUPPLIES, TOTAL.....		(X)	1,142.1	(X)	691.3
38421 --	Surgical, Orthopedic, and Prosthetic Appliances and Supplies.....		(X)	782.0	(X)	475.0
38421 11	Orthopedic appliances (braces), including parts.....		(X)	24.4	(X)	17.6
38421 15	Sterilizers (hospital and surgical), excluding dental sterilizers.....		(X)	41.1	(X)	29.9
38421 22	Surgical dressings: Bandages, elastic.....	Mil. sq. yd..	(NA)	12.7		
38421 23	Bandages, other, including muslin, plaster of paris, etc., but excluding self-adhering bandages.....	..do.....	(NA)	13.7	(NA)	29.0
38421 24	Adhesive plaster, medicated and nonmedicated, including self-adhering bandages.....		(X)	88.0	(X)	83.3
38421 26	Gauze (absorbent and packing).....	Mil. sq. yd..	(NA)	( <sup>1</sup> )	(NA)	3.7
38421 27	Cotton, including cotton balls (sterile and nonsterile).....		(X)	33.9	(X)	15.6
38421 29	Other surgical dressings, including sponges, compresses, pads, etc.....		(X)	<sup>1</sup> 105.0	(X)	63.8
38421 31	Disposable surgical drapes, including O/B and O/R packs.....	Mil. sq. yd..	(NA)	(2)	(3)	(3)
38421 32	Disposable incontinent pads, bed pads, and adult diapers.....	..do.....				
38421 33	Sterile surgical sutures: Absorbable.....		(X)	65.8	(X)	43.4
38421 34	Nonabsorbable.....		(X)	55.1	(X)	27.8
38421 35	Artificial limbs (prosthetic), including parts.....		(X)	22.2	(X)	9.9
38421 38	Elastic stockings.....		(X)	9.5	(X)	10.0
38421 41	Elastic braces, suspensories, and other elastic supports.....		(X)	24.6	(X)	11.9
38421 45	Arch supports and other foot appliances.....		(X)	6.1	(X)	7.7
38421 61	Corn remover pads, bunion pads, etc.....		(X)	(2)	(3)	(3)
38421 65	Breathing devices, excluding anesthetic apparatus but including incubators, respirators, resuscitators, inhalators, etc.....		(X)	23.6	(X)	16.5
38421 71	Surgical corsets.....	1,000 dozen..	150.6	16.4	169.2	10.6
38421 98	Other surgical and orthopedic items not included in above categories (wheelchairs, splints, trusses, etc.).....		(X)	<sup>2</sup> 216.1	(X)	89.1
38421 00	Surgical, orthopedic, and prosthetic appliances and supplies, n.s.k.....		(X)	23.8	(X)	5.2

See footnotes at end of table.

38737 59	Other metals.....	...do.....			(NA)	2.1
38737 65	Pocket and other watchcases, all qualities, for jeweled, nonjeweled, or pinlever watch movements.....	...do.....	(X)	4.5	(X)	4.6
38737 00	Watchcases, n.s.k.....					
38730 00	Watches, clocks, and watchcases, n.s.k., for establishments with 10 employees or more. (See note.).....		(X)	14.3	(X)	29.1
38730 02	Watches, clocks, and watchcases, n.s.k., for establishments with less than 10 employees. (See note.).....		(X)	6.4	(X)	3.2

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. <sup>r</sup>Revised.

<sup>1</sup>Product code 38421 26, Gauze (absorbent and packing), is included with 38421 29 in order to avoid disclosure of individual companies' operations.

<sup>2</sup>Product codes 38421 31, 38421 32, and 38421 61 are included with 38421 98 in order to avoid disclosure of individual companies' operations.

<sup>3</sup>These products were not collected separately in the 1967 Census of Manufactures.

<sup>4</sup>Source: Annual Survey of Manufactures unpublished data.

<sup>5</sup>Quantity figures include heads shipped separately, as well as complete units. Value figures include the value of heads shipped separately, stands shipped separately, and complete units shipped.

<sup>6</sup>The number of units shipped, including leased machines, totaled 370.0 thousand in 1967. The value shown includes, for some companies, rental receipts rather than the value of machines produced during the year. The quantity figure for 1972 is not available.

<sup>7</sup>Product code 38613 07 has been combined with product code 38613 27, and product code 38613 15 has been combined with product codes 38613 42 through 38613 47 to avoid disclosing figures for individual companies.

<sup>8</sup>Includes an indeterminate amount of duplication resulting from shipments of film producers for further manufacturing process.

<sup>9</sup>Product classes 38615 and 38619 have been redefined effective with 1972. Previously, both of these classes were included in the single class 38615.

<sup>10</sup>Represents total square feet of sensitized material (in millions).

<sup>11</sup>Motion picture film, amateur roll film, and other film were combined to avoid disclosing operations of individual companies. Motion picture film was reported in linear feet by width, and has been converted to TSFSM. Amateur roll film and other film were collected in TSFSM.

<sup>12</sup>Represents total square yards of sensitized material (in millions).

<sup>13</sup>Product codes 38617 18 and 38617 19 are new codes for 1972. No comparable data are available for 1967.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)		Product class and geographic area	Value of shipments (million dollars)	
	1972	1967		1972	1967
WATCHES WITH DOMESTIC MOVEMENTS AND PARTS FOR ALL WATCHES AND CLOCKS (38735)--Continued			WATCHCASES (38737)		
South Region.....	GG	GG	United States.....	52.9	(NA)
South Atlantic Division.....	CC	CC	Northeast Region.....	GG	(NA)
Georgia.....	CC	AA	New England Division.....	EE	(NA)
West South Central Division.....	GG	GG	Rhode Island.....	EE	(NA)
Arkansas.....	GG	( <sup>1</sup> )	Middle Atlantic Division.....	FF	(NA)
Texas.....	EE	GG	New York.....	28.8	(NA)
West Region.....	AA	( <sup>1</sup> )	Pennsylvania.....	EE	(NA)
Pacific Division.....	AA	( <sup>1</sup> )	North Central Region.....	BB	(NA)
California.....	AA	( <sup>1</sup> )	East North Central Division.....	BB	(NA)
			Michigan.....	BB	(NA)

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9  
BB.....\$2.0 to \$4.9

CC.....\$5.0 to \$9.9  
EE.....\$10.0 to \$19.9

FF.....\$20.0 to 49.9  
GG.....\$50.0 and over

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>This State or division was not shown as a separate line in table 6B in the 1967 report for this industry.

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

<sup>e</sup> From 10 to 30 percent of this figure was estimated.

<sup>1</sup>These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

<sup>2</sup>For 1966 and previous years, except 1963, these figures are included with product class 38612, "Photocopying Equipment."

<sup>3</sup>Prior to 1972, this industry was published as two separate industries: 3871, Watches and Clocks; and 3872, Watchcases.

Note: In 1967, data for manufactured mixed gas, blast furnace gas, and coke oven gas were included in code 131300, natural gas. In 1971, data for these gases were included in code 960011, other fuels.

- Represents zero. (X) Not applicable. (NA) Not available. (S) Withheld because the estimates did not meet publication standards.  
(Z) Less than half of the unit of measurement shown.

<sup>1</sup>Represents the quantity of purchased electric energy and the kilowatt hours equivalent of all fuels used for heat and power.

---

## MAJOR GROUP 39

### Miscellaneous Manufacturing Industries

- 39A Jewelry, silverware, and plated ware
- 39B Musical instruments and parts; toys and sporting goods
- 39C Office supplies, costume jewelry and notions
- 39D Miscellaneous manufactures

This major group includes establishments primarily engaged in manufacturing products not classified in any other manufacturing major group. Industries in this group fall into the following categories: Jewelry, silverware, and plated ware; musical instruments; toys, sporting and athletic goods; pens, pencils, and other office and artists' materials; buttons, costume novelties, miscellaneous notions; brooms and brushes; caskets; and other miscellaneous manufacturing industries.

TABLE 1. General Statistics: 1972 and Earlier Years

(See appendix, Explanation of Terms)

Year and item	Establishments		All employees <sup>1</sup>		Production workers			Value added by manufacture <sup>2</sup>	Cost of materials <sup>3</sup>	Value of industry shipments <sup>3</sup>	Capital expenditures, new <sup>4</sup>
	Total	With 20 employees or more	Number	Payroll	Number	Man-hours	Wages

(X) Not applicable. (NA) Not available.

<sup>1</sup>The figures for 1939 through 1972 include data for employees of manufacturing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

<sup>2</sup>For the period 1954 to 1972, figures represent adjusted value added by manufacture and for earlier years, unadjusted value added. Adjusted value added is equal to value of shipments (including resales of finished products) less cost of finished products, materials, supplies, fuel, electric energy, and contract work, plus the net change in the value of finished products and work-in-process inventories between the beginning and end of the year, without adjustment for price changes. Unadjusted value added is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work in process during the year. For 1921 to 1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture. See "Value Added by Manufacture" in Introduction.

<sup>3</sup>The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

<sup>4</sup>The figures for 1958 to 1972 include expenditures for plants under construction and not yet in operation.

<sup>5</sup>See appendix C of the General Summary for the 1972 changes in the Standard Industrial Classification.

<sup>6</sup>Figures for 1958 to 1972 for operating manufacturing establishments are not strictly comparable with prior years due to revisions of the Standard Industrial Classification system. Prior to 1958, establishments primarily engaged in the manufacture of plastics products, n.e.c., cork products, soda-fountain and bar equipment, and jewelry, instrument, and musical instrument cases were included in these data. Establishments primarily engaged in the manufacture of linoleum and other hard surface floor covering, n.e.c., are excluded in data prior to 1958.

<sup>7</sup>In 1954 and 1967, data for administrative and auxiliary establishments for Major Group 19, "Ordnance and Accessories," are included with Major Group 39, "Miscellaneous Manufactures."

<sup>8</sup>In addition to data for operating establishments, figures for employment and payroll for manufacturing central administrative office and auxiliary units are included in Major Group 39 for Major Groups 39 and 19 for the years 1949 to 1953 in the annual survey of manufactures volumes. Data for these units are not available for the years 1955 to 1957, 1959 to 1962, 1964 to 1966, 1968 to 1971, and prior to 1949.

<sup>9</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

<sup>10</sup>For 1953 and earlier years, data includes ordnance and accessories.

TABLE 2. General Statistics by Geographic Area: 1972 and 1967

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (2) Less than half of the unit of measurement shown.

<sup>1</sup>General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

<sup>2</sup>The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

# EXPLANATORY TEXT

## JEWELRY, SILVERWARE, AND PLATED WARE

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

**3911—Jewelry, Precious Metal**

**3914—Silverware, Plated Ware, and Stainless Steel Ware\***

**3915—Jewelers' Findings and Materials, and Lapidary Work\***

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products as well as their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### INDUSTRY 3911.—JEWELRY, PRECIOUS METAL

This industry comprises establishments primarily engaged in the manufacture of jewelry and other articles worn on or carried about the person, made of precious metals with or without stones (including the setting of stones where used), including cigarette cases and lighters, vanity cases and compacts; trimmings for umbrellas and canes; and jewel settings and mountings. (Establishments primarily engaged in manufacturing costume jewelry from nonprecious metals and other materials are classified in industry 3961). For a detailed list of products of industry 3911, refer to table 6A, product codes 39111 12 to 39112 98.

Value of shipments and other receipts of the Jewelry, Precious Metal, Industry in 1972 totaled \$1,125 million. This included shipments of precious metal jewelry (primary products) valued at \$947 million, shipments of other products

(secondary products) valued at \$79 million, and miscellaneous receipts (mainly resales) of \$98 million.

Shipments of precious metal jewelry (primary products) in 1972 represented 92 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 91 percent.

Shipments of precious metal jewelry (primary products) from establishments classified in industry 3911 in 1972 represented 96 percent (coverage ratio) of these products valued at \$982 million shipped by all industries. In 1967, the coverage ratio was also 96 percent. Other industries shipping jewelry, precious metal, included Industry 3961, Costume Jewelry, valued at \$13 million.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3911, these establishments accounted for 13 percent of value of shipments.

### INDUSTRY 3914.—SILVERWARE AND PLATED WARE (Short Title)

This industry comprises establishments primarily engaged in the manufacture of flatware (including knives, forks, and spoons), hollowware, toiletware, ecclesiastical ware, and related products made of sterling silver; of metal plated with silver, gold, or other metal; of nickel silver; of pewter; or of stainless steel. For a detailed list of products of industry 3914, refer to table 6A, product codes 39141 11 to 39142 61.

Value of shipments and other receipts of the Silverware and Plated Ware Industry in 1972 totaled \$365 million. This included shipments of silverware and plated ware (primary products) valued at \$308 million, shipments of other products (secondary products) valued at \$18 million, and miscellaneous receipts (mainly resales) of \$39 million.

Shipments of silverware and plated ware (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 95 percent.

Shipments of silverware and plated ware (primary products) from establishments classified in industry 3914 in 1972 represented 97 percent (coverage ratio) of these products valued at \$318 million shipped by all industries. In 1967, the coverage ratio was 99 percent.

---

\* Note that the "short title" for this industry is used throughout the report.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3914, these establishments accounted for 3 percent of value of shipments.

#### **INDUSTRY 3915.—JEWELERS' MATERIALS AND LAPIDARY WORK (Short Title)**

This industry comprises establishments primarily engaged in manufacturing unassembled jewelry parts and stock shop products such as sheet, wire, and tubing; establishments of lapidaries primarily engaged in cutting, slabbing, tumbling, carving, engraving, polishing or faceting stones from natural or manmade precious or semiprecious gem raw materials, either for sale or on a contract basis for the trade; in recutting, repolishing, and setting gem stones; or in cutting, drilling, and otherwise preparing jewels for instruments, dies, watches, chronometers, and other industrial uses. This industry includes the drilling, sewing, and peeling of real or cultured pearls, but does not include the manufacture of artificial pearls which are classified in industry 3961. For a detailed list of products of industry 3915, refer to table 6A, product codes 39151 13 to 39152 31.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual. Also, a new SIC number and title have been assigned. Two separate old industries: SIC Industry 3912, Jewelers' Findings and Materials, and SIC Industry 3913, Lapidary Work, were combined to form new Industry 3915, Jewelers' Materials and Lapidary Work. The

effect of the revisions on the data are summarized in Table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 237 establishments with 5.5 thousand total employment and \$73.5 million value added would have been classified in old industry 3912 and 328 establishments with 2.3 thousand total employment and \$41.8 million value added would have been classified in old industry 3913.

Value of shipments and other receipts of the Jewelers' Materials and Lapidary Work Industry in 1972 totaled \$326 million. This included shipments of jewelers' findings and materials and lapidary work (primary products) valued at \$290 million, shipments of other products (secondary products) valued at \$14 million, and miscellaneous receipts (mainly resales) of \$22 million.

Shipments of jewelers' materials and lapidary work (primary products) in 1972 represented 95 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 92 percent.

Shipments of jewelers' materials and lapidary work (primary products) from establishments classified in industry 3915 in 1972 represented 86 percent (coverage ratio) of these products valued at \$336 million shipped by all industries. In 1967, the coverage ratio was 87 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3915, these establishments accounted for 16 percent of value of shipments.

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	1972 industry 3911	1972 industry 3914	1972 industry 3915	1967 industry 3912	1967 industry 3913
1972.....	1,497	189	567	(X)	(X)
1967.....	1,477	186	(X)	232	296
1963.....	1,428	201	(X)	228	318

Although 1972 industry 3915 is a combination of 1967 industries 3912 and 3913, the number of companies is not separately available for 1967 and 1963 on the new SIC basis.

(NA) Not available. (X) Not applicable. (S) Withheld because the data did not meet publication standards. \*These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

<sup>1</sup>For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

<sup>2</sup>The 1972 data are not strictly comparable to 1971 and prior years because of revisions in the 1972 Standard Industrial Classification. For 1972, these statistics are the totals for industry 3915 on the new SIC basis. For 1971 and prior years, they are the combined totals for industries 3912 and 3913 as classified on the old SIC basis. Because of changes in the product mix for several plants classified in these industries, the 1972 establishment count for industry 3915 on the new SIC basis is not necessarily identical to the combined establishment count for industries 3912 and 3913 on the old SIC basis (see table 1C). However, the effect of these changes is estimated to be less than one percent of the total value of shipments for 1972 industry 3915.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee  (dollars)	Assets per employee  (dollars)	Production worker as percent of total employment  (percent)	Annual man-hours of production workers  (number)	Average hourly earnings of production workers  (dollars)	Cost of materials per dollar of shipments  (dollars)	Cost of materials and payrolls per dollar shipments  (dollars)	Assets per dollar of shipments  (dollars)	Value added per employee  (dollars)	Payrolls as percent of value added  (percent)	Value added per man-hour of production worker  (dollars)

(NA) Not available. (S) Withheld because the data did not meet publication standards.

<sup>1</sup>The 1972 data are not strictly comparable to 1971 and prior years (see footnote 2, table 1A).

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent      E3--30 to 39 percent      E5--50 to 59 percent      E7--70 to 79 percent      E9--90 to 99 percent  
 E2--20 to 29 percent      E4--40 to 49 percent      E6--60 to 69 percent      E8--80 to 89 percent      E10--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

<sup>1</sup>General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. For States with more than 150 employees, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees      BB--250 to 499 employees      CC--500 to 999 employees      EE--1,000 to 2,499 employees      FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent      E3--30 to 39 percent      E5--50 to 59 percent      E7--70 to 79 percent      E9--90 to 99 percent  
E2--20 to 29 percent      E4--40 to 49 percent      E6--60 to 69 percent      E8--80 to 89 percent      E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above.

<sup>1</sup>Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization:  
1972

This table presents selected statistics for establishments according to their degree of specialization in products primarily to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)

(0) Withheld to avoid disclosing figures for individual companies.

**TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product special- ization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(million dollars)	(million dollars)	(million dollars)	(million dollars)	$\frac{\text{Col. B}}{\text{Col. B \& C}}$ (percent)	(million dollars)	(million dollars)	(million dollars)	$\frac{\text{Col. B}}{\text{Col. F}}$ (percent)
		A	B	C	D	E	F	G	H	I
3911	Jewelry, precious metal.....1972..	1,124.6	947.1	79.2	98.3	92	981.8	947.1	34.7	96
	.....1967..	741.8	609.1	62.9	69.8	91	633.2	609.1	24.1	96

39152 --	Lapidary Work and Diamond Cutting and Polishing.....			132.8		<sup>1</sup> 97.6
	Stones cut or polished in the plant from materials owned by the plant:					
39152 11	Diamonds for jewelry purposes.....			120.1	}	69.5
39152 15	Diamonds for industrial purposes.....					4.3
39152 31	Other natural precious and semiprecious stones and synthetic stones, including drilling of pearls.			10.6		5.7
39152 00	Lapidary work and diamond cutting and polishing, n.s.k., for establishments with 10 employees or more. (See note.).....			2.1		<sup>1</sup> 27.7
39150 00	Jewelers' materials and lapidary work, n.s.k., for establishments with 10 employees or more. (See note.).....			23.4		( <sup>1</sup> )
39150 02	Jewelers' materials and lapidary work, n.s.k., for establishments with less than 10 employees. (See note.).....			37.5		( <sup>1</sup> )

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriated product-class code (5 digits) followed by "00," or in some cases to the appropriated product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars).

<sup>1</sup>Because of an SIC change, administrative records and shipments coded to the appropriate product class code (five digits followed by 00) have been treated differently in the 1967 and 1972 censuses. The values for administrative records estimated for 1967 were \$5.5 million for jewelers' findings and materials and \$10.4 million for lapidary work and diamond cutting and polishing. In 1967, these values are included, respectively, in product classes 39151 and 39152. In 1972, these values are included in code 39150 02.

<sup>2</sup>Includes lapidary work done on materials owned by others for which type of stone was not reported.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)		Product class and geographic area	Value of shipments (million dollars)	
	1972	1967		1972	1967

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1972 and 1967—Continued

(Footnotes for Table 6B)

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9  
BB.....\$2.0 to \$4.9

CC.....\$5.0 to \$9.9  
EE.....\$10.0 to \$19.9

FF.....\$20.0 to \$49.9  
GG.....\$50.0 and over

(NA) Not available.

TABLE 6C. Product Classes—Value Shipped by All Manufacturing Establishments: 1958, 1963, 1967 to 1972

(In millions of dollars)

<sup>1</sup>These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

<sup>2</sup>Included in product classes 39151 and 39152 (see footnote 1, table 6A).

TABLE 7A. Materials Consumed, by Kind: 1972 and 1967

(See appendix, Explanation of Terms)

1972 code	Material	Unit of measure	1972		1967	
			Quantity	Delivered cost (million dollars)	Quantity	Delivered cost (million dollars)
	INDUSTRY 3914.--SILVERWARE AND PLATED WARE

# EXPLANATORY TEXT

## MUSICAL INSTRUMENTS AND PARTS; TOYS AND SPORTING GOODS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

**3931—Musical Instruments**

**3942—Dolls**

**3944—Games, Toys, and Children's Vehicles; Except Dolls and Bicycles\***

**3949—Sporting and Athletic Goods, N.E.C.**

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### INDUSTRY 3931.—MUSICAL INSTRUMENTS

This industry comprises establishments primarily engaged in the manufacture of pianos, with or without player attachments; organs; other musical instruments; and parts and accessories for musical instruments. For a detailed list of products of industry 3931, refer to table 6A, product codes 39311 11 to 39314 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Musical Instruments Industry in 1972 totaled \$618 million. This included shipments of musical instruments and parts (primary products), valued at \$521 million, shipments of other products

(secondary products) valued at \$17 million, and miscellaneous receipts (mainly resales) of \$80 million.

Shipments of musical instruments and parts (primary products) in 1972 represented 97 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 97 percent.

Shipments of musical instruments and parts (primary products) from establishments classified in industry 3931 in 1972 represented 99 percent (coverage ratio) of these products valued at \$526 million shipped by all industries. In 1967, the coverage ratio was 98 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3931, these establishments accounted for 3 percent of value of shipments.

### INDUSTRY 3942.—DOLLS

This industry comprises establishments primarily engaged in manufacturing dolls, doll parts, and doll clothing. Establishments primarily engaged in manufacturing stuffed toy animals are also included in this industry. For a detailed list of products of industry 3942, refer to table 6A, product codes 39420 06 to 39420 55.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Dolls Industry in 1972 totaled \$199 million. This included shipments of dolls (primary products), valued at \$190 million, shipments of other products (secondary products) valued at \$3 million, and miscellaneous receipts (mainly contract work) of \$7 million.

Shipments of dolls (primary products) in 1972 represented 99 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was over 99 percent.

Shipments of dolls (primary products) from establishments classified in industry 3942 in 1972 represented 68 percent (coverage ratio) of these products valued at \$278 million shipped by all industries. In 1967, the coverage ratio was 70 percent. Other industries shipping dolls consisted mainly of industry 3944, Games, Toys, and Children's Vehicles.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail

\*Note that the "short title" for this industry is used throughout the report.

portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3942, these establishments accounted for 9 percent of value of shipments.

#### **INDUSTRY 3944.—GAMES, TOYS, AND CHILDREN'S VEHICLES (Short Title)**

This industry comprises establishments primarily engaged in the manufacture of games and game sets for adults and children, such as chess, checkers, dominoes, puzzles, and mechanical and nonmechanical toys.

This industry also includes establishments primarily engaged in manufacturing toys, such as toy furniture, doll carriages and carts, construction sets, mechanical trains, toy guns and air rifles, and other mechanical games and toys; baby carriages and strollers; children's velocipedes and tricycles, coaster wagons, play cars, sleds, and other children's outdoor wheel goods and vehicles, except bicycles.

Establishments primarily engaged in manufacturing dolls are classified in industry 3942; sporting and athletic goods for children and adults in industry 3949; and bicycles in industry 3751.

The statistics for this industry, as classified under the 1972 edition of the Standard Industrial Classification (SIC) Manual, were changed by combining industries 3941 and 3943 in the previous classification system but were not changed as to content, otherwise.

The effect of the revisions on the data are summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC.

Value of shipments and other receipts of the Games, Toys, and Children's Vehicles Industry in 1972 totaled \$1,739 million. This included shipments of games, toys, and children's vehicles (primary products), valued at \$1,385 million, shipments of other products (secondary products) valued at \$222 million, and miscellaneous receipts (mainly resales) of \$133 million.

Shipments of games, toys, and children's vehicles (primary products) in 1972 represented 86 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 87 percent. Secondary products shipped by this industry in 1972 consisted mainly of dolls.

Shipments of games, toys, and children's vehicles (primary products) from establishments classified in industry 3944 in 1972 represented 92 percent (coverage ratio) of these products valued at \$1,501 million shipped by all industries. In 1967, the coverage ratio was also 92 percent. Other industries shipping

games, toys, and children's vehicles consisted mainly of industry 3079, Miscellaneous, Plastics Products, \$27 million.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3944, these establishments accounted for 8 percent of value of shipments.

#### **INDUSTRY 3949.—SPORTING AND ATHLETIC GOODS, N.E.C.**

This industry comprises establishments primarily engaged in the manufacture of sporting and athletic goods, not elsewhere classified, such as fishing tackle; golf and tennis goods; baseball, football, basketball, and boxing equipment; roller skates and ice skates; gymnasium and playground equipment; billiard and pool tables; and bowling alleys and equipment.

Establishments primarily engaged in manufacturing athletic apparel are classified in SIC Major Group 23; small arms ammunition in industry 3482; and firearms in industry 3484.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Sporting and Athletic Goods, N.E.C., Industry in 1972 totaled \$1,737 million. This included shipments of sporting and athletic goods, n.e.c. (primary products), valued at \$1,454 million, shipments of other products (secondary products) valued at \$181 million, and miscellaneous receipts (mainly resales) of \$102 million.

Shipments of sporting and athletic goods, n.e.c. (primary products) in 1972 represented 89 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 95 percent. Secondary products shipped by this industry in 1972 consisted mainly of miscellaneous plastics products (\$36 million).

Shipments of sporting and athletic goods, n.e.c. (primary products) from establishments classified in industry 3949 in 1972 represented 94 percent (coverage ratio) of these products valued at \$1,539 million shipped by all industries. In 1967, the coverage ratio was 91 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3949, these establishments accounted for 7 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972—Continued

(Footnotes for table 1A)

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3931	Industry 3942	Industry 3944	Industry 3949	1967 industry 3941	1967 industry 3943
1972.....	310	237	619	1,441	(X)	(X)
1967.....	304	331	(X)	1,304	653	41
1963.....	288	404	(X)	1,361	767	60

Although 1972 industry 3944 is a combination of 1967 industries 3941 and 3943, the number of companies is not separately available for 1967 and 1963 on the new SIC basis.

(NA) Not available. (X) Not applicable. (S) Withheld because the data did not meet publication standards. \*These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

<sup>1</sup>For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

<sup>2</sup>The 1972 data are not strictly comparable to 1971 and prior years because of revisions in the 1972 Standard Industrial Classification. For 1972, these statistics are the totals for industry 3944 on the new SIC basis. For 1971 and prior years, they are the combined totals for industries 3941 and 3943 as classified on the old SIC basis. Because of changes in the product mix for several plants classified in these industries, the 1972 establishment count for industry 3944 on the new SIC basis is not necessarily identical to the combined establishment count for industries 3941 and 3943 on the old SIC basis (see table 1C). However, the effect of these changes is estimated to be less than one percent of the total value of shipments for 1972 industry 3944.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee  (dollars)	Assets per employee  (dollars)	Production worker as percent of total employment (percent)	Annual man-hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials per dollar of shipments (dollars)	Cost of materials and payrolls per dollar shipments (dollars)	Assets per dollar of shipments (dollars)	Value added per employee (dollars)	Payrolls as percent of value added (percent)	Value added per man-hour of production worker (dollars)

(NA) Not available. (S) Withheld because the data did not meet publication standards.

<sup>1</sup>The 1972 data are not strictly comparable with 1971 and prior years. (See footnote 2, table 1A.)

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC				
	Establishments		All employees	Value added by manufacture	Value of shipments	Establishments		All employees	Value added by manufacture	Value of shipments
	Total	With 20 employees or more				Total	With 20 employees or more			
	(number)	(number)				(number)	(number)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent      E3--30 to 39 percent      E5--50 to 59 percent      E7--70 to 79 percent      E9--90 to 99 percent  
E2--20 to 29 percent      E4--40 to 49 percent      E6--60 to 69 percent      E8--80 to 89 percent      E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>General statistics for some producing area are withheld to avoid disclosing figures for individual companies. However, for such area with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees      BB--250 to 499 employees      CC--500 to 999 employees      EE--1,000 to 2,499 employees      FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent      E3--30 to 39 percent      E5--50 to 59 percent      E7--70 to 79 percent      E9--90 to 99 percent  
E2--20 to 29 percent      E4--40 to 49 percent      E6--60 to 69 percent      E8--80 to 89 percent      E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

<sup>1</sup>Report forms were not mailed to companies that operated only one establishment—generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)
			Number	Payroll	Number	Man-hours	Wages				
			(1,000)	(million dollars)	(1,000)	(millions)	(million dollars)				
3931	MUSICAL INSTRUMENTS										
	ENTIRE INDUSTRY . . . . .	344	24.5	173.4	19.7	38.3	123.9	339.4	296.7	617.5	10.6

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(million dollars)	(million dollars)	(million dollars)	(million dollars)	Col. B Col. B & C	(million dollars)	(million dollars)	(million dollars)	Col. B Col. F
		A	B	C	D	E	F	G	H	I
3931	Musical instruments.....1972..	617.5	520.6	16.8	80.1	97	525.5	520.6	4.9	99
	1967..	434.3	391.8	13.3	29.2	97	401.2	391.8	9.4	98
3942	Dolls.....1972..	199.1	189.7	2.8	6.6	99	277.9	189.7	88.2	68
	1967..	162.8	152.6	.3	9.9	99	217.0	152.6	64.4	70
3944	Games, toys, and children's vehicles.....1972..	1,739.3	1,384.7	221.7	132.9	86	1,500.7	1,384.7	116.0	92
	1967 <sup>1</sup> .	1,192.2	968.7	141.7	81.8	87	1,048.7	968.7	80.0	92
3949	Sporting and athletic goods, n.e.c.....1972..	1,736.6	1,453.6	181.1	101.9	89	1,538.8	1,453.6	85.2	94
	1967..	853.3	758.7	42.9	51.7	95	836.4	758.7	77.7	91

<sup>1</sup>1967 data represent the combination of 1967 industry 3941, Games and Toys, Except Dolls and Children's Vehicles, and 1967 industry 3943, Children's Vehicles, Except Bicycles.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

39495 97	Aboveground swimming pools, 15 feet in diameter and over, filtered (completely manufactured).....		(NA)	28.7		
39495 98	Other sporting and athletic goods, including table tennis goods, water skiing equipment (except skis), diving boards, surf- boards, other water sports equipment (n.e.c.); skeet and shooting range equipment (decoys, clay pigeons, trap target launchers, etc.) but excluding firearms, ammunition, athletic clothing, and shoes.....		(X)	126.3		
39495 00	Other sporting and athletic goods, n.s.k.....		(X)	24.3	(X)	8.5
39490 00	Sporting and athletic goods, n.s.k., for establishments with 10 employees or more. (See note.).....		(X)	109.8	(X)	69.9
39490 02	Sporting and athletic goods, n.s.k., for establishments with less than 10 employees. (See note.).....		(X)	65.6	(X)	26.5

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

(X) Not applicable. (NA) Not available.

<sup>1</sup>Comparable data were published in Current Industrial Reports (CIR) Series MA-36N, "Selected Electronic and Associated Products." A review of the CIR and census of manufactures tabulations indicates that the CIR was understated for 1972. Revised CIR figures are as follows: 1972, 193.4 thousand units valued at \$178.1 million; and 1971, 159.8 thousand units valued at \$144.1 million.

<sup>2</sup>The product class (5-digit coding) structure for this industry has been significantly revised.

<sup>3</sup>For 1967, parts for toys and games were not collected separately. Accordingly, the value for product code 39441 97 is included with product code 39442 95.

<sup>4</sup>Data for children's wagons are included with product code 39443 98, "Other children's vehicles..." to avoid disclosing figures for individual companies.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9  
BB.....\$2.0 to \$4.9

CC.....\$5.0 to \$9.9  
EE.....\$10.0 to \$19.9

FF.....\$20.0 to \$49.9  
GG.....\$50.0 and over

(NA) Not available.

- Represents zero.

<sup>1</sup>These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

# EXPLANATORY TEXT

## Office Supplies, Costume Jewelry, and Notions

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3951—Pens, Mechanical Pencils, and Parts\*
- 3952—Lead Pencils, Crayons, and Artists' Materials\*
- 3953—Marking Devices
- 3955—Carbon Paper and Inked Ribbons
- 3961—Costume Jewelry and Costume Novelties, Except Precious Metal\*
- 3962—Feathers, Plumes, and Artificial Trees and Flowers\*
- 3963—Buttons
- 3964—Needles, Pins, Hooks and Eyes, and Similar Notions\*

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

## INDUSTRY 3951.—PENS AND MECHANICAL PENCILS (Short Title)

This industry comprises establishments primarily engaged in manufacturing pens, pen points, fountain pens, ballpoint pens, refill cartridges, porous tipped felt-tip markers, and parts. For a detailed list of products of industry 3951, refer to table 6A, product codes 39510 01 to 39510 71.

The SIC number and title are the same as that used in the 1967 classification. However, there has been a slight change in

\* Note that the "short title" for this industry is used throughout the report.

definition such that broad-tipped markers, formerly in industry 3953 (product code 39530 43), are now included in this industry (product code 39510 43). The effect of the revisions on the data are summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC.

Value of shipments and other receipts of the Pens and Mechanical Pencils Industry in 1972 totaled \$310 million. This included shipments of pens and mechanical pencils (primary products) valued at \$283 million, shipments of other products (secondary products) valued at \$24 million, and miscellaneous receipts (mainly resales) of \$4 million.

Shipments of pens and mechanical pencils (primary products) in 1972 represented 92 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 93 percent. Secondary products shipped by this industry in 1972 consisted mainly of lead pencils and art goods (\$6 million).

Shipments of pens and mechanical pencils (primary products) from establishments classified in industry 3951 in 1972 represented 91 percent (coverage ratio) of these products valued at \$312 million shipped by all industries. In 1967, the coverage ratio was 92 percent. Other industries shipping pens and mechanical pencils consisted mainly of industry 3952, Lead Pencils and Art Goods, at \$12 million.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3951, these establishments accounted for 3 percent of value of shipments.

## INDUSTRY 3952.—LEAD PENCILS AND ART GOODS (Short Title)

This industry comprises establishments primarily engaged in manufacturing lead pencils, pencil leads, and crayons; and materials and equipment for artwork, such as airbrushes, drawing tables and boards, palettes, sketch boxes, pantographs, artists' colors and waxes, pyrography goods, drawing inks, and drafting materials.

Establishments primarily engaged in manufacturing mechanical pencils are classified in industry 3951, and drafting instruments in industry 3811. For a detailed list of products of

industry 3952, refer to table 6A, product codes 39521 11 to 39522 19.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Lead Pencils and Art Goods Industry in 1972 totaled \$199 million. This included shipments of lead pencils and art goods (primary products) valued at \$154 million, shipments of other products (secondary products) valued at \$32 million, and miscellaneous receipts (mainly resales) of \$13 million.

Shipments of lead pencils and art goods (primary products) in 1972 represented 83 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 85 percent. Secondary products shipped by this industry in 1972 consisted mainly of pens and mechanical pencils (\$12 million).

Shipments of lead pencils and art goods (primary products) from establishments classified in industry 3952 in 1972 represented 88 percent (coverage ratio) of these products valued at \$174 million shipped by all industries. In 1967, the coverage ratio was 93 percent. Other industries shipping lead pencils and art goods consisted mainly of industry 3951, Pens and Mechanical Pencils, at \$6 million.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3952, these establishments accounted for 4 percent of value of shipments.

#### INDUSTRY 3953.—MARKING DEVICES

This industry comprises establishments primarily engaged in manufacturing rubber and metal hand stamps, dies, and seals; steel letters and figures; and stencils for use in painting or marking.

Establishments primarily engaged in manufacturing felt-tip markers are classified in industry 3951. For a detailed list of products of industry 3953, refer to table 6A, product codes 39530 13 to 39530 98.

The SIC number and title are the same as that used in the 1967 classification. However, there has been a slight change in definition, such that board-tipped markers, formerly in this industry (product code 39530 43), are now included in industry 3951 (product code 39510 43). The effect of the revisions on the data are summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old

(1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC.

Value of shipments and other receipts of the Marking Devices Industry in 1972 totaled \$180 million. This included shipments of marking devices (primary products) valued at \$149 million, shipments of other products (secondary products) valued at \$16 million, and miscellaneous receipts (mainly resales) of \$15 million.

Shipments of marking devices (primary products) in 1972 represented 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 90 percent. Secondary products shipped by this industry in 1972 consisted mainly of printing ink (\$3 million).

Shipments of marking devices (primary products) from establishments classified in industry 3953 in 1972 represented 91 percent (coverage ratio) of these products valued at \$163 million shipped by all industries. In 1967, the coverage ratio was also 91 percent. Other industries shipping marking devices consisted mainly of industry 3952; Lead Pencils and Art Goods (\$5 to \$10 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3953, these establishments accounted for 21 percent of value of shipments.

#### INDUSTRY 3955.—CARBON PAPER AND INKED RIBBONS

This industry comprises establishments primarily engaged in manufacturing carbon paper for business machines, salesbooks, etc.; spirit or gelatin process and other stencil paper; and inked or carbon ribbons for business machines. For a detailed list of products of industry 3955, refer to table 6A, product codes 39551 12 to 39552 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Carbon Paper and Inked Ribbons Industry in 1972 totaled \$234 million. This included shipments of carbon paper and inked ribbons (primary products) valued at \$195 million, shipments of other products (secondary products) valued at \$21 million, and miscellaneous receipts (mainly resales) of \$18 million.

Shipments of carbon paper and inked ribbons (primary products) in 1972 represented 90 percent (specialization ratio)

of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 94 percent. Secondary products shipped by this industry in 1972 consisted mainly of office machines, n.e.c., over \$2 million.

Shipments of carbon paper and inked ribbons (primary products) from establishments classified in industry 3955 in 1972 represented 61 percent (coverage ratio) of these products valued at \$318 million shipped by all industries. In 1967, the coverage ratio was 79 percent. Other industries shipping carbon paper and inked ribbons consisted mainly of industry 3579; Office Machines, N.E.C., over \$2 million.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3955, these establishments accounted for 4 percent of value of shipments.

#### **INDUSTRY 3961.—COSTUME JEWELRY** (Short Title)

This industry comprises establishments primarily engaged in manufacturing costume jewelry, costume novelties, and ornaments made of all materials except precious metal, precious or semiprecious stones, and rolled gold plate and gold-filled materials.

Establishments primarily engaged in manufacturing jewelry from precious metals, such as platinum and carat gold are classified in industry 3911. For a detailed list of products of industry 3961, refer to table 6A, product codes 39610 11 to 39610 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Costume Jewelry Industry in 1972 totaled \$472 million. This included shipments of costume jewelry (primary products) valued at \$396 million, shipments of other products (secondary products) valued at \$32 million, and miscellaneous receipts (mainly resales) of \$44 million.

Shipments of costume jewelry (primary products) in 1972 represented 93 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 95 percent. Secondary products shipped by this industry in 1972 consisted mainly of jewelry, silverware, and plated ware (\$13 million).

Shipments of costume jewelry (primary products) from establishments classified in industry 3961 in 1972 represented 90 percent (coverage ratio) of these products valued at \$442

million shipped by all industries. In 1967, the coverage ratio was 92 percent. Other industries shipping costume jewelry consisted mainly of industry 3911, Jewelry, Precious Metal, (\$32 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3961, these establishments accounted for 16 percent of value of shipments.

#### **INDUSTRY 3962.—ARTIFICIAL FLOWERS** (Short Title)

This industry comprises establishments primarily engaged in manufacturing artificial trees (including Christmas trees), flowers, fruits, and foliage made from all materials except glass; and in producing fancy feathers, plumes, and articles made principally of feathers and plumes.

Establishments primarily engaged in manufacturing artificial flowers, fruits, and foliage from glass are classified in industry 3231. For a detailed list of products of industry 3962, refer to table 6A, product codes 39620 13 to 39620 21.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Artificial Flowers Industry in 1972 totaled \$109 million. This included shipments of artificial flowers (primary products) valued at \$93 million, shipments of other products (secondary products) valued at \$7 million, and miscellaneous receipts (mainly resales) of \$8 million.

Shipments of artificial flowers (primary products) in 1972 represented 93 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 97 percent. Secondary products shipped by this industry in 1972 consisted mainly of drapery hardware and blinds and shades (over \$2 million).

Shipments of artificial flowers (primary products) from establishments classified in industry 3962 in 1972 represented 92 percent (coverage ratio) of these products valued at \$102 million shipped by all industries. In 1967, the coverage ratio was 85 percent. Other industries shipping artificial flowers consisted mainly of industry 3999, Manufacturing Industries, N.E.C., at \$7 million.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail

portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3962, these establishments accounted for 20 percent of value of shipments.

#### **INDUSTRY 3963.—BUTTONS**

This industry comprises establishments primarily engaged in manufacturing buttons, button parts, and button blanks and molds of all materials, except precious metal and precious or semiprecious stones. For a detailed list of products of industry 3963, refer to table 6A, product codes 39630 11 to 39630 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Buttons Industry in 1972 totaled \$94 million. This included shipments of buttons (primary products) valued at \$84 million, shipments of other products (secondary products) valued at \$6 million, and miscellaneous receipts (mainly resales) of \$4 million.

Shipments of buttons (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 97 percent. Secondary products shipped by this industry in 1972 consisted mainly of needles, pins, and fasteners (\$5 to \$10 million).

Shipments of buttons (primary products) from establishments classified in industry 3963 in 1972 represented 81 percent (coverage ratio) of these products valued at \$103 million shipped by all industries. In 1967, the coverage ratio was 90 percent. Other industries shipping buttons consisted mainly of industry 3964, Needles, Pins, and Fasteners (\$7 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other

Government agencies and the remaining statistics constructed from industry averages. For industry 3963, these establishments accounted for 13 percent of value of shipments.

#### **INDUSTRY 3964.—NEEDLES, PINS, AND FASTENERS (Short Title)**

This industry comprises establishments primarily engaged in manufacturing notions, such as machine and hand needles, pins, hooks and eyes, eyelets, buckles, and slide and snap fasteners. For a detailed list of products of industry 3964, refer to table 6A, product codes 39641 21 to 39642 89.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Needles, Pins, and Fasteners Industry in 1972 totaled \$575 million. This included shipments of needles, pins, and fasteners (primary products) valued at \$510 million, shipments of other products (secondary products) valued at \$34 million, and miscellaneous receipts (mainly resales) of \$31 million.

Shipments of needles, pins, and fasteners (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 93 percent. Secondary products shipped by this industry in 1972 consisted mainly of manufactures, n.e.c., at \$9 million.

Shipments of needles, pins, and fasteners (primary products) from establishments classified in industry 3964 in 1972 represented 92 percent (coverage ratio) of these products valued at \$554 million shipped by all industries. In 1967, the coverage ratio was 89 percent. Other industries shipping needles, pins, and fasteners consisted mainly of industry 3465, Automotive Stampings (over \$2 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3964, these establishments accounted for 6 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Year <sup>1</sup>	Establishments		All employees		Production workers			Value added by manufacture	Cost of materials, fuels, etc.	Value of industry shipments	Capital expenditures, new	Gross value of fixed assets	End-of-year inventories	Specialization ratio	Coverage ratio

TABLE 1A. General Statistics: 1958 to 1972—Continued

(Footnotes for table 1A)

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3951	Industry 3952	Industry 3953	Industry 3955	Industry 3961	Industry 3962	Industry 3963	Industry 3964
1972.....	112	136	584	70	764	123	180	244
1967.....	113	123	561	87	763	319	227	262
1963.....	122	140	581	91	910	367	282	314

(NA) Not available. \*These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability. (Z) Less than half of the unit of measurement shown.

<sup>1</sup>For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

<sup>2</sup>The 1972 data on the new SIC basis are not directly comparable to 1972 and previous years' data on the old SIC basis because several establishments previously classified in industry 3953 are now included in industry 3951 (see table 1C). For industry 3951, the degree of change (based on total employment) between the new and old SIC's for 1972 is approximately 6 percent. For industry 3953, the degree of change (based on total employment) between the new and old SIC's for 1972 is approximately 8 percent.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee  (dollars)	Assets per employee  (dollars)	Production worker as percent of total employment (percent)	Annual men-hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials per dollar of shipments (dollars)	Cost of materials and payrolls per dollar shipments (dollars)	Assets per dollar of shipments (dollars)	Value added per employee (dollars)	Payrolls as percent of value added (percent)	Value added per man-hour of production worker (dollars)

(NA) Not available.

<sup>1</sup>The 1972 data on the new SIC basis are not directly comparable to 1972 and previous years' data on the old SIC basis because several establishments previously classified in industry 3953 are now included in industry 3951 (see table 1C).

1972 CENSUS OF MANUFACTURES

1972 CENSUS OF MANUFACTURES

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC				
	Establishments		All employees	Value added by manufacture	Value of shipments	Establishments		All employees	Value added by manufacture	Value of shipments
	Total	With 20 employees or more				Total	With 20 employees or more

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. These technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent      E3--30 to 39 percent      E5--50 to 59 percent      E7--70 to 79 percent      E9--90 to 99 percent  
 E2--20 to 29 percent      E4--40 to 49 percent      E6--60 to 69 percent      E8--80 to 89 percent      E0--100 percent

- Represents zero. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

<sup>1</sup>General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees      BB--250 to 499 employees      CC--500 to 999 employees      EE--1,000 to 2,499 employees      FF--2,500 employees and over

TABLE 4. General Statistics, by Employment Size of Establishment: 1972—Continued

(Footnotes for table 4)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent      E3--30 to 39 percent      E5--50 to 59 percent      E7--70 to 79 percent      E9--90 to 99 percent  
E2--20 to 29 percent      E4--40 to 49 percent      E6--60 to 69 percent      E8--80 to 89 percent      E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown.

<sup>1</sup>Report forms were not mailed to companies that operated only one establishment—generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product special- ization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

<sup>1</sup>1972 and 1967 data are not directly comparable (see table 1A, footnote 2).

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Pens and mechanical pencils (SIC 3951)	Lead pencils and art goods (SIC 3952)	Marking devices (SIC 3953)	Carbon paper and inked ribbons (SIC 3955)	Costume jewelry (SIC 3961)	Artificial flowers (SIC 3962)	Buttons (SIC 3963)	Needles, pins, and fasteners (SIC 3964)	Other industries

39640 00	Needles, pins and fasteners, n.s.k., for companies with 10 employees or more. (See note.).....	.....	(X)	24.2	(X)	20.9
39640 02	Needles, pins, and fasteners, n.s.k., for companies with less than 10 employees. (See note.).....	.....	(X)	9.2	(X)	5.2

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

(X) Not applicable. (NA) Not available.

<sup>1</sup>Broad-tipped markers, formerly in industry 3953 (product code 39530 43), are now included in industry 3951 (product code 39510 43). This product code shift out of industry 3953 represents approximately 11 percent of the total 1967 shipments of products in 3953. The product code shift into industry 3951 is approximately 8 percent of the total 1967 shipments of products in 3951.

<sup>2</sup>Data for fountain pens are included with "Miscellaneous pen and mechanical pencil parts" (product code 39510 63) to avoid disclosing data of individual companies.

<sup>3</sup>In 1967, data for product code 39610 11, Base metal rings and ring mountings, are included with product code 39610 98, Other costume jewelry, etc.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)		Product class and geographic area	Value of shipments (million dollars)

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)		Product class and geographic area	Value of shipments (million dollars)	
	1972	1967		1972	1967
NEEDLES, PINS, FASTENERS (EXCEPT SLIDE), AND SIMILAR NOTIONS (39642)			NEEDLES, PINS, FASTENERS (EXCEPT SLIDE), AND SIMILAR NOTIONS (39642)—Continued

- Represents zero. (NA) Not available.

<sup>1</sup>These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

<sup>2</sup>Broad-tipped markers, formerly in industry 3953 (product code 39530 43), are now included in industry 3951 (product code 3953 43). This product code shift out of industry 3953 represents approximately 11 percent of the total 1967 shipments of products in 3953. The product code shift into industry 3951 is approximately 8 percent of the total 1967 shipments of products in 3951.

# EXPLANATORY TEXT

## MISCELLANEOUS MANUFACTURES

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

3991—Brooms and Brushes

3993—Signs and Advertising Displays

3995—Burial Caskets

3996—Linoleum, Asphalted-Felt-Base, and Other Hard-Surface Floor Coverings, N.E.C.\*

3999—Manufacturing Industries, N.E.C.

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

## INDUSTRY 3991.—BROOMS AND BRUSHES

This industry comprises establishments primarily engaged in manufacturing household, industrial, and street sweeping brooms; and brushes. For a detailed list of products of industry 3991, refer to table 6A, product codes 39911 13 to 39913 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Brooms and Brushes Industry in 1972 totaled \$438 million. This included

shipments of brooms and brushes (primary products) valued at \$367 million, shipments of other products (secondary products) valued at \$32 million, and miscellaneous receipts (mainly resales) of \$39 million.

Shipments of brooms and brushes (primary products) in 1972 represented 92 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 90 percent. Secondary products shipped by this industry in 1972 consisted mainly of miscellaneous plastic products at \$16 million.

Shipments of brooms and brushes (primary products) from establishments classified in industry 3991 in 1972 represented 94 percent (coverage ratio) of these products valued at \$392 million shipped by all industries. In 1967, the coverage ratio was 92 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3991, these establishments accounted for 7 percent of value of shipments.

## INDUSTRY 3993.—SIGNS AND ADVERTISING DISPLAYS

This industry comprises establishments primarily engaged in manufacturing electrical, mechanical, cutout, or plate signs and advertising displays, including neon signs and advertising novelties. Sign painting shops doing business on a custom basis are classified in industry 7399. Establishments primarily engaged in manufacturing electric signal equipment are classified in industry 3662, and lighting fixtures in industry 3642. For a detailed list of products of industry 3993, refer to table 6A, product codes 39931 11 to 39933 11.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Signs and Advertising Displays Industry in 1972 totaled \$1,198 million. This included shipments of signs and advertising displays (primary products) valued at \$1,060 million, shipments of other products (secondary products) valued at \$22 million, and miscellaneous receipts (mainly resales) of \$117 million.

Shipments of signs and advertising displays (primary products) in 1972 represented 98 percent (specialization ratio) of

\*Note that the "short title" for this industry is used throughout the report.

the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 97 percent.

Shipments of signs and advertising displays (primary products) from establishments classified in industry 3993 in 1972 represented 97 percent (coverage ratio) of these products valued at \$1,089 million shipped by all industries. In 1967, the coverage ratio was 95 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3993, these establishments accounted for 22 percent of value of shipments.

#### **INDUSTRY 3995.—BURIAL CASKETS**

This industry comprises establishments primarily engaged in manufacturing caskets, coffins, burial cases, and coffin shipping cases, whether of wood or other material except concrete (industry 3272); morticians' supplies and accessories, such as gloves and slippers; and morticians' paraphernalia and equipment. For a detailed list of products of industry 3995, refer to table 6A, product codes 39951 13 to 39953 92.

The code number and title for this industry were changed in the 1972 revision of the SIC manual from the previous classification system. In 1967, this industry was SIC 3994, Morticians' Goods. Also, the content of the industry has been changed slightly. Data for embalming chemicals are now included in industry 2899, Chemical Preparations, N.E.C.; burial garments in industry 2389, Apparel and Accessories, N.E.C.; and innerliners, sold as such, in industry 2399, Fabricated Textile Products, N.E.C.

Establishments primarily engaged in producing other goods for use by morticians are classified on the basis of the project, such as burial garments in SIC Major Group 23.

Value of shipments and other receipts of the Burial Caskets Industry in 1972 totaled \$392 million. This included shipments of burial caskets (primary products) valued at \$382 million, shipments of other products (secondary products) valued at \$2 million, and miscellaneous receipts (mainly resales) of \$7 million.

Shipments of burial caskets (primary products) in 1972 represented 99 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 95 percent.

Shipments of burial caskets (primary products) from establishments classified in industry 3995 in 1972 represented 99 percent (coverage ratio) of these products valued at \$388

million shipped by all industries. In 1967, the coverage ratio was 98 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3995, these establishments accounted for 8 percent of value of shipments.

#### **INDUSTRY 3996.—HARD-SURFACE FLOOR COVERINGS (Short Title)**

This industry comprises establishments primarily engaged in manufacturing linoleum, asphalted-felt-base, and other hard-surface floor coverings, not elsewhere classified. Establishments primarily engaged in manufacturing rubber floor coverings are classified in industry 3069, and cork floor and wall tile, in industry 2499. For a detailed list of products of industry 3996, refer to table 6A, product codes 39960 11 to 39960 65.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Hard-Surface Floor Coverings Industry in 1972 totaled \$342 million. This included shipments of hard-surface floor coverings (primary products) valued at \$298 million, shipments of other products (secondary products) valued at \$38 million, and miscellaneous receipts (mainly resales) of \$6 million.

Shipments of hard-surface floor coverings (primary products) in 1972 represented 88 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 86 percent. Secondary products shipped by this industry in 1972 consisted mainly of asbestos products at \$20 to \$50 million.

Shipments of hard-surface floor coverings (primary products) from establishments classified in industry 3996 in 1972 represented 99 percent (coverage ratio) of these products valued at \$300 million shipped by all industries. In 1967, the coverage ratio was 97 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed

from industry averages. For industry 3996, these establishments accounted for under 1 percent of value of shipments.

**INDUSTRY 3999.—MANUFACTURING INDUSTRIES,  
N.E.C.**

This industry comprises establishments primarily engaged in manufacturing miscellaneous fabricated products, including beauty shop and barbershop equipment; hairwork; tobacco pipes and cigarette holders; coin-operated amusement machines; matches; candles; lampshades; dressed and dyed furs; umbrellas; parasols and canes; and other articles, not elsewhere classified. For a detailed list of products of industry 3999, refer to table 6A, product codes 39991 11 to 39999 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number is also the same.

Value of shipments and other receipts of the Manufacturing Industries, N.E.C., Industry in 1972 totaled \$1,540 million. This included shipments of manufacturing industries, not elsewhere classified, (primary products) valued at \$1,336 million,

shipments of other products (secondary products) valued at \$126 million, and miscellaneous receipts (mainly resales) of \$78 million.

Shipments of manufacturing industries not elsewhere classified (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 94 percent.

Shipments of manufacturing industries not elsewhere classified (primary products) from establishments classified in industry 3999 in 1972 represented 92 percent (coverage ratio) of these products valued at \$1,455 million shipped by all industries. In 1967, the coverage ratio was 90 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3999, these establishments accounted for 18 percent of value of shipments.

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3991	Industry 3993	Industry 3995	Industry 3996	Industry 3999
1972.....	430	3,221	474	18	3,309
1967.....	516	3,159	527	18	2,165
1963.....	628	3,165	581	13	(NA)

(NA) Not available. \*These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

<sup>1</sup>For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent  
E2--20 to 29 percent

E3--30 to 39 percent  
E4--40 to 49 percent

E5--50 to 59 percent  
E6--60 to 69 percent

E7--70 to 79 percent  
E8--80 to 89 percent

E9--90 to 99 percent  
E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

<sup>1</sup>General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. For States with 150 total employment and more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees

BB--250 to 499 employees

CC--500 to 999 employees

EE--1,000 to 2,499 employees

FF--2,500 employees and over

(See appendix, Explanation of Terms)

<sup>2</sup>The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent      E3--30 to 39 percent      E5--50 to 59 percent      E7--70 to 79 percent      E9--90 to 99 percent  
E2--20 to 29 percent      E4--40 to 49 percent      E6--60 to 69 percent      E8--80 to 89 percent      E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown.

<sup>1</sup>Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balance of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)
			Number (1,000)	Payroll (million dollars)	Number (1,000)	Man-hours (millions)	Wages (million dollars)

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

39990 00	Miscellaneous products, n.e.c., n.s.k., for establishments with 10 employees or more. (See note.).....		(X)	196.5	(X)	119.7
39990 02	Miscellaneous products, n.e.c., n.s.k., for establishments with less than 10 employees. (See note.).....		(X)	121.0	(X)	41.2

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available.

Footnotes continued on next page.

TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

(Footnotes for table 6A)--Continued

<sup>1</sup>Data for several products included in this industry in 1967 have been moved to other industries. These products are embalming chemicals, burial garments, and innerliners for caskets, sold as such. The value of these products in 1967 (\$20.6 million) was included with other mortician's supplies, including burial boxes, burial vaults, except metal and concrete, embalming chemicals, burial garments, casket shipping containers and cases, innerliners sold as such, and morticians' equipment and supplies.

<sup>2</sup>The product class structure for this industry was revised effective in 1972. The data for children-sized caskets and coffins are now included in product class 39953, whereas in 1967 they were included in product classes 39951 and 39952. However, the effect of this change is estimated to be less than 2 percent of the total for the industry.

<sup>3</sup>Data for product codes 39960 41 and 39960 51 are combined with product codes 39960 11, 39960 13, and 39960 25 to avoid disclosing figures for individual companies.

<sup>4</sup>1972 data for product codes 39960 33, 39960 35, and 39960 37 are included with product code 39960 61 to avoid disclosing figures for individual companies.

<sup>5</sup>Data for 1972 product code 39991 11, "Soda-acid"; 39991 15, "Vaporizing liquid (carbon tetrachloride base)"; and 39991 29, "All other hand portable extinguishers," have been combined with product code 39991 19, "Other extinguishers, including foam," to avoid disclosing figures for individual companies.

<sup>6</sup>Data for 1967, for product code 39991 15, "Vaporizing liquid (carbon tetrachloride base)," have been combined with product code 39991 19, "Other extinguishers, including foam," to avoid disclosing figures for individual companies.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

West Region.....	60.8	(NA)	Oregon.....	1.2	(NA)
Mountain Division.....	9.5	(NA)	California.....	45.5	(NA)
			Hawaii.....	2.7	(NA)

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9

CC.....\$5.0 to \$9.9

FF.....\$20.0 to \$49.9

BB.....\$2.0 to \$4.9

EE.....\$10.0 to \$19.9

GG.....\$50.0 and over

(NA) Not available.

<sup>1</sup>The individual product codes included in this class of products for 1972 differ significantly from 1967. Products shifting out of this class of products represent more than 15 percent of the total shipments value at the U.S. level.

<sup>2</sup>Product class 39953 is new for 1972 and consists of products shifting out of product classes 39951 and 39952.

<sup>1</sup>These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

<sup>2</sup>The individual product codes included in this class of products for 1972 differ significantly from prior years. Products shifting out of this class of products represent more than 15 percent of the total shipments value at the U.S. level.

<sup>3</sup>The individual product codes included in this class of products for 1972 were included in product classes 39951 and 39952 for 1971 and prior years.

Note: In 1967, data for manufactured mixed gas, blast furnace gas, and coke oven gas were included in code 131300, natural gas. In 1971, data for these gases were included in code 960011, other fuels.

- Represents zero. (X) Not applicable. (S) Withheld because the estimates did not meet publication standards.  
(Z) Less than half of the unit of measurement shown.

---

## APPENDIX A. Explanation of Terms

**Employment and Payrolls**—The census of manufactures provides information on employment and payrolls at operating establishments and central administrative offices and auxiliaries. On the standard forms for manufacturing establishments, the number of production workers by quarter and all other employees during the pay period including March 12 was requested. Form NC-X6, "Central Administrative Office or Auxiliary Establishment," called for employment as of March 12 only. Both forms called for salaries and wages paid for the year.

**All Employees**—This category comprises all full-time and part-time employees who worked or received pay for any part of the pay periods including the 12th of the months specified on the report forms. Included are all persons on paid sick leave, paid holidays, and paid vacations during these pay periods. Excluded are members of the Armed Forces and pensioners carried on the active rolls but not working during the period. Officers of corporations are included as employees; proprietors and partners of unincorporated firms, however, are excluded.

In special cases, respondents were instructed to exclude agricultural or fishery employment and related data from their reports. These were sugar mills operated as part of plantations, canning or freezing plants operated in conjunction with farms, and fish processing plants engaged in fishing.

**Production and Related Workers**—This category includes workers (up through the working foreman level) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial, watchman services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with these production operations at the establishment covered by the report. Supervisory employees above the working foreman level were excluded from this category.

**All Other Employees**—These are defined as nonproduction personnel, including employees engaged in the following activities: Factory supervision above the working foreman level, sales (including driver-salesmen), sales delivery (highway truckdrivers and their helpers), advertising, credit, collection, installation and servicing of own products, clerical and routine office functions, executive, purchasing, financing, legal, personnel (including cafeteria, medical, etc.), professional, and technical. Also included are employees on the payroll engaged in the construction of major additions or alterations to the plant and utilized as a separate work force.

**Average Employment**—The number of production workers as shown in the census tabulations is an average of the four quarterly figures reported by manufacturing plants. The "all employees" figure is the sum of this average and the reported number of other employees as of March 12.

**Payrolls**—This category includes the gross annual earnings of employees on the payroll. Respondents were told they could follow the definition of payrolls used for calculating the Federal withholding tax. This definition includes all forms of compensation such as salaries, wages, commissions, dismissal pay, bonuses, vacation and sick leave pay, and compensation in kind, prior to such deductions as employees' Social Security contributions, withholding taxes, group insurance, union dues, and savings bonds. The total includes salaries of officers of these establishments, if a corporation; it excludes payments to the proprietor or partners, if an unincorporated concern. Also excluded are payments to members of Armed Forces and pensioners carried on the active payroll.

The 1972 census definition of payrolls is identical to that recommended to all Federal statistical agencies by the Office of Management and Budget. This definition does not include supplementary labor costs such as employer's Social Security contributions and other legally required expenditures or payments for voluntary programs. Data on such supplementary labor costs were collected in the ASM and are scheduled for publication in the ASM reports, but are not included in the census reports.

**Man-Hours**—This total consists of all plant man-hours of production and related workers as defined above. It represents all man-hours at the plant including actual overtime hours—not straight-time equivalent hours. It excludes hours paid for vacations, holidays, or sick leave, when the employee was not actually at the plant. Where employees elected to work during the vacation period, the actual hours worked by such employees were reported.

**Cost of Materials, Etc., Consumed**—A summary inquiry on form MA-100 and the other manufacturing establishment report forms requested information on the cost of materials, supplies, semifinished goods, fuels, and electric energy actually consumed or put into production during the year and the cost of products purchased for resale, whether purchased, withdrawn from inventories, or received from other establishments of the company. Included, also, are the costs of materials supplied by the establishment which were processed elsewhere on contract for the establishment. "Cost" was defined as the direct charges actually paid or payable for items consumed or

put into production during the year, after discounts, and including freight charges and other direct charges incurred by the establishment in acquiring the materials.

To arrive at the industry total "cost of materials, etc.,"<sup>1</sup> separate figures were obtained for (a) the total delivered cost of all raw materials, semifinished goods, parts, components, containers, scrap, and supplies consumed or put into production, (b) the amount paid for electric energy purchased, (c) the amount paid for all fuels consumed for heat, power, or the generation of electricity, (d) the cost of work done by others on materials or parts furnished by the reporting establishment (contract work), and (e) the cost of products bought and resold in the same condition.

It should be noted that the cost of fuel consumed under (c), above, does not include fuel used as a material in the manufacturing process; for example, coal used in the production of coke. Such costs are included with other materials cost in category (a), above.

The total excludes the cost of services used, such as advertising, insurance, telephone, etc., and developmental, research, and consulting services of other establishments. It also excludes overhead costs, such as depreciation charges, rent, interest, royalties, etc., and materials, machinery, and equipment used in plant expansion or capitalized repairs which are chargeable to fixed assets accounts.

For materials received from other plants of the same company or from a central materials depot (whether at the same or different physical location), respondents were asked to value the items at their full economic value as produced, plus freight and other direct handling charges. The respondents were asked to check, where possible, that the cost equaled the value of shipments reported for the items by the company's plant which produced and transferred the goods, plus freight and other direct charges.

**Value of Shipments**—Except in a few industries, the respondents were instructed to report net selling values, f.o.b. plant, after discounts and allowances and excluding freight charges and excise taxes. For a few industries, specifically noted in the text of the industry chapters, Volume II, delivered prices were requested if delivery by employees of the establishment was a routine practice, as in the milk and bakery industries.

For most industries, value of shipments is readily available from accounting records and is closely related to the value of production. In a small group of industries, however, value of production or of work done was requested. This instruction was of particular importance in the aircraft and shipbuilding industries, where the shipments or deliveries of complete units

may be a poor approximation of the work actually done during a given year.

Manufacturers were asked to include as products shipped not only the products made in the establishment but also those made elsewhere under contract from the materials owned by the establishment. Included were all products sold, transferred to other parts of the same company, or shipped on consignment. The duplication in value of shipments and cost of materials arising because of the shipment of semifinished products among manufacturing plants is discussed in part III of the Introduction, which also includes comments on the valuation of intracompany shipments by multiunit firms.

**Miscellaneous Receipts**—In addition, manufacturers reported receipts for contract work performed for others, resales (that is, the value of all products resold without further processing), receipts for miscellaneous activities such as sale of scrap and refuse, and the value of installation and repair work performed by the plant employees. Although the value of products bought and resold without further processing is included in the value of shipments totals for each industry, it is excluded from the figures for individual products or classes of products.

**Value Added by Manufacture**—This figure is derived by subtracting the total cost of materials (including materials, supplies, fuel, electric energy, cost of resales, and contract work done by others) from the value of shipments, including resales, and other receipts and adjusting the resulting amount by the net change in finished products and work-in-process inventories between the beginning and end of the year.<sup>2</sup>

Value added avoids the duplication in the value of shipments figure which results from the inclusion of the shipments of establishments producing materials and components along with the shipments of establishments producing finished products. It is considered to be the best value measure available for comparing the relative economic importance of manufacturing among industries and geographic areas.

**Inventories**—The value of beginning-of-year and end-of-year inventories held by each manufacturing establishment was obtained in the 1972 census. Separate inventory figures were requested for (1) finished products, (2) work in process, and (3) materials, supplies, fuel, and other inventories.

Respondents were asked to report their inventories at approximate current costs, if feasible; otherwise, at book value. Since different methods of inventory valuation are used (LIFO, FIFO, etc.), the value of inventories aggregated for all

<sup>1</sup>In some tables, this category is designated simply as "cost of materials."

<sup>2</sup>For a few industries (for example, aircraft and shipbuilding) where value of work done is substituted for value of shipments, no adjustment is made for change in inventories. In a few other industries where value of production is collected, the inventory adjustment is made only on the basis of change in work-in-process inventories.

establishments in an industry is not precisely defined. The importance of reporting inventories on a comparable basis was emphasized in the instructions; thus the year-to-year change in inventories indicated by the census figures is of more significance than their level.

In using inventory data by stage of fabrication for all industries and at the 2-digit industry level, it should be noted that an item treated as a finished product by one establishment may be reported as a material by another establishment. For example, the finished product inventories of a steel mill would be reported as materials by a stamping plant. Such differences are present in the inventory figures by stage of fabrication for individual industries, industry groups, and all manufacturing, since these figures are merely aggregates of the figures reported by establishments.

Multiunit companies were instructed to include the inventories held by each establishment in that establishment's report. The inventory data tabulated on a geographic basis are believed, therefore, to reflect the actual physical holdings in each area, to the extent that the inventories were owned by the reporting companies. It is not clear where goods owned by one company and stored by another were reported.

Special instructions on inventories were issued for two industries in the food group. Meatpacking establishments were told to report work in process separately only if separate records were maintained; otherwise, to combine work in process with finished products. Distillers were instructed to include stocks of liquors held for aging as finished products, not as work in process.

**Capital Expenditures**—Under this heading, manufacturers were instructed to report expenditures of the type chargeable to fixed assets accounts for which depreciation reserves are normally maintained. Actual capital outlays during the year were requested, not the final value of equipment put in place or structures completed during the year. It was suggested to the respondents that capital expenditures, as thus defined, could be computed by the following formula: The cost of additions completed during the year, plus construction in progress at the end of the year, less construction in progress at the beginning of the year. It was specified that the census definition of capital expenditures was to be used in computing the gross value of fixed assets discussed below.

Capital expenditures include the cost of plant and equipment for replacement purposes, as well as for additions to productive capacity. Cost associated with plants under construction but not in operation during the year are also included. The method of collecting data for plants under construction is described in the Introduction, section 7, "Reporting Forms." Capital expenditures do not include plant

and equipment furnished to the manufacturer without charge by governmental or private organizations. The value of rented facilities is also excluded.

**New Structures and Additions to Plant**—This category includes all construction and other land improvements, whether built on contract or by the manufacturer's own labor force. Included are major alterations; capitalized repairs; new elevators, cranes, heating and air-conditioning equipment essentially a part of buildings; fixed structures such as blast furnaces, brick kilns, fractionating towers, and shipways; and land improvements such as roads, fences, parking lots, and railroad spurs.

**New Machinery and New Equipment**—This category includes production and all other machinery and equipment. Included are motors, lathes, presses, looms, and other production machinery; office machines and fixtures; furniture; and automobiles, trucks, and handling equipment. Major repairs or improvement to existing equipment are included if the cost is capitalized, as well as equipment manufactured by the plant for use in its own production.

**Used Plant and Equipment**—This category represents expenditures for old or existing plants and for secondhand equipment acquired from others. Transfers of used equipment between plants of multiunit companies are included. The companies were instructed to report such transfers at their current value rather than original cost. The Census Bureau estimates of capital expenditures as compared to those published in the joint Bureau of Economic Analysis—Securities and Exchange Commission survey are discussed in the Introduction.

**Fuels and Electric Energy**—Separate data were collected in the census for coal, coke, fuel oil, gas, and other fuels used for heat and power; purchased electric energy, electric energy generated by manufacturing establishments; and energy generated less the amount sold. Fuels used as a raw material (as coal in the production of coke) are included in the cost of materials rather than in the fuel category.

**Assets and Rents**—Data on the gross value of fixed assets owned and rental payments for leased fixed assets were collected in the ASM. These figures are schedule J for publication in the ASM series, but are not included in the census volumes.<sup>3</sup>

<sup>3</sup> Earlier reports on these topics include chapter 9 of volume I, Summary Statistics, in the 1958 census, and chapter 7 of the ASM volumes for 1964-1965, 1968-1969, and 1970-1971.

## APPENDIX B Composition of Industries in the 1972 Standard Industrial Classification

The censuses of manufactures for 1972 and 1967 covered all establishments engaged in manufacture as defined, respectively, in the **Standard Industrial Classification Manual (SIC)**, 1972 edition, issued by the Office of Management and Budget. The 1972 edition contained major revisions in the SIC Manual for the manufacturing industries additional to those issued between 1957 and 1967.

For 1972, of the 422 manufacturing industries as defined in 1967, 121 were changed in some manner in 1972. This

appendix cites only those industries affected by a revision between 1967 and 1972. Presented in two parts, this appendix lists, in part 1A, the industries as defined for 1972 in terms of their 1967 equivalents and, in part 2A, the industries of 1967 in terms of their 1972 equivalents. The distribution of the 1972 SIC industries among the 1967 SIC industries is shown in part 1B. The distribution of the 1967 SIC industries among the 1972 SIC industries is shown in part 2B.

### PART 1A. Comparability of 1972 SIC Industries to 1967 SIC Industries, Where Revisions Occurred to 1967 Industries

1972 industry		1967 industry	
SIC code	Short title	SIC code	Short title

<sup>1</sup> No change in content.

<sup>2</sup> The classification of separate establishments milling or otherwise preparing nonmetallic minerals in this division and in industry 3295 has been clarified. Industry 3295 will include only establishments crushing or grinding or otherwise preparing minerals mined in industry groups 145 and 149, and industry 1472. Establishments crushing or grinding minerals mined in industry groups 142 and 144 and industries 1473 to 1479 are included in those same industries.

<sup>1</sup> No change in content.

<sup>2</sup> The classification of separate establishments milling or otherwise preparing nonmetallic minerals in this division and in industry 3295 has been clarified. Industry 3295 will include only establishments crushing or grinding or otherwise preparing minerals mined in industry groups 145 and 149, and industry 1472. Establishments crushing or grinding minerals mined in industry groups 142 and 144 and industries 1473 to 1479 are included in those same industries.

## PART 2B. Distribution of 1967 SIC Industries Among 1972 SIC Industries—Continued

Industry code		Industry	Establishments		All employees	Value added by manufacture, adjusted
Old SIC	New SIC		Total	With 20 employees or more		
			(number)	(number)		
			(number)	(number)	(1,000)	(million dollars)
3531	3531	Construction machinery.....	748	387	133.8	3,130.7
3532	3532	Mining machinery.....	240	124	21.3	393.2
3533	3533	Oilfield machinery.....	315	159	35.9	788.6
3534	3534	Elevators and moving stairways.....	154	88	15.0	310.2
3535	3535	Conveyors and conveying equipment.....	492	243	27.2	540.1
3536	3536	Hoists, cranes, and monorails.....	188	92	16.3	274.7
3537	3537	Industrial trucks and tractors.....	380	135	25.8	524.7
3541	3541	Machine tools, metal-cutting types.....	894	275	52.5	901.7
3542	----	Machine tools, metal-forming types.....	383	162	24.1	417.7
	3542	Machine tools, metal-forming types.....	383	162	24.1	417.7
3544	3544	Special dies, tools, jigs, and fixtures.....	6,616	1,266	97.8	1,797.4
3545	3545	Machine tool accessories.....	1,231	413	46.7	876.1
3548	----	Metalworking machinery, n.e.c.....	528	237	47.1	908.8
	3546	Power driven handtools.....	88	65	23.1	434.5
	3547	Rolling mill machinery.....	47	38	10.4	206.4
	3549	Metalworking machinery, n.e.c.....	393	134	13.6	267.9
3551	3551	Food products machinery.....	688	290	31.9	605.2
3552	3552	Textile machinery.....	579	225	32.7	487.9
3553	3553	Woodworking machinery.....	242	109	13.7	285.1
3554	3554	Paper industries machinery.....	218	109	15.3	254.0
3555	3555	Printing trades machinery.....	574	173	23.9	503.6
3559	3559	Special industry machinery, n.e.c.....	1,384	525	72.6	1,596.1
3561	----	Pumps and compressors.....	643	324	78.5	1,563.1
	3561	Pumps and pumping equipment.....	559	260	55.5	1,095.6
	3563	Air and gas compressors.....	84	64	22.9	467.5
3562	3562	Ball and roller bearings.....	132	92	49.2	898.7
3564	3564	Blowers and fans.....	396	172	23.5	468.8
3565	3565	Industrial patterns.....	1,021	97	8.5	161.0
3566	----	Power transmission equipment.....	505	284	51.9	986.6
	3562	Ball and roller bearings.....	4	2	1.8	33.2
	3566	Speed changers, drives, and gears.....	346	155	22.5	409.0
	3568	Power transmission equipment, n.e.c.....	155	127	27.7	544.4
3567	3567	Industrial furnaces and ovens.....	266	108	13.6	244.3
3569	3569	General industrial machinery, n.e.c.....	901	360	37.0	697.7
3572	----	Typewriters.....	21	12	12.4	371.3
	3579	Office machines, n.e.c.....	21	12	12.5	371.3
3573	3573	Electronic computing equipment.....	602	355	144.8	3,497.6
3574	----	Calculating and accounting machines.....	82	33	23.2	421.6
	3574	Calculating and accounting machines.....	79	30	22.5	407.0
	3579	Office machines, n.e.c.....	3	3	.7	14.5
3576	----	Scales and balances.....	97	44	6.7	129.7
	3576	Scales and balances, except laboratory.....	97	44	6.7	129.7
3579	3579	Office machines, n.e.c.....	193	82	21.3	484.3
3581	3581	Automatic merchandising machines.....	125	48	10.5	183.4
3582	----	Commercial laundry equipment.....	110	49	5.2	93.6
	3582	Commercial laundry equipment.....	107	47	4.8	88.2
	3633	Household laundry equipment.....	3	2	.4	5.4
3585	----	Refrigeration machinery.....	735	415	141.2	3,326.9
	3585	Refrigeration and heating equipment.....	735	415	141.2	3,326.9
3586	3586	Measuring and dispensing pumps.....	57	33	7.2	134.1
3589	3589	Service industry machines, n.e.c.....	706	232	24.4	503.6
3599	----	Miscellaneous machinery, except electrical.....	16,411	2,022	186.2	3,055.8
	3293	Gaskets, packing and sealing devices.....	11	4	1.8	40.3
	3592	Carburetors, pistons, rings, valves.....	113	72	26.7	500.0
	3599	Machinery, except electrical, n.e.c.....	16,287	1,946	157.8	2,515.5
3611	----	Electric measuring instruments.....	653	271	55.6	1,059.4
	3612	Transformers.....	8	7	.9	15.9
	3825	Instruments to measure electricity.....	645	265	54.7	1,046.8

## APPENDIX B—Continued

## PART 2B. Distribution of 1967 SIC Industries Among 1972 SIC Industries—Continued

Industry code		Industry	Establishments		All employees	Value added by manufacture, adjusted
Old SIC	New SIC		Total	With 20 employees or more		
			(number)	(number)		
			(1,000)	(million dollars)

## APPENDIX C. Reporting Forms

This appendix contains reproductions of a representative selection of the reporting forms used in the 1972 economic censuses, with emphasis on the Census of Manufactures. The uses of each of them is described in the Introduction, section 7.

# APPENDIX C-Continued

DUPLICATE: 20 DAYS AFTER RECEIPT OF FORM

O.M.B. No. 41-R2751; Approval Expires December 31, 1974

<p>FORM NC-X1A (Item 1A) (7-60-75)</p>	<p>U.S. DEPARTMENT OF COMMERCE SOCIAL AND ECONOMIC STATISTICS ADMIN. BUREAU OF THE CENSUS</p> <p><b>1973 REPORT OF COMPANY ORGANIZATION</b></p>	<p><b>NOTICE</b> - Response to this inquiry is required by law (Title 13, U.S. Code). By the same law, your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.</p> <p>Refer to the <b>CENSUS FILE NUMBER</b> in any correspondence pertaining to this report</p> <p>Company name and address (Please correct any errors in name and address including ZIP code)</p>
<p>Please complete this report within 20 days after receipt and RETURN THIS COPY TO</p> <div style="float: right; text-align: right;"> <p>BUREAU OF THE CENSUS 1201 East Tenth Street Jeffersonville, Indiana 47130</p> </div>		
<p><b>NOTE</b> - The purpose of this form is to obtain an accurate and up-to-date list of your establishments, i.e., separate business locations that were in operation, or under construction during part or all of 1973. This list should include establishments of your company and each of its subsidiaries. To make it easier for you to complete this report, we have prelisted information that you have previously provided to the Census Bureau.</p> <p style="text-align: center;">READ THE INSTRUCTIONS ON THE REVERSE SIDE BEFORE COMPLETING THIS REPORT</p>		

**Item 1 - EMPLOYER IDENTIFICATION NUMBERS OF YOUR COMPANY AND ITS SUBSIDIARIES, AND THEIR 1973 EMPLOYMENT**

This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries in reporting either Federal employment taxes (IRS forms 941, 943, or CT-1) or Federal income returns (IRS forms 1065, 1120, 1120S, or 990C).

In Item 1A, based on Census records, we have prelisted (in numeric sequence) all EI numbers and their associated names and addresses where available. Bring this list up-to-date by correcting the prelisted EI number and name and address information in column (a), and completing columns (b) through (d) as indicated.

For some prelisted EI numbers, name and address information was not available. Please enter the name and address that applies in each case.

EI numbers of your company and its subsidiaries that are not prelisted in Item 1A should be added in Item 1B. If your company or any of its subsidiaries uses different EI numbers for reporting employment and income, be sure that there is a separate entry for each such EI number in either Item 1A or 1B.

Line No.	Employer Identification (EI) Number, name, and mailing address (Please correct any errors and supply missing information) (a)	Employees (during the pay period including March 12, 1973) (b)	Reporting status of EI number (c)	Status of company or subsidiary at the end of 1973 (Mark one box and complete as indicated) (d)
	<p>EMPLOYER IDENTIFICATION NUMBER</p> <p>NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p>	(Number)	<p>Did you report Federal employment taxes under this EI number during 1973?</p> <p>1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No</p>	<p>1 <input type="checkbox"/> Active 2 <input type="checkbox"/> Inactive - Date <input type="text"/> 3 <input type="checkbox"/> Sold - Mo./yr. of sale <input type="text"/> PURCHASER'S NAME <input type="text"/> NUMBER AND STREET <input type="text"/> CITY STATE ZIP CODE <input type="text"/> 4 <input type="checkbox"/> Other - Explain <input type="text"/></p>
	<p>EMPLOYER IDENTIFICATION NUMBER</p> <p>NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p>	(Number)	<p>Did you report Federal employment taxes under this EI number during 1973?</p> <p>1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No</p>	<p>1 <input type="checkbox"/> Active 2 <input type="checkbox"/> Inactive - Date <input type="text"/> 3 <input type="checkbox"/> Sold - Mo./yr. of sale <input type="text"/> PURCHASER'S NAME <input type="text"/> NUMBER AND STREET <input type="text"/> CITY STATE ZIP CODE <input type="text"/> 4 <input type="checkbox"/> Other - Explain <input type="text"/></p>
	<p>EMPLOYER IDENTIFICATION NUMBER</p> <p>NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p>	(Number)	<p>Did you report Federal employment taxes under this EI number during 1973?</p> <p>1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No</p>	<p>1 <input type="checkbox"/> Active 2 <input type="checkbox"/> Inactive - Date <input type="text"/> 3 <input type="checkbox"/> Sold - Mo./yr. of sale <input type="text"/> PURCHASER'S NAME <input type="text"/> NUMBER AND STREET <input type="text"/> CITY STATE ZIP CODE <input type="text"/> 4 <input type="checkbox"/> Other - Explain <input type="text"/></p>
	<p>EMPLOYER IDENTIFICATION NUMBER</p> <p>NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p>	(Number)	<p>Did you report Federal employment taxes under this EI number during 1973?</p> <p>1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No</p>	<p>1 <input type="checkbox"/> Active 2 <input type="checkbox"/> Inactive - Date <input type="text"/> 3 <input type="checkbox"/> Sold - Mo./yr. of sale <input type="text"/> PURCHASER'S NAME <input type="text"/> NUMBER AND STREET <input type="text"/> CITY STATE ZIP CODE <input type="text"/> 4 <input type="checkbox"/> Other - Explain <input type="text"/></p>
	<p>EMPLOYER IDENTIFICATION NUMBER</p> <p>NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p>	(Number)	<p>Did you report Federal employment taxes under this EI number during 1973?</p> <p>1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No</p>	<p>1 <input type="checkbox"/> Active 2 <input type="checkbox"/> Inactive - Date <input type="text"/> 3 <input type="checkbox"/> Sold - Mo./yr. of sale <input type="text"/> PURCHASER'S NAME <input type="text"/> NUMBER AND STREET <input type="text"/> CITY STATE ZIP CODE <input type="text"/> 4 <input type="checkbox"/> Other - Explain <input type="text"/></p>
	<p>EMPLOYER IDENTIFICATION NUMBER</p> <p>NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p>	(Number)	<p>Did you report Federal employment taxes under this EI number during 1973?</p> <p>1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No</p>	<p>1 <input type="checkbox"/> Active 2 <input type="checkbox"/> Inactive - Date <input type="text"/> 3 <input type="checkbox"/> Sold - Mo./yr. of sale <input type="text"/> PURCHASER'S NAME <input type="text"/> NUMBER AND STREET <input type="text"/> CITY STATE ZIP CODE <input type="text"/> 4 <input type="checkbox"/> Other - Explain <input type="text"/></p>

Enter All Additional Employer Identification Numbers in Item 1B and Complete Items 2 through 5

# APPENDIX C—Continued

## INSTRUCTIONS FOR COMPLETING FORM NC-X1A

### A. DEFINITIONS

- ▶ **Census File Number**—A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page of items 1A, 2, and 5A. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the pages used for any entries in items 1B or 5B.
- ▶ **Employer Identification Number**—The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by all business firms and other legal entities to file Federal employment tax returns such as Form 941, Employer's Quarterly Federal Tax Return and Federal Income Returns such as Form 1120, U.S. Corporation Income Tax Return, and Form 1065, U.S. Partnership Return of Income.
- ▶ **Company or Firm**—A legal entity, such as a sole proprietorship, partnership, corporation, cooperative, investment trust, etc., including both profit and non-profit organizations.
- ▶ **Establishment**—A single physical location within the United States and its territories where business is conducted or where services or industrial operations are performed. (For example: a factory, mill, store, hotel, movie theater, mine, farm, ranch, bank, railroad depot, airline terminal, sales office, warehouse, or central administrative office.) Where distinctly separate activities are performed at a single physical location (such as contract construction activities operated from the same physical location as a lumber yard), each activity should be treated as a separate establishment.

### SPECIAL INSTRUCTIONS FOR SELECTED INDUSTRIES AND OR ACTIVITIES

Please refer to the enclosed, separate booklet entitled, "Special Instructions" before completing forms.

These instructions include a general definition of an Establishment, Payroll, Central Administrative Office (CAD) and Auxiliary establishment, how to report Non-establishment Employees and special instructions for companies with activities falling in the below listed categories.

- Construction (general contractors, special trade contractors, subdividers, and operative builders)
- Oil and Gas Field Operations
- Manufacturing
- Transportation and Public Utilities
- Wholesale, Retail, and Selected Services
  - Commission Agent/Broker and Merchant Wholesaler, Liquor Stores (Government Operated), Reported by Agency or Officials), Appliance Sales by Public Utility companies, Department or Concessions, Leased Service Stations, Contract Food Operators, Mail Order Sales, Vending Machine Operations, and Direct Selling Operations (House to House), New Car Dealers, Automotive Rental and Leasing, Building Cleaning and Maintenance, Guard Service, Laundries, Dry Cleaners, Photofinishing Firms, Engineering (Consulting and Design), Liaison or Customer Contact Office.

- ▶ **Subsidiary**—A company which is owned or controlled by another firm or company. Subsidiaries include firms in which your company owns more than fifty percent of the outstanding voting stock, as well as affiliated firms in which your company has the power to direct or cause the direction of the management and policies.
- ▶ **Number of Employees During the Pay Period Including March 12, 1973**—All full-time and part-time employees on the payroll during the March 12 pay period. Include as employees all persons on paid sick leave, paid holidays, and paid vacations, include salaried officers and executives of incorporated firms. This definition is the same as the definition used for item 1 of Treasury Form 941, Employer's Quarterly Federal Tax Return.
- ▶ **Domestic Establishments**—Those establishments of your company and its subsidiaries that are physically located in the United States and its territories and possessions (Puerto Rico, Canal Zone, Virgin Islands, Guam, American Samoa, and Trust Territory of Pacific Islands).

### B. INSTRUCTIONS

- ▶ **Item 1—Employer Identification Numbers of Your Company and its Subsidiaries, and Their 1973 Employment**—This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries to report either Federal employment taxes (IRS forms 941, 943, or CT-1) or income returns (IRS forms 1065, 1120, 1120S, or 990C). If your company or any of its subsidiaries uses different EI numbers in reporting employment and income for the same legal entity, be sure there is a separate entry for each such number in either 1A or 1B.
- ▶ **Item 1A—Listing of Employer Identification Numbers (Based on Census Records)**—All EI numbers (based on Census records) have been prelisted in numeric sequence. Their associated names and addresses are also prelisted where available. If the EI number is currently used, correct any errors or omissions in the prelisted name and address in column (a); report in column (b) the number of employees on the payroll during the pay period including March 12, 1973; indicate in column (c) whether the EI number is used in reporting Federal employment taxes on IRS forms 941, 943, or CT-1. If the EI number is not used to file these IRS forms, column (b) should be zero. If the EI number is active, mark box "1" in column (d). If the EI number is no longer used by your company or its subsidiaries, but was used during the first quarter 1973 complete columns (b) and (c). In column (d) mark boxes 2-4 that apply. If operations previously reported under a prelisted EI number are now included under another EI number of your company, mark box "4" and indicate the item 1A or 1B EI number under which you are now reporting these activities. On the other hand, if you sold all the activities of a subsidiary but retained the EI number, mark box "3" and complete as indicated.
- ▶ **Item 1B—Your Listing of Additional Employer Identification Numbers**
  - Column (a)**—List separately each EI number not prelisted in item 1A that is currently used by your company or its domestic and foreign subsidiaries. Also enter the name and mailing address of the subsidiary.
  - Column (b)**—Report the number of employees during the pay period including March 12, 1973.
  - Column (c)**—Indicate whether the EI number is used to report Federal employment taxes; if not, column (b) should be zero.
  - Column (d)**—Mark the box which describes the reason for adding the EI number to the list. If you transferred operations from one EI number of your company and its subsidiaries to another EI number, mark box "1" and enter the former EI number. If you add a firm that was acquired through the purchase of stock, assets, etc., mark box "5" and report the date of purchase and the former owner's name and address. Also report this information for any subsidiary listed in item 1B that was specifically set up by your company to take over the operations of an acquired company, even though the acquired company was dissolved or liquidated.

Additional copies of items 1B, 2, and 5B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

- ▶ **Item 2—Reconciliation of Employment Reported by EI Numbers and by Establishments**—Complete this item after you have finished items 5A and 5B. This item is to provide you and the Bureau of the Census with a systematic procedure for determining if the updated list of establishments in items 5A and 5B account for ALL DOMESTIC ACTIVITIES of your company and its subsidiaries.

**Column (a)**—The Employer Identification (EI) Numbers are identical to those prelisted in item 1A. Bring this list up-to-date by making the corrections previously made in item 1A and adding any EI numbers that you added in item 1B.

**Column (b)**—Enter the corresponding number of employees for each EI number. If the EI number has no employees, enter "None."

**Column (c)**—For each EI number, enter the sum of the employment figures for each establishment of the EI number, as reported in both items 5A and 5B. Compare this figure with the entry in column (b) and enter the difference in column (d). Where differences in excess of 5% or 500 employees occur, examine the data that you reported in items 1A, 1B, 5A, and 5B for errors, omissions, or duplications.

If the difference still exists, please explain in column (e). In all cases except the three listed below, each EI number listed in items 1A or 1B should have at least one establishment listed in item 5A or 5B; conversely, each establishment listed in item 5A or 5B should have its EI number listed in item 1A or 1B. The three exceptions are:

1. If your company or any of its subsidiaries has been assigned an EI number covering activities wholly outside of the United States and its territories, it is not necessary to include the establishments covering these foreign activities in item 5A or 5B. Therefore, in completing item 2 for EI numbers assigned to your foreign activities, enter "Foreign" in column (b) and ignore columns (c) through (e).
2. If your company reports employment and income under different EI numbers for the same legal entity, you should report the establishments of this firm only once in item 5A or 5B with the EI number used to report employment taxes. In these cases, therefore, there will be no establishment in item 5A or 5B for the income EI number. In completing item 2 for these EI numbers, enter "None" in column (b) and indicate the appropriate employment tax EI number(s) in column (e).
3. If your company or any of its subsidiaries became inactive after March 12, 1973 pay period, complete columns (b)-(e). If there was an EI change or EI used only part of the year complete columns (b)-(e) if applicable.

- ▶ **Item 3—Company Affiliation**—If your company is owned or controlled by another company, i.e., your company is a subsidiary, enter the name, address and EI number of your parent company.

- ▶ **Item 4—Certification**—After you have finished all items on the report, complete the certification as indicated.

- ▶ **Item 5—Domestic Establishments of your Company and its Subsidiaries, and Their 1973 Employment**—This item should include an up-to-date list of all domestic establishments of your company and its subsidiaries as identified in items 1A and 1B. If more than one EI number is assigned to an establishment, report the employment tax EI number in items 5A and 5B. Except in these cases and for EI numbers used for activities wholly outside the United States and its territories and possessions, be sure there is at least one establishment in item 5A or 5B for each employment tax EI number listed in item 1A or 1B.

- ▶ **Item 5A—Listing of Domestic Establishments (Based on Census Records)**—Review each prelisted establishment. For establishments still in operation, correct any errors or omissions in the prelisted name, address, and EI number in column (a). Make sure that the address represents the ACTUAL PHYSICAL LOCATION, not a mailing address. If you assign a store or plant number to each of your establishments, please enter this number in the space provided. The major kind of business description in column (a) is based on information previously reported to the Census Bureau.

For each establishment still in operation, mark box "1" in column (c) and report employees and payroll in column (b). If the establishment has changed its location (moved), mark box "2" and make necessary corrections to column (a) by lining out the imprinted information and writing in the new information above it. For establishments no longer in business, mark box "3," "4," or "6" in column (c) to explain the reason for the deletion. If operations previously reported under a prelisted EI number are now included under another EI number of your company, do not report these changes as a "sale" but correct the EI number in column (a). If you ceased operations at a location and then sold the building, report these cases as "closed," mark box "4," and give the date of closing.

- ▶ **Item 5B—Your Listing of Additional Domestic Establishments**—List separately all domestic establishments of your company and its subsidiaries not prelisted in item 5A that are now in operation, under construction, or were in operation at any time during 1973. Please read the definition of an establishment above before completing this item.

**Column (a)**—Provide the EI number, name, and address of the physical location of each added establishment. If you have assigned a store or plant number to any of these locations, also enter this in the space provided. In all cases, be sure to provide complete address information including the number and street, city, State, ZIP code, and county.

**Column (b)**—Report the number of employees on the establishment payroll during the pay period including March 12, 1973. If the location had no employees during the pay period, enter "None." Report first quarter establishment payroll and annual payroll before deductions in thousands of dollars.

**Column (c)**—Mark one box which best describes the principal business activity during 1973, mark Auxiliary for any establishment primarily engaged in performing supporting services for your own or affiliated company rather than your customers or clients. Mark Central Administrative Offices (CAD) for an establishment primarily engaged in management and general administrative functions.

**Column (d)**—List in order of importance the principal products mined or made, kinds of retail or wholesale business, types of services performed or kind of construction work done and indicate the approximate percentage each was of your total receipts.

- ▶ **Instructions for (e) and (f)**—Answer question (e) for acquired establishments. Complete (f) if the establishment is not yet in operation. Enter month and year you expect it to begin operation and the expected employment when fully operational.

- ▶ **NOTE**—After you have completed item 5, please be sure to complete items 2, 3, and 4 before returning this form.

# APPENDIX C-Continued

DUE DATE: 20 DAYS AFTER RECEIPT OF FORM

O.M.B. No. 41-R2731; Approval Expires December 31, 1974

FORM NC-X1B (Item 1A)  
(7-60-78)

U.S. DEPARTMENT OF COMMERCE  
SOCIAL AND ECONOMIC STATISTICS ADMINISTRATION  
BUREAU OF THE CENSUS

## 1973 REPORT OF COMPANY ORGANIZATION

(This page includes Items 1A and 1B)

Please complete this report within 20 days  
after receipt and RETURN THIS COPY TO

BUREAU OF THE CENSUS  
1201 East Tenth Street  
Jeffersonville, Indiana 47130

**NOTE** - The purpose of this form is to obtain an accurate and up-to-date list of your establishments, i.e., separate business locations that were in operation, or under construction during part or all of 1973. This list should include establishments of your company and each of its subsidiaries. To make it easier for you to complete this report, we have prelisted information that you have previously provided to the Census Bureau.

READ THE INSTRUCTIONS ON THE REVERSE SIDE  
BEFORE COMPLETING THIS REPORT

**NOTICE** - Response to this inquiry is required by law (Title 13, U.S. Code). By the same law, your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.

Refer to this CENSUS FILE NUMBER in any correspondence pertaining to this report

Company name and address (Please correct any errors in name and address including ZIP code)

### Item 1 - EMPLOYER IDENTIFICATION NUMBERS OF YOUR COMPANY AND ITS SUBSIDIARIES, AND THEIR 1973 EMPLOYMENT

This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries in reporting either Federal employment taxes (IRS forms 941, 943, or CT-1) or Federal income returns (IRS forms 1065, 1120, 1120S, or 990C).

If your company or any of its subsidiaries uses different EI numbers for reporting employment and income, be sure that there is a separate entry for each such EI number in either Item 1A or 1B.

In Item 1A, based on Census records, we have prelisted (in numeric sequence) all EI numbers and their associated names and addresses where available. Bring this list up-to-date by correcting the prelisted EI number and name and address information in column (a), and completing columns (b) through (d) as indicated.

For some prelisted EI numbers, name and address information was not available. Please enter the name and address that applies in each case.

In Item 1B add EI numbers that are currently used by your company or its domestic and foreign subsidiaries that are not prelisted in Item 1A. List separately in column (a) all Employer Identification (EI) Numbers and their associated names and addresses used at any time during 1973. For each added EI number complete columns (b) through (d) as indicated.

If you need more space for adding EI numbers, you may request additional pages or use a blank sheet of paper following the same format shown below in Item 1B. At the top of each sheet enter "Item 1B continued" and your company name, address, and Census File Number.

### Item 1A - LISTING OF EMPLOYER IDENTIFICATION NUMBERS (BASED ON CENSUS RECORDS)

Line number	Employer Identification (EI) Number, name, and mailing address (Please correct any errors and supply missing information)	Employees (during the pay period including March 12, 1973)	Reporting status of EI number	Status of company or subsidiary at the end of 1973 (Mark one box and complete as indicated)
	(a)	(b)	(c)	(d)
	EMPLOYER IDENTIFICATION NUMBER NAME NUMBER AND STREET CITY STATE ZIP CODE	(Number)	Did you report Federal employment taxes under this EI number during 1973? 1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No	1 <input type="checkbox"/> Active 2 <input type="checkbox"/> Inactive - Date <input type="text"/> 3 <input type="checkbox"/> Sold - Mo./yr. of sale <input type="text"/> PURCHASER'S NAME NUMBER AND STREET CITY STATE ZIP CODE 4 <input type="checkbox"/> Other - Explain <input type="text"/>

Please Complete Items 2 through 4

## APPENDIX C—Continued

### INSTRUCTIONS FOR COMPLETING FORM NC-X1B

#### A. DEFINITIONS

- ▶ **Census File Number** — A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page of Items 1A, 2A, and 2B. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the pages used for any entries in item 2B.
- ▶ **Employer Identification Number** — The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by all business firms and other legal entities to file Federal employment tax returns such as Form 941, Employer's Quarterly Federal Tax Return and Federal Income Returns such as Form 1120, U.S. Corporation Income Tax Return, and Form 1065, U.S. Partnership Return of Income.
- ▶ **Company or Firm** — A legal entity, such as a sole proprietorship, partnership, corporation, cooperative, investment trust, etc., including both profit and non-profit organizations.
- ▶ **Establishment** — A single physical location within the United States and its territories where business is conducted or where services or industrial operations are performed. (For example: a factory, mill, store, hotel, movie theater, mine, farm, ranch, bank, railroad depot, airline terminal, sales office, warehouse, or central administrative office.) Where distinctly separate activities are performed at a single physical location (such as contract construction activities operated from the same physical location as a lumber yard), each activity should be treated as a separate establishment.

#### SPECIAL INSTRUCTIONS FOR SELECTED INDUSTRIES AND/OR ACTIVITIES

Please refer to the enclosed, separate booklet entitled, "Special Instructions" before completing forms.

These instructions include a general definition of an Establishment, Payroll, Central Administrative Office (CAO) and Auxiliary establishment, how to report Non-establishment Employees and special instructions for companies with activities falling in the below listed categories.

- Construction (general contractors, special trade contractors, subdividers, and operative builders)
- Oil and Gas Field Operations
- Manufacturing
- Transportation and Public Utilities
- Wholesale, Retail, and Selected Services — Commission Agent/Broker and Merchant Wholesaler, Liquor Stores (Government Operated Reported by Agency or Officials), Appliance Sales by Public Utility companies, Department or Concessionaire, Leased Service Stations, Contract Food Operators, Mail Order Sales, Vending Machine Operations, and Direct Selling Operations (House-to-House), New Car Dealers, Automotive Rental and Leasing, Building Cleaning and Maintenance, Guard Service, Laundries, Dry Cleaners, Photofinishing Firms, Engineering (Consulting and Design), Liaison or Customer Contact Office.
- ▶ **Subsidiary** — A company which is owned or controlled by another firm or company. Subsidiaries include firms in which your company owns more than fifty percent of the outstanding voting stock, as well as affiliated firms in which your company has the power to direct or cause the direction of the management and policies.
- ▶ **Number of Employees During the Pay Period Including March 12, 1973** — All full-time and part-time employees on the payroll during the March 12 pay period. Include as employees all persons on paid sick leave, paid holidays, and paid vacations; include salaried officers and executives of incorporated firms. This definition is the same as the definition used for Item 1 of Treasury Form 941, Employer's Quarterly Federal Tax Return.
- ▶ **Domestic Establishments** — Those establishments of your company and its subsidiaries that are physically located in the United States and its territories and possessions (Puerto Rico, Canal Zone, Virgin Islands, Guam, American Samoa, and Trust Territory of Pacific Islands).

#### B. INSTRUCTIONS

- ▶ **Item 1 — Employer Identification Numbers of Your Company and Its Subsidiaries, and Their 1973 Employment** — This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries to report either Federal employment taxes (IRS Forms 941, 943, or CT-1) or income returns (IRS Forms 1065, 1120, 1120S or 990C). If your company or any of its subsidiaries uses different EI numbers in reporting employment and income for the same legal entity, be sure there is a separate entry for each such number in either 1A or 1B.
- ▶ **Item 1A — Listing of Employer Identification Numbers (Based on Census Records)** — All EI numbers (based on Census records) have been prelisted in numeric sequence. Their associated names and addresses are also prelisted where available. If the EI number is currently used, correct any errors or omissions in the prelisted name and address in column (a); report in column (b) the number of employees on the payroll during the pay period including March 12, 1973; indicate in column (c) whether the EI number is used in reporting Federal employment taxes on IRS Forms 941, 943, or CT-1. If the EI number is not used to file these IRS forms, column (b) should be zero. If the EI number is active, mark box "1" in column (d). If the EI number is no longer used by your company or its subsidiaries, but was used during the first quarter 1973 complete columns (b) and (c). In column (d) mark boxes 2-4 that apply. If operations previously reported under a prelisted EI number are now included under another EI number of your company, mark box "4" and indicate the item 1A or 1B EI number under which you are now reporting these activities. On the other hand, if you sold all the activities of a subsidiary but retained the EI number, mark box "3" and complete as indicated.
- ▶ **Item 1B — Your Listing of Additional Employer Identification Numbers**
  - Column (a) — List separately each EI number not prelisted in Item 1A that is currently used by your company or its domestic and foreign subsidiaries. Also enter the name and mailing address of the subsidiary.
  - Column (b) — Report the number of employees during the pay period including March 12, 1973.
  - Column (c) — Indicate whether the EI number is used to report Federal employment taxes; if not, column (b) should be zero.
  - Column (d) — Mark the box which describes the reason for adding the EI number to the list. If you transferred operations from one EI number of your company and its subsidiaries to another EI number, mark box "7" and enter the former EI number. If you add a firm that was acquired through the purchase of stock, assets, etc., mark box "5" and report the date of purchase and the former owner's name and address. Also report this information for any subsidiary listed in Item 1B that was specifically set up by your company to take over the operations of an acquired company, even though the acquired company was dissolved or liquidated.

- ▶ **Item 2 — Domestic Establishments of your Company and Its Subsidiaries, and Their 1973 Employment** — This item should include an up-to-date list of all domestic establishments of your company and its subsidiaries as identified in items 1A and 1B. If more than one EI number is assigned to an establishment, report the employment tax EI number in items 2A and 2B. Except in these cases and for EI numbers used for activities wholly outside the United States and its territories and possessions, be sure there is at least one establishment in Item 2A or 2B for each employment tax EI number listed in item 1A or 1B.

- ▶ **Item 2A — Listing of Domestic Establishments (Based on Census Records)** — Review each prelisted establishment. For establishments still in operation, correct any errors or omissions in the prelisted name, address, and EI number in column (a). Make sure that the address represents the ACTUAL PHYSICAL LOCATION, not a mailing address. If you assign a store or plant number to each of your establishments, please enter this number in the space provided. Identify in the establishment name those Leased Departments operated in a retail or service store as "leased dept." or "leased concession." The major kind of business description in column (a) is based on information previously reported to the Census Bureau.

For each establishment still in operation, mark box "1" in column (c) and report employees and payroll in column (b). If the establishment has changed its location (moved), mark box "2" and make necessary corrections in column (a) by lining out the imprinted information and writing in the new information above it. For establishments no longer in business, mark box "3," "4," or "6" in column (c) to explain the reason for the deletion. If operations previously reported under a prelisted EI number are now included under another EI number of your company, do not report these changes as a "sale" but correct the EI number in column (a). If you ceased operations at a location and then sold the building, report these cases as "closed," mark box "4," and give the date of closing.

- ▶ **Item 2B — Your Listing of Additional Domestic Establishments** — List separately all domestic establishments of your company and its subsidiaries not prelisted in Item 2A that were in operation, or under construction, during part or all of 1973. Please read the definition of an establishment above before completing this item.

Column (a) — Provide the EI number, name, and address of the physical location of each added establishment. If you have assigned a store or plant number to any of these locations, also enter this in the space provided. In all cases, be sure to provide complete address information including the number and street, city, State, ZIP code, and county.

Column (b) — Report the number of employees on the establishment payroll during the pay period including March 12, 1973. If the location had no employees during the pay period, enter "none." Report first quarter establishment payroll and annual payroll before deductions in thousands of dollars.

Column (c) — Mark one box which best describes the principal business activity during 1973. Check Auxiliary for any establishment primarily engaged in performing supporting services for your own or affiliated company rather than your customers or clients. Check Central Administrative Offices (CAO) for an establishment primarily engaged in management and general administrative functions.

Column (d) — List in order of importance the principal products mined or made, kinds of retail or wholesale business, types of services performed or kind of construction work done and indicate the approximate percentage each was of your total receipts.

Instructions for (e) and (f) — Answer question (e) for acquired establishments. Complete (f) if the establishment is not yet in operation. Enter month and year you expect it to begin operation and the expected employment when fully operational.

Note — After you have completed item 2, please be sure to complete Items 2C, 3, and 4 before returning this form.

- ▶ **Item 2C — Reconciliation of Employment Reported by EI Numbers and by Establishments** — Complete this item after you have finished Items 2A and 2B. This item is to provide you and the Bureau of the Census with a systematic procedure for determining if the updated list of establishments in Items 2A and 2B account for ALL DOMESTIC ACTIVITIES of your company and its subsidiaries.

Column (a) — The Employer Identification (EI) Numbers are identical to those prelisted in Item 1A. Bring this list up-to-date by making the corrections previously made in Item 1A and adding any EI numbers that you added in Item 1B.

Column (b) — Enter the corresponding number of employees for each EI number. If the EI number has no employees, enter "None."

Column (c) — For each EI number, enter the sum of the employment figures for each establishment of the EI number, as reported in both Items 2A and 2B. Compare this figure with the entry in column (b) and enter the difference in column (d). Where differences in excess of \$% or 500 employees occur, examine the data that you reported in Items 1A, 1B, 2A, and 2B for errors, omissions, or duplications. If the difference still exists, please explain in column (e). In all cases except the three listed below, each EI number listed in Item 1A or 1B should have at least one establishment listed in item 2A or 2B; conversely, each establishment listed in item 2A or 2B should have its EI number listed in item 1A or 1B. There are three exceptions are:

1. If your company or any of its subsidiaries has been assigned an EI number covering activities wholly outside of the United States and its territories, it is not necessary to include the establishments covering these foreign activities in item 2A or 2B. Therefore, in completing item 2C for EI numbers assigned to your foreign activities, enter "Foreign" in column (b) and ignore columns (c) through (e).
2. If your company reports employment and income under different EI numbers for the same legal entity, you should report the establishments of this firm only once in item 2A or 2B with the EI number used to report employment taxes. In these cases, therefore, there will be no establishment in item 2A or 2B for the income EI number. In completing item 2C for these EI numbers, enter "None" in column (b) and indicate the appropriate employment tax EI number(s) in column (e).
3. If your company or any of its subsidiaries became inactive after March 12, 1973 pay period, complete columns (b)-(e). If there was an EI change or EI used only part of the year complete columns (b)-(e) if applicable.

- ▶ **Item 3 — Company Affiliation** — If your company is owned or controlled by another company, i.e., your company is a subsidiary, enter the name, address and EI number of your parent company.

- ▶ **Item 4 — Certification** — After you have finished all items on the report, complete the certification as indicated.

Additional copies of items 1B and 2B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

## APPENDIX C—Continued

[illegible]

Please Complete Items 2 through 5

## APPENDIX C-Continued

### INSTRUCTIONS FOR COMPLETING FORM NC-X1A

#### A. DEFINITIONS

- ▶ **Census File Number** - A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page of items 1A, 2, and 5A. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the pages used for any entries in items 1B or 5B.
- ▶ **Employer Identification Number** - The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by all business firms and other legal entities to file Federal employment tax returns such as Form 941, Employer's Quarterly Federal Tax Return and Federal Income Returns such as Form 1120, U.S. Corporation Income Tax Return, and Form 1065, U.S. Partnership Return of Income.  
**Company or Firm** - A legal entity, such as a sole proprietorship, partnership, corporation, cooperative, investment trust, etc., including both profit and non-profit organizations.
- ▶ **Establishment** - A single physical location within the United States and its territories where business is conducted or where services or industrial operations are performed. (For example: a factory, mill, store, hotel, movie theater, mine, farm, ranch, bank, railroad depot, airline terminal, sales office, warehouse, or central administrative office.) Where distinctly separate activities are performed at a single physical location (such as contract construction activities operated from the same physical location as a lumber yard), each activity should be treated as a separate establishment.

#### SPECIAL INSTRUCTIONS FOR SELECTED INDUSTRIES AND/OR ACTIVITIES

Please refer to the enclosed, separate booklet entitled, "Special Instructions" before completing forms.

These instructions include a general definition of an Establishment, Payroll, Central Administrative Office (CAO) and Auxiliary establishment, how to report Non-establishment Employees and special instructions for companies with activities falling in the below listed categories.

- Construction (general contractors, special trade contractors, subdividers, and operative builders)
- Oil and Gas Field Operations
- Manufacturing
- Transportation and Public Utilities
- Wholesale, Retail, and Selected Services
  - Commission Agent/Broker and Merchant Wholesaler, Liquor Stores (Government Operated Reported by Agency or Officials), Appliance Sales by Public Utility companies, Department or Concessions, Leased Service Stations, Contract Food Operators, Mail Order Sales, Vending Machine Operations, and Direct Selling Operations (House to House), New Car Dealers, Automotive Rental and Leasing, Building Cleaning and Maintenance, Guard Service, Laundries, Dry Cleaners, Photofinishing Firms, Engineering (Consulting and Design), Liaison or Customer Contact Office.
- ▶ **Subsidiary** - A company which is owned or controlled by another firm or company. Subsidiaries include firms in which your company owns more than fifty percent of the outstanding voting stock, as well as affiliated firms in which your company has the power to direct or cause the direction of the management and policies.
- ▶ **Number of Employees During the Pay Period Including March 12, 1973** - All full-time and part-time employees on the payroll during the March 12 pay period. Include as employees all persons on paid sick leave, paid holidays, and paid vacations; include salaried officers and executives of incorporated firms. This definition is the same as the definition used for item 1 of Treasury Form 941, Employer's Quarterly Federal Tax Return.
- ▶ **Domestic Establishments** - Those establishments of your company and its subsidiaries that are physically located in the United States and its territories and possessions (Puerto Rico, Canal Zone, Virgin Islands, Guam, American Samoa, and Trust Territory of Pacific Islands).

#### B. INSTRUCTIONS

- ▶ **Item 1 - Employer Identification Numbers of Your Company and its Subsidiaries, and Their 1973 Employment** - This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries to report either Federal employment taxes (IRS forms 941, 943, or CT-1) or income returns (IRS forms 1065, 1120, 1120S, or 990C).  
If your company or any of its subsidiaries uses different EI numbers in reporting employment and income for the same legal entity, be sure there is a separate entry for each such number in either 1A or 1B.
- ▶ **Item 1A - Listing of Employer Identification Numbers (Based on Census Records)** - All EI numbers (based on Census records) have been prelisted in numeric sequence. Their associated names and addresses are also prelisted where available.  
If the EI number is currently used, correct any errors or omissions in the pre-listed name and address in column (a); report in column (b) the number of employees on the payroll during the pay period including March 12, 1973; indicate in column (c) whether the EI number is used in reporting Federal employment taxes on IRS forms 941, 943, or CT-1. If the EI number is not used to file these IRS forms, column (b) should be zero. If the EI number is active, mark box "1" in column (d).  
If the EI number is no longer used by your company or its subsidiaries, but was used during the first quarter 1973 complete columns (b) and (c). In column (d) mark boxes 2-4 that apply. If operations previously reported under a prelisted EI number are now included under another EI number of your company, mark box "4" and indicate the item 1A or 1B EI number under which you are now reporting these activities. On the other hand, if you sold all the activities of a subsidiary but retained the EI number, mark box "3" and complete as indicated.
- ▶ **Item 1B - Your Listing of Additional Employer Identification Numbers**  
**Column (a)** - List separately each EI number not prelisted in item 1A that is currently used by your company or its domestic and foreign subsidiaries. Also enter the name and mailing address of the subsidiary.  
**Column (b)** - Report the number of employees during the pay period including March 12, 1973.  
**Column (c)** - Indicate whether the EI number is used to report Federal employment taxes; if not, column (b) should be zero.  
**Column (d)** - Mark the box which describes the reason for adding the EI number to the list. If you transferred operations from one EI number of your company and its subsidiaries to another EI number, mark box "7" and enter the former EI number. If you add a firm that was acquired through the purchase of stock, assets, etc., mark box "8" and report the date of purchase and the former owner's name and address. Also report this information for any subsidiary listed in item 1B that was specifically set up by your company to take over the operations of an acquired company, even though the acquired company was dissolved or liquidated.

Additional copies of items 1B, 2, and 5B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

- ▶ **Item 2 - Reconciliation of Employment Reported by EI Numbers and by Establishments** - Complete this item after you have finished items 5A and 5B. This item is to provide you and the Bureau of the Census with a systematic procedure for determining if the updated list of establishments in items 5A and 5B account for ALL DOMESTIC ACTIVITIES of your company and its subsidiaries.

**Column (a)** - The Employer Identification (EI) Numbers are identical to those prelisted in item 1A. Bring this list up-to-date by making the corrections previously made in item 1A and adding any EI numbers that you added in item 1B.

**Column (b)** - Enter the corresponding number of employees for each EI number. If the EI number has no employees, enter "None."

**Column (c)** - For each EI number, enter the sum of the employment figures for each establishment of the EI number, as reported in both items 5A and 5B. Compare this figure with the entry in column (b) and enter the difference in column (d). Where differences in excess of 5% or 500 employees occur, examine the data that you reported in items 1A, 1B, 5A, and 5B for errors, omissions, or duplications.

If the difference still exists, please explain in column (e). In all cases except the three listed below, each EI number listed in items 1A or 1B should have at least one establishment listed in item 5A or 5B; conversely, each establishment listed in item 5A or 5B should have its EI number listed in item 1A or 1B. The three exceptions are:

1. If your company or any of its subsidiaries has been assigned an EI number covering activities wholly outside of the United States and its territories, it is not necessary to include the establishments covering these foreign activities in item 5A or 5B. Therefore, in completing item 2 for EI numbers assigned to your foreign activities, enter "Foreign" in column (b) and ignore columns (c) through (e).
2. If your company reports employment and income under different EI numbers for the same legal entity, you should report the establishments of this firm only once in item 5A or 5B with the EI number used to report employment taxes. In these cases, therefore, there will be no establishment in item 5A or 5B for the income EI number. In completing item 2 for these EI numbers, enter "None" in column (b) and indicate the appropriate employment tax EI number(s) in column (e).
3. If your company or any of its subsidiaries became inactive after March 12, 1973 pay period, complete columns (b)-(e). If there was an EI change or EI used only part of the year complete columns (b)-(e) if applicable.

- ▶ **Item 3 - Company Affiliation** - If your company is owned or controlled by another company, i.e., your company is a subsidiary, enter the name, address and EI number of your parent company.

- ▶ **Item 4 - Certification** - After you have finished all items on the report, complete the certification as indicated.

- ▶ **Item 5 - Domestic Establishments of your Company and its Subsidiaries, and Their 1973 Employment** - This item should include an up-to-date list of all domestic establishments of your company and its subsidiaries as identified in items 1A and 1B. If more than one EI number is assigned to an establishment, report the employment tax EI number in items 5A and 5B. Except in these cases and for EI numbers used for activities wholly outside the United States and its territories and possessions, be sure there is at least one establishment in item 5A or 5B for each employment tax EI number listed in item 1A or 1B.

- ▶ **Item 5A - Listing of Domestic Establishments (Based on Census Records)** - Review each prelisted establishment. For establishments still in operation, correct any errors or omissions in the prelisted name, address, and EI number to column (a). Make sure that the address represents the ACTUAL PHYSICAL LOCATION, not a mailing address. If you assign a store or plant number to each of your establishments, please enter this number in the space provided. The major kind of business description in column (a) is based on information previously reported to the Census Bureau.

For each establishment still in operation, mark box "1" in column (c) and report employees and payroll in column (b). If the establishment has changed its location (moved), mark box "2" and make necessary corrections in column (a) by lining out the imprinted information and writing in the new information above it. For establishments no longer in business, mark box "3," "4," or "6" in column (c) to explain the reason for the deletion. If operations previously reported under a prelisted EI number are now included under another EI number of your company, do not report these changes as a "sale" but correct the EI number to column (a). If you ceased operations at a location and then sold the building, report these cases as "closed," mark box "4," and give the date of closing.

- ▶ **Item 5B - Your Listing of Additional Domestic Establishments** - List separately all domestic establishments of your company and its subsidiaries not prelisted in item 5A that are now in operation, under construction, or were in operation at any time during 1973. Please read the definition of an establishment above before completing this item.

**Column (a)** - Provide the EI number, name, and address of the physical location of each added establishment. If you have assigned a store or plant number to any of these locations, also enter this in the space provided. In all cases, be sure to provide complete address information including the number and street, city, State, ZIP code, and county.

**Column (b)** - Report the number of employees on the establishment payroll during the pay period including March 12, 1973. If the location had no employees during the pay period, enter "None." Report first quarter establishment payroll and annual payroll before deductions in thousands of dollars.

**Column (c)** - Mark one box which best describes the principal business activity during 1973, mark Auxiliary for any establishment primarily engaged in performing supporting services for your own or affiliated company rather than your customers or clients. Mark Central Administrative Offices (CAO) for an establishment primarily engaged in management and general administrative functions.

**Column (d)** - List in order of importance the principal products mined or made, kinds of retail or wholesale business, types of services performed or kind of construction work done and indicate the approximate percentage each was of your total receipts.

- ▶ **Instructions for (e) and (f)** - Answer question (e) for acquired establishments. Complete (f) if the establishment is not yet in operation. Enter month and year you expect it to begin operation and the expected employment when fully operational.

- ▶ **NOTE** - After you have completed Item 5, please be sure to complete items 2, 3, and 4 before returning this form.

# APPENDIX C-Continued

FORM NC-X1B (Item 2A)		U.S. DEPARTMENT OF COMMERCE SOCIAL AND ECONOMIC STATISTICS ADMIN. BUREAU OF THE CENSUS		Refer to this CENSUS FILE NUMBER in any correspondence pertaining to this report	
1973 REPORT OF COMPANY ORGANIZATION					
<p><b>Item 2 - DOMESTIC ESTABLISHMENTS OF YOUR COMPANY AND ITS SUBSIDIARIES, AND THEIR 1973 EMPLOYMENT AND PAYROLL</b></p> <p>This item should include an up-to-date list of all domestic establishments (business locations) of your company and its subsidiaries as identified in Items 1A and 1B that were in operation or under construction, during part or all of 1973. Exclude establishments in foreign countries; include establishments in all territories and possessions (Puerto Rico, Virgin Islands, Canal Zone, Guam, American Samoa and Trust Territory of Pacific Islands).</p> <p>In Item 2A we have prelisted establishments of your company and its subsidiaries, based on Census records. Bring this list up-to-date by correcting any errors or omissions in the prelisted information in column (a).</p> <p>and completing columns (b) and (c) as indicated. Establishments not prelisted in Item 2A should be listed by you in Item 2B.</p> <p>If more than one EI number is assigned to this establishment, report the employment tax EI number in item 2A or 2B. Ordinarily, there should be at least one establishment in item 2A or 2B for each employment tax EI number listed in Item 1A or 1B; if not, please explain in Item 2C.</p> <p><b>NOTE:</b> For your convenience in locating establishments prelisted below, they are grouped in the following sequence: Employer Identification Number, major kind of business, State, and city.</p>					
<p><b>Item 2A - LISTING OF DOMESTIC ESTABLISHMENTS (BASED ON CENSUS RECORDS)</b></p>					
Line number	Employer Identification (EI) Number, major kind of business, establishment name, and address of physical location (including county and ZIP code) (Add store or plant number, if any, and correct any errors or omissions) (a)		1973 Establishment data Report number of employees and payroll (\$1,000) for each establishment including part year operations (b)		Status of establishment at the end of 1973 (Mark one box and complete as indicated) (c)

Enter All Additional Establishments in Item 2B; Then Complete Items 2C, 3, and 4

## APPENDIX C—Continued

### INSTRUCTIONS FOR COMPLETING FORM NC-X1B

#### A. DEFINITIONS

- ▶ **Census File Number** — A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page of items 1A, 2A, and 2B. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the pages used for any entries in item 2B.
- ▶ **Employer Identification Number** — The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by all business firms and other legal entities to file Federal employment tax returns such as Form 941, Employer's Quarterly Federal Tax Return and Federal Income Returns such as Form 1120, U.S. Corporation Income Tax Return, and Form 1065, U.S. Partnership Return of Income.
- Company or Firm** — A legal entity, such as a sole proprietorship, partnership, corporation, cooperative, investment trust, etc., including both profit and non-profit organizations.
- ▶ **Establishment** — A single physical location within the United States and its territories where business is conducted or where services or industrial operations are performed. (For example: a factory, mill, store, hotel, movie theater, mine, farm, ranch, bank, railroad depot, airline terminal, sales office, warehouse, or central administrative office.) Where distinctly separate activities are performed at a single physical location (such as contract construction activities operated from the same physical location as a lumber yard), each activity should be treated as a separate establishment.

#### SPECIAL INSTRUCTIONS FOR SELECTED INDUSTRIES AND/OR ACTIVITIES

Please refer to the enclosed, separate booklet entitled, "Special Instructions" before completing forms.

These instructions include a general definition of an Establishment, Payroll, Central Administrative Office (CAO) and Auxiliary establishment, how to report Non-establishment Employees and special instructions for companies with activities falling in the below listed categories.

- Construction (general contractors, special trade contractors, subdividers, and operative builders)
- Oil and Gas Field Operations
- Manufacturing
- Transportation and Public Utilities
- Wholesale, Retail, and Selected Services — Commission Agent/Broker and Merchant Wholesaler, Liquor Stores (Government Operated Reported by Agency or Officials), Appliance Sales by Public Utility companies, Department or Concessions, Leased Service Stations, Contract Food Operators, Mail Order Sales, Vending Machine Operations, and Direct Selling Operations (House-to-House), New Car Dealers, Automotive Rental and Leasing, Building Cleaning and Maintenance, Guard Service, Laundries, Dry Cleaners, Photofinishing Firms, Engineering (Consulting and Design), Liaison or Customer Contact Office.
- ▶ **Subsidiary** — A company which is owned or controlled by another firm or company. Subsidiaries include firms in which your company owns more than fifty percent of the outstanding voting stock, as well as affiliated firms in which your company has the power to direct or cause the direction of the management and policies.
- ▶ **Number of Employees During the Pay Period Including March 12, 1973** — All full-time and part-time employees on the payroll during the March 12 pay period. Include as employees all persons on paid sick leave, paid holidays, and paid vacations; include salaried officers and executives of incorporated firms. This definition is the same as the definition used for item 1 of Treasury Form 941, Employer's Quarterly Federal Tax Return.
- ▶ **Domestic Establishments** — Those establishments of your company and its subsidiaries that are physically located in the United States and its territories and possessions (Puerto Rico, Canal Zone, Virgin Islands, Guam, American Samoa, and Trust Territory of Pacific Islands).

#### B. INSTRUCTIONS

- ▶ **Item 1 — Employer Identification Numbers of Your Company and its Subsidiaries, and Their 1973 Employment** — This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries to report either Federal employment taxes (IRS Forms 941, 943, or CT-1) or income returns (IRS Forms 1065, 1120, 1120S or 990C). If your company or any of its subsidiaries uses different EI numbers in reporting employment and income for the same legal entity, be sure there is a separate entry for each such number in either 1A or 1B.
- ▶ **Item 1A — Listing of Employer Identification Numbers (Based on Census Records)** — All EI numbers (based on Census records) have been prelisted in numeric sequence. Their associated names and addresses are also prelisted where available. If the EI number is currently used, correct any errors or omissions in the prelisted name and address in column (a); report in column (b) the number of employees on the payroll during the pay period including March 12, 1973; indicate in column (c) whether the EI number is used in reporting Federal employment taxes on IRS Forms 941, 943, or CT-1. If the EI number is not used to file these IRS forms, column (b) should be zero. If the EI number is active, mark box "1" in column (d). If the EI number is no longer used by your company or its subsidiaries, but was used during the first quarter 1973 complete columns (b) and (c). In column (d) mark boxes 2-4 that apply. If operations previously reported under a prelisted EI number are now included under another EI number of your company, mark box "4" and indicate the item 1A or 1B EI number under which you are now reporting these activities. On the other hand, if you sold all the activities of a subsidiary but retained the EI number, mark box "3" and complete as indicated.
- ▶ **Item 1B — Your Listing of Additional Employer Identification Numbers**
  - Column (a) — List separately each EI number not prelisted in item 1A that is currently used by your company or its domestic and foreign subsidiaries. Also enter the name and mailing address of the subsidiary.
  - Column (b) — Report the number of employees during the pay period including March 12, 1973.
  - Column (c) — Indicate whether the EI number is used to report Federal employment taxes; if not, column (b) should be zero.
  - Column (d) — Mark the box which describes the reason for adding the EI number to the list. If you transferred operations from one EI number of your company and its subsidiaries to another EI number, mark box "7" and enter the former EI number. If you add a firm that was acquired through the purchase of stock, assets, etc., mark box "5" and report the date of purchase and the former owner's name and address. Also report this information for any subsidiary listed in item 1B that was specifically set up by your company to take over the operations of an acquired company, even though the acquired company was dissolved or liquidated.

- ▶ **Item 2 — Domestic Establishments of your Company and its Subsidiaries, and Their 1973 Employment** — This item should include an up-to-date list of all domestic establishments of your company and its subsidiaries as identified in items 1A and 1B. If more than one EI number is assigned to an establishment, report the employment tax EI number in items 2A and 2B. Except in these cases and for EI numbers used for activities wholly outside the United States and its territories and possessions, be sure there is at least one establishment in item 2A or 2B for each employment tax EI number listed in item 1A or 1B.
- ▶ **Item 2A — Listing of Domestic Establishments (Based on Census Records)** — Review each prelisted establishment. For establishments still in operation, correct any errors or omissions in the prelisted name, address, and EI number in column (a). Make sure that the address represents the ACTUAL PHYSICAL LOCATION, not a mailing address. If you assign a store or plant number to each of your establishments, please enter this number in the space provided. Identify in the establishment name those Leased Departments operated in a retail or service store as "leased dept." or "leased concession." The major kind of business description in column (a) is based on information previously reported to the Census Bureau.

For each establishment still in operation, mark box "1" in column (c) and report employees and payroll in column (b). If the establishment has changed its location (moved), mark box "2" and make necessary corrections in column (a) by lining out the imprinted information and writing in the new information above it. For establishments no longer in business, mark box "3," "4," or "6" in column (c) to explain the reason for the deletion. If operations previously reported under a prelisted EI number are now included under another EI number of your company, do not report these changes as a "sale" but correct the EI number in column (a). If you ceased operations at a location and then sold the building, report these cases as "closed," mark box "4," and give the date of closing.

- ▶ **Item 2B — Your Listing of Additional Domestic Establishments** — List separately all domestic establishments of your company and its subsidiaries not prelisted in item 2A that were in operation, or under construction, during part or all of 1973. Please read the definition of an establishment above before completing this item.

**Column (a)** — Provide the EI number, name, and address of the physical location of each added establishment. If you have assigned a store or plant number to any of these locations, also enter this in the space provided. In all cases, be sure to provide complete address information including the number and street, city, State, ZIP code, and county.

**Column (b)** — Report the number of employees on the establishment payroll during the pay period including March 12, 1973. If the location had no employees during the pay period, enter "none." Report first quarter establishment payroll and annual payroll before deductions in thousands of dollars.

**Column (c)** — Mark one box which best describes the principal business activity during 1973. Check **Box 1** for any establishment primarily engaged in performing supporting services for your own or affiliated company rather than your customers or clients. Check **Box 2** for an establishment primarily engaged in management and general administrative functions.

**Column (d)** — List in order of importance the principal products mined or made, kinds of retail or wholesale business, types of services performed or kind of construction work done and indicate the approximate percentage each was of your total receipts.

**Instructions for (e) and (f)** — Answer question (e) for acquired establishments. Complete (f) if the establishment is not yet in operation. Enter month and year you expect it to begin operation and the expected employment when fully operational.

**Note** — After you have completed item 2, please be sure to complete items 2C, 3, and 4 before returning this form.

- ▶ **Item 2C — Reconciliation of Employment Reported by EI Numbers and by Establishments** — Complete this item after you have finished items 2A and 2B. This item is to provide you and the Bureau of the Census with a systematic procedure for determining if the updated list of establishments in items 2A and 2B account for ALL DOMESTIC ACTIVITIES of your company and its subsidiaries.

**Column (a)** — The Employer Identification (EI) Numbers are identical to those prelisted in item 1A. Bring this list up-to-date by making the corrections previously made in item 1A and adding any EI numbers that you added in item 1B.

**Column (b)** — Enter the corresponding number of employees for each EI number. If the EI number has no employees, enter "None."

**Column (c)** — For each EI number, enter the sum of the employment figures for each establishment of the EI number, as reported in both items 2A and 2B. Compare this figure with the entry in column (b) and enter the difference in column (d). Where differences in excess of 5% or 500 employees occur, examine the data that you reported in items 1A, 1B, 2A, and 2B for errors, omissions, or duplications. If the difference still exists, please explain in column (e). In all cases except the three listed below, each EI number listed in item 1A or 1B should have at least one establishment listed in item 2A or 2B; conversely, each establishment listed in item 2A or 2B should have its EI number listed in item 1A or 1B. The three exceptions are:

1. If your company or any of its subsidiaries has been assigned an EI number covering activities wholly outside of the United States and its territories, it is not necessary to include the establishments covering these foreign activities in item 2A or 2B. Therefore, in completing item 2C for EI numbers assigned to your foreign activities, enter "Foreign" in column (b) and ignore columns (c) through (e).
2. If your company reports employment and income under different EI numbers for the same legal entity, you should report the establishments of this firm only once in item 2A or 2B with the EI number used to report employment taxes. In these cases, therefore, there will be no establishment in item 2A or 2B for the income EI number. In completing item 2C for these EI numbers, enter "None" in column (b) and indicate the appropriate employment tax EI number(s) in column (e).
3. If your company or any of its subsidiaries became inactive after March 12, 1973 pay period, complete columns (b)-(e). If there was an EI change or EI used only part of the year complete columns (b)-(e) if applicable.

- ▶ **Item 3 — Company Affiliation** — If your company is owned or controlled by another company, i.e., your company is a subsidiary, enter the name, address and EI number of your parent company.

- ▶ **Item 4 — Certification** — After you have finished all items on the report, complete the certification as indicated.

Additional copies of items 1B and 2B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

# APPENDIX C-Continued

DUPLICATE DATE: 20 DAYS AFTER RECEIPT OF FORM

O.M.B. No. 41-R2751; Approval Expires December 31, 1974

<p><b>FORM NC-X1C (Item 1A)</b> (7-80-78)</p> <p style="text-align: center;"><b>1973 REPORT OF COMPANY ORGANIZATION</b> (This page includes Items 1A and 1B)</p> <p>Please complete this report within 20 days after receipt and RETURN THIS COPY TO  <b>BUREAU OF THE CENSUS</b> 1201 East Tenth Street Jeffersonville, Indiana 47130</p> <p><b>NOTE</b> - The purpose of this form is to obtain an accurate and up-to-date list of your establishments, i.e., separate business locations that were in operation, or under construction during part or all of 1973. To make it easier for you to complete this report, we have pre-listed information that you have previously provided to the Census Bureau.</p> <p style="text-align: center;"><b>READ THE INSTRUCTIONS ON THE REVERSE SIDE BEFORE COMPLETING THIS REPORT</b></p>	<p><b>NOTICE</b> - Response to this inquiry is required by law (Title 13, U.S. Code). By the same law, your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.</p> <p>Refer to this <b>CENSUS FILE NUMBER</b> in any correspondence pertaining to this report </p> <p>Company name and address (Please correct any errors in name and address including ZIP code)</p>
---	--

**Item 1 - EMPLOYER IDENTIFICATION NUMBERS OF YOUR COMPANY AND ITS SUBSIDIARIES, AND THEIR 1973 EMPLOYMENT**

This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries in reporting either Federal employment taxes (IRS Forms 941, 943, or CT-1) or Federal income returns (IRS Forms 1065, 1120, 1120S, or 990C).

In Item 1A, based on Census records, we have pre-listed your company's EI number and name and address. Please make any corrections necessary to update these entries. Also complete columns (b) and (c) as indicated.

In Item 1B add EI numbers that are currently used by your company that are not pre-listed in Item 1A. List separately in column (a) all Employer Identification (EI) Numbers and their associated names and addresses. For each added EI number complete columns (b) and (c) as indicated.

If you need more space for adding EI numbers, you may request additional pages or use a blank sheet of paper following the same format shown below in Item 1B. At the top of each sheet enter "Item 1B continued" and your company name, address, and Census File Number.

**Item 1A - LISTING OF YOUR EMPLOYER IDENTIFICATION NUMBER (BASED ON CENSUS RECORDS)**

Line No.	Employer Identification (EI) Number, name, and mailing address (Please correct any errors and supply missing information)	Employees (during the pay period including March 12, 1973)	Status of company or subsidiary at the end of 1973 (Mark one box and complete as indicated)
	(a)	(b)	(c)

Instructions on Reverse Side

## APPENDIX C—Continued

### INSTRUCTIONS FOR COMPLETING FORM NC-X1C

#### A. DEFINITIONS

- ▶ **Census File Number** — A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page which contains prelisted information. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the page(s) used for any entries to Item 2B.
- ▶ **Employer Identification Number** — The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by employers to file Quarterly Federal Tax Return (IRS 941) and Federal income returns (such as Form 1120, U.S. Corporation Income Tax Return and Form 1065, U.S. Partnership Return of Income).
- ▶ **Establishment** — A single physical location where business is conducted or services performed.
- ▶ **Subsidiary** — Another company that is owned or controlled by your firm.
- ▶ **Number of Employees During the Pay Period Including March 12, 1973** — All full-time and part-time employees on the payroll during the March 12 pay period. Report the same number of employees you reported on IRS Employers Form 941 or 943.
- ▶ **Payroll** — The gross earnings paid to employees prior to any deductions.

#### B. INSTRUCTIONS

- ▶ **Item 1 — Employer Identification Numbers of Your Company and Its Subsidiaries, and Their 1973 Employment** — List all Employer Identification (EI) Numbers used by your company to report either Federal employment (IRS Form 941, 942 or 943) or income (IRS Forms 1065, 1120, 1120S or 990C).
- ▶ **Item 1A — Listing of Your Employer Identification Number (Based on Census Records)** — We have listed your EI number as reported to the Census Bureau in the past. Please correct any errors or omissions in the prelisted name and address in column (a) and complete columns (b) and (c). If the EI number was only used to report employment and income for part of 1973, enter the part year information and the status of the company at the end of the year.
- ▶ **Item 1B — Your List of Additional Employer Identification Numbers** — If you purchased another company or organized a subsidiary company, enter each additional EI number in Item 1B and complete columns (b) and (c) for each EI number. In column (c) mark the box which describes the reason for adding the EI number to the list.
- ▶ **Item 2A — Establishments of Your Company and Its Subsidiaries, and Their 1973 Employment and Payroll** — We have prelisted the individual business locations (establishments) that make up the EI number in Item 1A. Please correct the name or address if necessary and complete columns (b) and (c) for each location. Estimates are acceptable if book figures are not readily available.
- ▶ **Item 2B — Your Listing of Additional Domestic Establishments** — If you added additional business locations under your original EI number, report in Item 2B for each location. Also, if you added additional EI numbers in Item 1A, list the individual locations for each EI number in Item 2B. The addresses should represent the physical location, not a mailing address. If your employment and payroll records are not kept for individual locations, estimate for the separate locations. Report First Quarter establishment payroll and Annual payroll in thousands of dollars.

EXAMPLE — If figure is \$25,428.28:

• PREFERRED METHOD  $\longrightarrow \frac{25}{(\$1,000)}$

Column (c) — Mark one box which best describes the principal business activity during 1973. In column (d) enter the most important products you sell or the major service you offer. Be as specific as possible for the correct industrial classification of your operations.

- ▶ **Item 3 — Company Affiliation** — If your company is owned or controlled by another company, i.e., your company is considered a subsidiary, enter the name, address, and EI number of your parent company.
- ▶ **Item 4 — Certification** — After you have finished all items on the report, complete the certification as indicated.

Additional copies of items 1B and 2B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

# APPENDIX C—Continued

Form NC-X1C (Item 2A) 17-50-733		U.S. DEPARTMENT OF COMMERCE SOCIAL AND ECONOMIC STATISTICS ADMINISTRATION BUREAU OF THE CENSUS		Refer to this CENSUS FILE NUMBER in any correspondence pertaining to this report	
1973 REPORT OF COMPANY ORGANIZATION					
Item 2 — DOMESTIC ESTABLISHMENTS OF YOUR COMPANY AND ITS SUBSIDIARIES, AND THEIR 1973 EMPLOYMENT AND PAYROLL					
<p>This item should include an up-to-date list of all domestic establishments (business locations) of your company and its subsidiaries that were in operation, or under construction, during part or all of 1973.</p> <p>In Item 2A we have prelisted establishments of your company based on Census records. Bring this list up-to-date by correcting any errors or</p>			<p>omissions in the prelisted information in column (a) and completing columns (b) and (c) as indicated. Establishments not prelisted in Item 2A should be listed by you in Item 2B.</p> <p>Be sure that there is at least one establishment in Item 2A or 2B for your company and each subsidiary listed in Items 1A and 1B.</p>		
Item 2A — LISTING OF DOMESTIC ESTABLISHMENTS (BASED ON CENSUS RECORDS)

Enter All Additional Establishments in Item 2B; Then Complete Items 3 and 4

## APPENDIX C—Continued

### INSTRUCTIONS FOR COMPLETING FORM NC-X1C

#### A. DEFINITIONS

- ▶ **Census File Number** — A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page which contains prelisted information. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the page(s) used for any entries in Item 2B.
- ▶ **Employer Identification Number** — The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by employers to file Quarterly Federal Tax Return (IRS 941) and Federal income returns (such as Form 1120, U.S. Corporation Income Tax Return and Form 1065, U.S. Partnership Return of Income).
- ▶ **Establishment** — A single physical location where business is conducted or services performed.
- ▶ **Subsidiary** — Another company that is owned or controlled by your firm.
- ▶ **Number of Employees During the Pay Period including March 12, 1973** — All full-time and part-time employees on the payroll during the March 12 pay period. Report the same number of employees you reported on IRS Employers Form 941 or 943.
- ▶ **Payroll** — The gross earnings paid to employees prior to any deductions.

#### B. INSTRUCTIONS

- ▶ **Item 1 — Employer Identification Numbers of Your Company and Its Subsidiaries, and Their 1973 Employment** — List all Employer Identification (EI) Numbers used by your company to report either Federal employment (IRS Form 941, 942 or 943) or income (IRS Forms 1065, 1120, 1120S or 990C).
- ▶ **Item 1A — Listing of Your Employer Identification Number (Based on Census Records)** — We have listed your EI number as reported to the Census Bureau in the past. Please correct any errors or omissions in the prelisted name and address in column (a) and complete columns (b) and (c). If the EI number was only used to report employment and income for part of 1973, enter the part year information and the status of the company at the end of the year.
- ▶ **Item 1B — Your List of Additional Employer Identification Numbers** — If you purchased another company or organized a subsidiary company, enter each additional EI number in Item 1B and complete columns (b) and (c) for each EI number. In column (c) mark the box which describes the reason for adding the EI number to the list.
- ▶ **Item 2A — Establishments of Your Company and Its Subsidiaries, and Their 1973 Employment and Payroll** — We have prelisted the individual business locations (establishments) that make up the EI number in Item 1A. Please correct the name or address if necessary and complete columns (b) and (c) for each location. Estimates are acceptable if book figures are not readily available.
- ▶ **Item 2B — Your Listing of Additional Domestic Establishments** — If you added additional business locations under your original EI number, report in Item 2B for each location. Also if you added additional EI numbers in Item 1A, list the individual locations for each EI number in Item 2B. The addresses should represent the physical location, not a mailing address. If your employment and payroll records are not kept for individual locations, estimate for the separate locations. Report First Quarter establishment payroll and Annual payroll in thousands of dollars.

EXAMPLE — If figure is \$25,428.28:

• PREFERRED METHOD  $\longrightarrow \frac{25}{(\$1,000)}$

Column (c) — Mark one box which best describes the principal business activity during 1973. In column (d) enter the most important products you sell or the major service you offer. Be as specific as possible for the correct industrial classification of your operations.

- ▶ **Item 3 — Company Affiliation** — If your company is owned or controlled by another company, i.e., your company is considered a subsidiary, enter the name, address, and EI number of your parent company.
- ▶ **Item 4 — Certification** — After you have finished all items on the report, complete the certification as indicated.

Additional copies of items 1B and 2B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

Also, be sure to fill in the Census File Number in the upper right-hand corner of the page(s) used for any entries in item 2B.
- ▶ **Employer Identification Number** — The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by employers to file Quarterly Federal Tax Return (IRS 941) and Federal income returns (such as Form 1120, U.S. Corporation Income Tax Return and Form 1065, U.S. Partnership Return of Income).
- ▶ **Establishment** — A single physical location where business is conducted or services performed.
- ▶ **Subsidiary** — Another company that is owned or controlled by your firm.
- ▶ **Number of Employees During the Pay Period including March 12, 1973** — All full-time and part-time employees on the payroll during the March 12 pay period. Report the same number of employees you reported on IRS Employers Form 941 or 943.
- ▶ **Payroll** — The gross earnings paid to employees prior to any deductions.

#### B. INSTRUCTIONS

- ▶ **Item 1 — Employer Identification Numbers of Your Company and its Subsidiaries, and Their 1973 Employment** — List all Employer Identification (EI) Numbers used by your company to report either Federal employment (IRS Form 941, 942 or 943) or income (IRS Forms 1065, 1120, 1120S or 990C).
- ▶ **Item 1A — Listing of Your Employer Identification Number (Based on Census Records)** — We have listed your EI number as reported to the Census Bureau in the past. Please correct any errors or omissions in the prelisted name and address in column (a) and complete columns (b) and (c). If the EI number was only used to report employment and income for part of 1973, enter the part year information and the status of the company at the end of the year.
- ▶ **Item 1B — Your List of Additional Employer Identification Numbers** — If you purchased another company or organized a subsidiary company, enter each additional EI number in item 1B and complete columns (b) and (c) for each EI number. In column (c) mark the box which describes the reason for adding the EI number to the list.
- ▶ **Item 2A — Establishments of Your Company and its Subsidiaries, and Their 1973 Employment and Payroll** — We have prelisted the individual business locations (establishments) that make up the EI number in item 1A. Please correct the name or address if necessary and complete columns (b) and (c) for each location. Estimates are acceptable if book figures are not readily available.
- ▶ **Item 2B — Your Listing of Additional Domestic Establishments** — If you added additional business locations under your original EI number, report in item 2B for each location. Also if you added additional EI numbers in item 1A, list the individual locations for each EI number in item 2B. The addresses should represent the physical location, not a mailing address. If your employment and payroll records are not kept for individual locations, estimate for the separate locations. Report First Quarter establishment payroll and Annual payroll in thousands of dollars.

EXAMPLE — If figure is \$25,428.28:

• PREFERRED METHOD →  $\frac{25}{(\$1,000)}$

Column (c) — Mark one box which best describes the principal business activity during 1973. In column (d) enter the most important products you sell or the major service you offer. Be as specific as possible for the correct industrial classification of your operations.

- ▶ **Item 3 — Company Affiliation** — If your company is owned or controlled by another company, i.e., your company is considered a subsidiary, enter the name, address, and EI number of your parent company.
- ▶ **Item 4 — Certification** — After you have finished all items on the report, complete the certification as indicated.

Additional copies of items 1B and 2B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

FORM NC-X3 (10300)

Page 2

## Section B - OPERATIONS OF ESTABLISHMENT DURING 1972

<b>Item 1 - PHYSICAL LOCATION OF BUSINESS ESTABLISHMENT</b>											
<p>The purpose of this inquiry is to determine the place (city, county, etc.) where your business is actually located (which may differ from the mailing address) so that data can be tabulated in the correct geographic area.</p> <p>a. Is this business establishment <b>PHYSICALLY</b> located at the address shown in the address box of this form?</p> <p><input type="checkbox"/> YES - Answer b and c      <input type="checkbox"/> NO - Enter PHYSICAL location Also answer b and c</p>		<p><b>PHYSICAL LOCATION</b></p> <p>If location cannot be described by street name and number, give as much information as possible such as name of shopping center, street intersection, highway number or distance from nearest town, etc.</p> <p>Street name and number</p> <p>Place (City or village, etc.)      State      ZIP code</p>									
<p>b. Is this business establishment located <b>WITHIN</b> the LEGAL boundaries of the city, village, etc., which you indicate is its <b>PHYSICAL</b> location?</p> <p><input type="checkbox"/> YES      <input type="checkbox"/> NO</p>		<p>c. In what county is this business establishment <b>PHYSICALLY</b> located?</p> <p>County</p>									
<b>Item 2 - EMPLOYER IDENTIFICATION NUMBER</b>											
<p>a. Is the Employer Identification (E.I.) Number printed in the upper right of the address box the <b>SAME</b> as that used for this establishment on your latest 1972 Employer's Quarterly Federal Tax Return, Treasury Form 941?</p> <p><input type="checkbox"/> YES      <input type="checkbox"/> NO → Enter current E.I. number (9 digits)</p>		<p>b. Did this establishment also use any other Employer Identification (E.I.) Number during 1972?</p> <p><input type="checkbox"/> YES → Enter E.I. number or numbers (9 digits)      <input type="checkbox"/> NO</p>									
<b>Item 3 - PERIOD OPERATED IN 1972</b>											
<p>a. Was this establishment in business at the end of 1972?</p> <p>If establishment was inactive during December 1972 due to seasonal or part-time operations, answer "Yes" unless it was not owned by you at the end of the year.</p> <p><input type="checkbox"/> YES      <input type="checkbox"/> NO</p>		<p>b. How many months during 1972 did you own this establishment?</p> <p>030      031</p>									
<p><i>Important - Please read</i></p> <p>Dollar figures should be reported as illustrated. Please be careful to enter your figures in the correct columns. See example below.</p> <p>EXAMPLE: If figure is \$1,125,628.28 →</p> <table style="width:100%; border-collapse: collapse;"> <tr> <td style="text-align: center;">PREFERRED method . . . .</td> <td style="text-align: center;">1</td> <td style="text-align: center;">125</td> <td style="text-align: center;">628</td> </tr> <tr> <td style="text-align: center;">Acceptable method . . . . .</td> <td style="text-align: center;">1</td> <td style="text-align: center;">125</td> <td style="text-align: center;">628</td> </tr> </table>				PREFERRED method . . . .	1	125	628	Acceptable method . . . . .	1	125	628
PREFERRED method . . . .	1	125	628

<b>ITEM 6 PAYROLL AND EMPLOYMENT AT THIS ESTABLISHMENT DURING 1972</b>																																																	
<b>a. Payroll</b> — Report the payroll of persons employed at this establishment, including its traveling personnel. Do not include the payroll of employees working in or from other establishments of your company, however, even though paid from this location. (The number and payroll of such employees should be included in the 1972 Census reports for the establishments at which they were actually employed.)																																																	
<b>b. Employment by function</b> — Report the number of employees employed at this establishment according to the principal functions performed during the pay period including March 12, 1972.																																																	
Where records do not provide actual employee counts in terms of the functions listed, estimates of the approximate number in each are acceptable. Those persons performing a variety of functions should be reported in their primary activity during that pay period, or allocated on some other reasonable and consistent basis (e.g., by converting the total number of man-hours or man-days expended during the pay period into the average number of employees in each activity).																																																	
<b>a. Payroll during 1972.</b> (Enter the total wages, salaries, bonuses, commissions, and other remuneration paid to employees of this establishment during 1972, before payroll deductions) <span style="float: right;">Key</span>																																																	
<b>b. Employment by function for pay period including March 12, 1972</b> <span style="float: right;">Key</span>																																																	
(1) Centralized administration (e.g., various management functions of a general, home, or district office) <span style="float: right;">051</span>																																																	
(2) Research, development, and testing <span style="float: right;">052</span>																																																	
(3) Warehousing <span style="float: right;">053</span>																																																	
(4) Sales to customers directly from this location <span style="float: right;">054</span>																																																	
(5) Trading stamp redemption <span style="float: right;">055</span>																																																	
(6) Electronic data processing <span style="float: right;">056</span>																																																	
(7) Other — Specify <span style="float: right;">057</span>																																																	
(8) TOTAL NUMBER OF EMPLOYEES (Sum of lines 1 through 7) <span style="float: right;">058</span>																																																	
<b>c. Were the employees and payroll reported above also reported in any other 1972 Census establishment report form of your company i.e., in the Census Forms MA-, MC-, CB-, or CC- series?</b> <input type="checkbox"/> Yes — If "Yes," please give the 11-digit CENSUS FILE NUMBER of that report <span style="float: right;">059</span> <input type="checkbox"/> No

ITEM 7 SALES MADE BY THIS ESTABLISHMENT DURING 1972 TO CUSTOMERS OUTSIDE YOUR COMPANY		Key	Mil.	Thou.	Dols.												
<p>a. Report all sales made by this establishment during 1972 (merchandise sales, receipts for services, and other business receipts) to customers outside your company. Include excise taxes and sales taxes paid directly to taxing agencies. Exclude intracompany transfers to other domestic establishments of your company; however, include export transfers to your foreign subsidiaries. Exclude sales to outside customers made by OTHER establishments of your company, even though billed centrally by this establishment. (Report such sales on the 1972 Census forms of these other establishments.)</p> <p>b. List principal products sold or services rendered by this establishment to customers outside your company, and their approximate percent of 1972 sales and receipts, as reported in item 7a above.</p> <table border="1"> <thead> <tr> <th>Principal products sold or services rendered</th> <th>Percent of sales and receipts in 1972</th> <th>Principal products sold or services rendered</th> <th>Percent of sales and receipts in 1972</th> </tr> </thead> <tbody> <tr> <td>(1)</td> <td>%</td> <td>(3)</td> <td>%</td> </tr> <tr> <td>(2)</td> <td>%</td> <td>(4)</td> <td>%</td> </tr> </tbody> </table>		Principal products sold or services rendered	Percent of sales and receipts in 1972	Principal products sold or services rendered	Percent of sales and receipts in 1972	(1)	%	(3)	%	(2)	%	(4)	%	060			
Principal products sold or services rendered	Percent of sales and receipts in 1972	Principal products sold or services rendered	Percent of sales and receipts in 1972														
(1)	%	(3)	%														
(2)	%	(4)	%														
<p>ITEM 8 BILLINGS BY THIS ESTABLISHMENT IN 1972 TO RETAIL STORES OF YOUR COMPANY</p> <p>Report at cost value all merchandise billed by this establishment in 1972 to retail stores of your company. Include all billings, whether or not the merchandise was shipped directly by the supplier to your retail stores or shipped from this establishment. Exclude purchases made directly by your individual stores. Exclude billings to establishments other than your retail stores. Exclude sales to retail stores of other companies, and franchise sales (which should be reported in item 7a above.)</p>		<p>Total billings by this establishment in 1972 to retail stores of your company</p> <p>065</p>															
<p>ITEM 9 INVENTORIES AT BEGINNING AND END OF 1972</p> <p>Report all inventories of this establishment at current cost (if feasible), rather than sales price. Exclude inventories reported by other establishments of your company on their 1972 Census establishment forms.</p>		<p>Value of inventories of this establishment:</p> <p>a. BEGINNING of 1972 066</p> <p>b. END of 1972 069</p>															
<p>ITEM 10 CAPITAL EXPENDITURES FOR THIS ESTABLISHMENT DURING 1972 (EXCLUDE LAND AND MINERAL RIGHTS)</p> <p>Report all capital expenditures actually made during 1972 for this establishment, including major alterations, capitalized repairs and improvements. "Capital expenditures" refer to all costs that are chargeable to property accounts for which depreciation or amortization accounts are ordinarily maintained. Include the cost of all improvements and new construction at this establishment which were in progress but had not been completed at the end of 1972. Include expenditures made by your company (or any of its subsidiaries) for structures which, upon completion, were or are to be sold and leased back to this establishment. Include transfers of used plant and equipment to your establishment from other establishments of your company. Exclude the cost of land and mineral rights. Exclude the cost of maintenance and repairs charged as current operating expense. Exclude capital expenditures made by outside owners of property rented or leased to this establishment. Exclude capital expenditures made by this establishment for other locations of your company.</p>		<p>Type of capital expenditures:</p> <p>a. New structures and additions to plant 070</p> <p>b. New machinery and new equipment 071</p> <p>c. Used plant and used equipment acquired from others (including transfers from other establishments of your company) 072</p> <p>d. TOTAL CAPITAL EXPENDITURES DURING 1972 (Sum of lines a, b, and c) 074</p>															
<p>ITEM 11 CHANGES IN GROSS VALUE OF DEPRECIABLE ASSETS OF THIS ESTABLISHMENT DURING 1972</p> <p>Report the changes in gross value of depreciable assets of this establishment for which depreciation or amortization accounts are ordinarily maintained. "Gross value" represents the acquisition cost (original cost or other basis) to your company of such depreciable assets. Include all depreciable assets (buildings, structures, machinery, equipment, etc.) and all amortizable fixed assets. Include all improvements and new construction "in progress" during 1972 but not yet completed at the end of 1972. Also include the value of depreciable assets owned by this establishment but leased or rented to other companies. Include the value of depreciable assets owned by your company or any of its subsidiaries but "leased" to this establishment. Exclude the value of depreciable assets at other locations of your company (or any of its subsidiaries) for which this establishment maintains records.</p>		<p>a. Gross value of depreciable assets at BEGINNING of 1972 075</p> <p>b. Total capital expenditures during 1972 (Copy figure from item 10d) 076</p> <p>c. Gross value of depreciable assets sold, retired, transferred, scrapped or destroyed during 1972 078</p> <p>d. Gross value of depreciable assets, at END of 1972 (Should equal lines a + b - c. If not, please comment in "Remarks.") 079</p>															
<p>ITEM 12 RENTAL PAYMENTS MADE FOR THIS ESTABLISHMENT DURING 1972 (EXCLUDE LAND)</p> <p>Report all rental payments made or accrued during 1972 to OUTSIDE firms which own the plant and equipment rented or leased by this establishment. Exclude rental payments made by this establishment to your parent company or any of its subsidiaries. (The gross value of such company-owned assets should be reported in item 11, however, as if actually owned by this establishment.) Exclude rental payments made by this establishment for plant and equipment located at other establishments of your company. In reporting rents paid (or equivalent charges) for use of "Buildings and structures," exclude separately identified fees for leasing of land (such as ground rents). Under "Machinery and equipment," be sure to include rental payments, (or equivalent charges), for use of transportation equipment, office equipment, computer systems, passenger cars, and all other types of machinery or equipment.</p>		<p>Rental payments made for this establishment:</p> <p>a. For use of BUILDINGS AND STRUCTURES (excluding land) 085</p> <p>b. For use of MACHINERY AND EQUIPMENT 086</p> <p>c. TOTAL RENTAL PAYMENTS (Sum of lines a and b) 087</p>															
<p>ITEM 13 COST OF RESEARCH AND DEVELOPMENT PERFORMED AT THIS ESTABLISHMENT DURING 1972</p> <p>"Cost" should include all costs incurred at this establishment during 1972 to support research and development activities (i.e. wages and salaries; direct materials costs; services and supporting costs; and an appropriate share of depreciation and overhead). If this establishment performed research and development for the Federal government or for other companies on contract during 1972, include the total amount charged for such work performed. (Also, report such receipts in item 7 above.) If this establishment performed research and development for your own company or its subsidiaries, include the total amount of company funds provided for such work performed.</p>		<p>Type research and development performed:</p> <p>a. Federal contracts and subcontracts 095</p> <p>b. Research and development performed with other (non-Federal) funds from outside your company 096</p> <p>c. Research and development performed with funds from within your company 097</p> <p>d. TOTAL COST OF RESEARCH AND DEVELOPMENT DURING 1972 (Sum of lines a, b, and c) 098</p>															
<p>ITEM 14 WAREHOUSE STORAGE SPACE, AS OF DECEMBER 31, 1972</p> <p>If you reported any employees in item 6b, line (3) "Warehousing," complete this item. Exclude floor space occupied by interior walls, permanent aisles, elevator shafts, stairways, offices, receiving and shipping platforms, etc.</p>		<p>Occupiable floor space (under roof) — occupied and unoccupied — of this establishment</p> <p>099</p> <p>Square feet</p>

## PLEASE READ INSTRUCTIONS BEFORE COMPLETING REPORT

This form will provide you and the Bureau of the Census with a systematic means for assuring that all domestic activities of your company and its subsidiaries have been accounted for in the 1972 Censuses of Business (i.e., Retail Trade, Wholesale Trade, Selected Services), Construction, Manufactures, and Mineral Industries. For the purposes of this report, "domestic" activities should include all 50 States and the District of Columbia. It should not include activities of your firm in foreign countries. (Note—Your Puerto Rico activities, if any, should be included in items 2 and 3 below but excluded from items 4 through 11 on page 2 of this report.)

Please complete Form NC-K1, "Company Summary Report," after you have prepared all required 1972 Census establishment reports for your company and its subsidiaries, but before you return these completed reports to the Bureau of the Census. Preparing this Company Summary Report prior to returning the completed establishment reports may help you to discover more readily and to correct promptly any omission or duplication of reports for those establishments which should be covered in the 1972 Economic Censuses. In turn, this will speed up the Census Bureau's processing of your company report forms and will minimize any correspondence regarding coverage.

### ITEM 1 GENERAL INFORMATION

<p><b>a. Name of company</b></p> <p>_____</p> <p><b>b. Company organization</b></p> <p>Is the above-named company owned or controlled by another company? (If "Yes," please give employer identification number, company name, and address of controlling company.)</p> <p><input type="checkbox"/> Yes      Employer Identification Number (9 digits)      _____</p> <p><input type="checkbox"/> No      Company name      _____</p> <p>Street name and address      _____</p> <p>City      State      ZIP code</p>	<p><b>c. Legal form of organization of company—Mark one</b></p> <p><input type="checkbox"/> 1 Individual proprietor</p> <p><input type="checkbox"/> 2 Partnership</p> <p><input type="checkbox"/> 3 Corporation (Do not mark if any form of cooperative association.)</p> <p><input type="checkbox"/> 4 Co-op (Cooperative association), corporate or noncorporate</p> <p><input type="checkbox"/> 5 Other—Specify _____</p>

### ITEM 2 EMPLOYMENT SUMMARY OF YOUR COMPANY AND ITS SUBSIDIARIES DURING 1972

Column (a) lists the Employer Identification (E.I.) Numbers assigned to your company, based on information you reported on the 1972 Census Form NC-X1 (A, B, or C), "Report of Company Organization." Column (b) lists the number of paid employees for the pay period including March 12, 1972, also as reported on Census Form NC-X1 (A, B, or C). Please update this list to correct any errors and to add to column (a) any E.I. numbers covering domestic activities which are not listed, but which were used by your company or any of its domestic subsidiaries at any time during 1972. Then, complete columns (b) through (h) for each E.I. number—either prelisted or added by you. (Use item 2 Continuation sheet if necessary.)

**NOTE: All employment figures (columns b through d) are for the pay period including MARCH 12, 1972**

Line number	Employer Identification Number(s) used by your company during 1972 (a)	Number of employees as previously reported on Census Form NC-X1 (A, B, or C) (b)	Employees in domestic establishments as reported on your 1972 Census forms for the pay period including March 12, 1972 (c)	Employees in domestic establishments not reported on your Census forms (d)	Description of these activities not reported on your Census forms (e)	Total payroll for the year 1972 for these activities not reported on your Census forms (THOUSANDS OF DOLLARS) (f)	Is this E.I. number used to report Federal employment taxes? (MARK X)		FOR CENSUS USE ONLY
							YES (g)	NO (h)	
1									
2									
3									
4									
5									
6									
7									
8									
9	Subtotal from item 2 Continuation sheet, if any								
10	TOTAL All Employer Identification Numbers								

### ITEM 3 COVERAGE CHECK OF COMPANY EMPLOYMENT TOTALS

<p><b>a. Comparison of COMPANY employment with ESTABLISHMENT employment for the pay period including March 12, 1972.</b></p> <p>Enter employment totals from item 2, line 10:</p> <p>(1) From column (c), total      _____</p> <p>(2) From column (d), total      _____</p> <p>(3) Sum of figures above      _____</p> <p>(4) Sum of company employment for pay period including March 12, 1972. (From column (b), total)      _____</p>	<p><b>b. If the two figures in lines (3) and (4) of item 3a differ by more than 5 percent, please verify the reported figures in item 2. (For each Employer Identification Number, compare the column (b) figure with the sum of columns (c) and (d). These totals should ordinarily be equal for each E.I. number, if all employment has been accounted for.)</b></p> <p>If, after such verification, a company-wide difference in excess of 5 percent still exists, please explain:</p> <p>_____</p>

## INSTRUCTIONS FOR SELECTED COMPANY STATISTICS FOR 1972 (ITEMS 4 - 11)

Please report the following items on a consolidated basis for the DOMESTIC ACTIVITIES of your company and ALL its subsidiaries. Do not include foreign activities, if any, (except for reporting foreign assets in item 11). Consolidate all domestic activities, whether or not covered in the 1972 Census by individual report forms. If calendar year records are not available, fiscal year reports for the periods ending between October 31, 1972 and February 28, 1973 are acceptable. If book records are not available, enter your best estimates. Before completing these items, please read the detailed instructions.

**IMPORTANT** - Figures for dollars should be reported in thousands. If you wish you may report to the nearest dollar. In either case, please be careful to enter your figures in the correct column.

EXAMPLE: If payroll is \$1,125,628

	Mil- lions (000)	Thou- sands (000)	Dol- lars (000)
PREFERRED method . . .	\$ 1	126	
Acceptable method . . . .	\$ 1	125	628

ITEM	DESCRIPTION	Key	Mil.	Thou.	Dol.
ITEM 4	<b>COMPANY PAYROLL DURING 1972</b> Report total wages, salaries, bonuses, commissions, and other remuneration paid by your company and its subsidiaries at domestic establishments and facilities during 1972 before payroll deductions.	Total company payroll during 1972	050	\$	
ITEM 5	<b>COMPANY SALES AND RECEIPTS DURING 1972</b> Report consolidated net sales and business receipts of your company and its subsidiaries during 1972. Exclude domestic intra-company transfers; exclude sales BY foreign subsidiaries; exclude non-operating income. Include sales to customers OUTSIDE your company; include excise taxes and sales taxes paid by your company directly to Federal, State, or local taxing agencies; include export transfers TO your foreign subsidiaries.	a. Net company sales and business receipts during 1972 b. Does the entry in 5a above include excise and sales taxes paid directly to taxing agencies? . . . . . c. If "No," report here the amount of such taxes paid by your company and its subsidiaries during 1972	060 081 062		
ITEM 6	<b>CAPITAL EXPENDITURES DURING 1972 (EXCLUDE LAND AND MINERAL RIGHTS)</b> Report all capital expenditures actually made during 1972 by your company and its subsidiaries for all domestic establishments and facilities. "Capital expenditures" refer to all costs that are chargeable to fixed assets accounts of your company for which depreciation or amortization accounts are ordinarily maintained; include major alterations, capitalized repairs and improvements; include expenditures made in 1972 for establishments under construction but not yet in operation. Exclude capital expenditures made by owners of property rented or leased by your firm and its subsidiaries; but include expenditures made by your firm and its subsidiaries for structures which, on completion, were or are to be sold and leased back by your firm. Exclude cost of land, mineral rights, and cost of maintenance and repair charged as current and operating expenses; exclude capital expenditures by subsidiaries in foreign countries.	Type of capital expenditures a. New structure and new additions to plant b. New machinery and new equipment c. Used plant, machinery, and equipment acquired from others d. Capitalized development and exploration of mineral properties e. TOTAL CAPITAL EXPENDITURES DURING 1972 (Sum of lines a, b, c, and d)	070 071 072 073 074		
ITEM 7	<b>CHANGES IN DEPRECIABLE ASSETS DURING 1972</b> Report the value of depreciable assets of your company and its subsidiaries for which depreciation or amortization accounts are ordinarily maintained. "Gross value" represents the acquisition cost (original cost or other basis) to your company of such fixed depreciable assets. Include depreciable assets for all domestic establishments and facilities. Exclude depreciable assets of your company and its subsidiaries in foreign countries. These assets should be reported in item 11c below. Include all depreciable assets (buildings, structures, equipment, etc.) and amortizable fixed assets. Exclude depletable assets (land, timber, and mineral rights) and non-fixed assets (inventories, cash, accounts receivable, etc.) These assets should be reported in item 11b below. Include in the value of assets all improvements and new construction that were "in-progress" but not yet completed at the end of 1972. Also include the value of depreciable assets (machinery, equipment, buildings, structures, computer equipment, etc.) owned by your company and its subsidiaries, but leased or rented to other companies.	a. Gross value (original cost or other basis) of depreciable assets owned by your company, as of BEGINNING of 1972 b. Total capital expenditures DURING 1972 (Copy figure from item 6e.) c. Other acquisitions by your company (by merger, exchange of stock, etc.) of depreciable assets DURING 1972 (if not included in line b above) d. Deductions from depreciable assets DURING 1972 (i.e., gross value of assets sold, retired, scrapped, or destroyed; and other adjustments) e. Gross value (original cost or other basis) of depreciable assets owned by your company, as of END of 1972 (Lines a + b + c - d)	075 076 077 078 079		
ITEM 8	<b>CHANGES IN DEPRECIATION RESERVES DURING 1972</b> In line a include total depreciation reserves as of the beginning of 1972 for the assets included in item 7, line a. In line b include additions made to depreciation reserves during 1972 for assets owned at the beginning of the year or acquired during the year. Exclude depletion reserves and reserves for intangible assets. Exclude depreciation of assets held in foreign countries. Such assets should be reported in item 11c below.	a. Accumulated depreciation as of BEGINNING of 1972 b. Depreciation charges against assets DURING 1972, (including charges against those acquired or completed during the year) c. Additions charged to other accounts DURING 1972 d. Deductions from reserves for retirements, renewals, and replacements during 1972 e. Accumulated depreciation as of END of 1972 (Lines a + b + c - d)	080 081 082 083 084		
ITEM 9	<b>RENTAL PAYMENTS MADE DURING 1972 (EXCLUDE LAND)</b> Report all rental payments made or accrued during 1972 to other firms which own the plant and equipment rented or leased by your company and its subsidiaries. In reporting rents paid (or equivalent charges) for use of "Buildings and structures," exclude separately identified fees for leasing of land (such as ground rents). Under "Machinery and equipment," be sure to include rental payments (or equivalent charges) for use of production machinery, office equipment, computer systems, passenger cars, trucks, materials handling equipment, and all other types of machinery or equipment.	Rental payments made by your company a. For use of BUILDINGS AND STRUCTURES (excluding land) b. For use of MACHINERY AND EQUIPMENT (including furniture and fixtures) c. TOTAL RENTAL PAYMENTS DURING 1972 (Sum of lines a and b)	085 086 087		
ITEM 10	<b>INVENTORIES, AS OF BEGINNING AND END OF 1972</b> Report all inventories of your company and its subsidiaries at the beginning and end of 1972 on a comparable basis. Inventories should include: finished products; work-in-process; and materials, supplies, fuel, etc. Exclude inventories of subsidiaries in foreign countries. In aggregating the inventories of your company and its subsidiaries, report value on a current cost basis, if feasible, otherwise at book value.	Value of inventories: a. All inventories, as of BEGINNING of 1972 b. All inventories, as of END of 1972	088 089		
ITEM 11	<b>TOTAL COMPANY ASSETS, AS OF END OF 1972</b> Report the balance sheet assets of your company and its subsidiaries on a consolidated basis. Lines a and b should include only domestic assets of your company and its subsidiaries. Line c should include all assets of your company and its subsidiaries in foreign countries, regardless of type. Report all foreign assets on a NET basis. (Line c)	Type of company assets: a. Net value of depreciable assets (Should equal line 7e less 8e) b. All other domestic assets (i.e., inventories, cash, accounts receivable, land, etc.) c. Net foreign assets (i.e., assets located in foreign countries) d. TOTAL COMPANY ASSETS, AS OF END OF 1972 (Sum of lines a, b, and c)	090 091 092 093		
Remarks

PENALTY FOR FAILURE TO REPORT

DUPLICATE DATE: FEBRUARY 15, 1973

Form Approved: O.M.B. No. 41-571102

**FORM MC-368**  
(3602)

U.S. DEPARTMENT OF COMMERCE  
SOCIAL AND ECONOMIC STATISTICS ADMIN.  
BUREAU OF THE CENSUS

**1972 CENSUS OF MANUFACTURES  
SWITCHGEAR AND SWITCHBOARD APPARATUS  
AND INDUSTRIAL CONTROL**

Please complete and return  
this form as soon as possible  
after receipt to:

**BUREAU OF THE CENSUS**  
1201 East Tenth Street  
Jeffersonville, Indiana 47130

**PLEASE READ ACCOMPANYING INSTRUCTION SHEET AND  
INSTRUCTIONS WITH EACH ITEM BEFORE COMPLETING**

If hook figures are not available, carefully prepared estimates are  
acceptable. Complete every item. Please enter the 11-digit number in the  
Census File Number space provided at the top of all odd-numbered pages.

If filing by due date causes an undue burden, a request of an extension of  
time should be sent to the above address. Please mention the 11-digit  
Census File Number in the upper left of the address box if you write  
regarding this report.

**NOTICE** - Response to this inquiry is required by law (Title 13, U.S. Code). By the  
same law, your report to the Census Bureau is confidential. It may be seen only by  
sworn Census employees and may be used only for statistical purposes. The law  
also provides that copies retained in your files are immune from legal process.

In correspondence pertaining to this report,  
please refer to this Census File Number

Employer Identification  
Number

Please correct errors in name, address and ZIP code. ENTER street and number if not shown.

**ITEM 1A PHYSICAL LOCATION OF MANUFACTURING ESTABLISHMENT**

The purpose of this inquiry is to determine the place (city, county, etc.) where  
your plant is actually located (which may differ from the mailing address) so  
that the data can be tabulated in the correct geographic area.

a. Is your manufacturing establishment physically located at the address  
shown in the address box in the right hand corner of this form?

☐ NO - Enter PHYSICAL location here

Also  
answer  
b and c

Street name and number

Place (City or village, etc.)

State

ZIP code

☐ YES

Answer  
b and c

"If location cannot be described by street name and number,  
give as much information as possible such as street inter-  
section, highway number or distance from nearest town, etc."

b. Is your manufacturing establishment  
located WITHIN the LEGAL boundaries  
of the city, village, etc., which you  
indicate in its PHYSICAL location?

☐ YES ☐ NO

c. In what county is your manufacturing  
establishment PHYSICALLY located?

County

**ITEM 8 EMPLOYER IDENTIFICATION NUMBER(S)**

a. Is the Employer Identification (E.I.) Number in the upper right of the  
address box the SAME as that used for this establishment on your latest  
1972 Employer's Quarterly Federal Tax Return, Treasury Form 941?

(9 digits)

☐ YES ☐ NO - Enter currently  
assigned E.I. number

b. Did this establishment also use any other Employer Identification  
(E.I.) Number(s) during 1972?

(9 digits)

☐ YES - Enter E.I. number  
or numbers ☐ NO

**IMPORTANT** - Dollar and man-hour figures should be reported  
in thousands. If you wish, you may report to the nearest unit.  
Please be careful to enter your figures in the correct columns.

EXAMPLE - If the payroll is \$1,125,628:

● PREFERRED METHOD

Acceptable method

Mil- lions \$000	Thou- sands \$000	Dol- lars \$000
1	126	
1	125	628

Complete each item, enter "0" when appropriate

**ITEM 2**

Number of employees

Number of production workers during pay period including 12th of month

a. March

b. May

c. August

d. November

e. Sum of lines a-d

f. Average number (divide line e by 4, omit fractions)

g. All other employees (pay period including March 12th)

h. TOTAL EMPLOYMENT (Sum of lines f and g, Item 2)

**ITEM 3A Payrolls**

a. Production workers' wages

b. All other salaries and wages

c. TOTAL PAYROLL (Item 3A)

**ITEM 3B** Not applicable to this form.

Complete each item, enter "0" when appropriate

**ITEM 4**

Plant man-hours of production workers by quarter

a. January through March

b. April through June

c. July through September

d. October through December

e. TOTAL MAN HOURS (Item 4)

**ITEM 5**

Cost of materials, parts, resales, fuels, electricity, and contract work

a. Cost of materials, parts, components, containers, etc., consumed

b. Cost of products bought and resold

c. Cost of fuels consumed

d. Cost of purchased electricity

e. Cost of contract work done for you by others on your materials

f. TOTAL COST (Item 5)

(Delivered cost including freight and other direct charges)

**ITEM 6**

Inventories of this establishment

(Valuation should be on a comparable basis for both periods)

a. Finished products

b. Work-in-process

c. Materials, supplies, fuels, etc.

d. TOTAL INVENTORIES (Item 6)

JANUARY 1, 1972

DECEMBER 31, 1972

**ITEM 7**

Capital expenditures during year (exclude land)

(See instructions for details)

a. New structures and new additions to this plant (Exclude land)

b. New machinery and new equipment

c. Used plant and used equipment acquired from others

d. TOTAL CAPITAL EXPENDITURES (Item 7)

**ITEM 8**

**ITEM 9**

**ITEM 10**

**ITEM 11**

**ITEM 12**

1972 CENSUS OF MANUFACTURES SWITCHGEAR AND SWITCHBOARD APPARATUS AND INDUSTRIAL CONTROLS - Continued				Name of establishment (Same as address box)					
<b>Item 18 - PRODUCTS AND SERVICES OF THIS ESTABLISHMENT DURING 1972</b> Please read the entire list of products and services below before answering this inquiry.									
<b>INSTRUCTIONS</b> Report net selling value, f.o.b. plant, after discounts and allowances and exclusive of freight charges and excise taxes. Include products made elsewhere for this establishment on a contract basis from materials supplied by this establishment. (The cost of these materials should be included in items 5a and 17.) Exclude products made in this establishment on a contract basis from materials owned by others. Report commission or contract receipts on the appropriate line below. (Exclude materials consumed in making these items from items 5a and 17.) <b>TIE-IN LINES</b> - This report requests totals for groups of products covered in more detail on Annual Census Surveys MA-36A, "Switchgear, Switchboard Apparatus, Relays and Industrial Controls," MA-38B, "Selected Instruments and Related Products," MA-36K, "Wiring Devices and Supplies," and MA-36N, "Selected Electronic and Associated Products." The relationship of figures between this survey and those above is noted in columns (B-3 and B-4). <b>Line 25 - RESALES</b> - Report the selling value, f.o.b. plant, of products which were resold as originally purchased and not used in further manufacturing, processing, or assembling of products made in this establishment. Report the cost of these products in item 5b.									
Line number	Products and services  (A)	Census product code (B-1)	Unit of measure for quantities (B-2)	Corresponds to the sum of products reported on -		Products shipped and other receipts			
				Census form (B-3)	Code (B-4)	Quantity (D)	Value, f.o.b. plant (E)		
							Millions 000	Thousands 000	Dollars 000
1	Switchgear, except ducts and relays (36131)	36131 00	1	MA36A	3613111- 3613193	\$54			
2	Power circuit breakers, all voltages (36132)	36132 00	9	MA36A	3613243	\$54			
3	Low voltage panelboards and distribution boards and other switching and interrupting devices, 750 volts and under (36133)	36133 00	7	MA36A	3613311- 3613398	\$54			
4	Fuses and fuse equipment under 2300 volts, except power distribution cut-outs (36134)	36134 00	5	MA36A	3613431- 3613493	\$54			
5	Molded case circuit breakers, 750 volts and under (36135)	36135 00	2	MA36A	3613511- 3613598	\$54

## APPENDIX C—Continued

### INSTRUCTIONS FOR COMPLETING THE 1972 CENSUS OF MANUFACTURES FORMS

#### GENERAL INSTRUCTIONS

A separate Census report is required for each business location. Therefore, based on Census records, a report form is provided for each location which your company operated in 1972.

For purposes of the Census, a manufacturing establishment is defined as a single physical location where manufacturing operations are performed (e.g., a factory, mill, or plant). Thus a separate report is required for different physical locations even though the establishments may be engaged in the same line of manufacturing.

Please note that establishments engaged in the following activities are also considered to be manufacturing for the purposes of this Census: Poultry dressing; milk pasteurizing and bottling; seafood, fresh packaged or frozen; apparel jobbing and contracting; logging camps and logging; sawmills; printing; publishing—book, magazine, periodical, etc.; manufacturing and delivering ready-mixed concrete; machine shops, including those operating on a job order basis; job casting, stamping, machining; plating, galvanizing, polishing materials owned by others, etc.; ship and boat repairing.

In completing this report, a limited amount of prorating or estimating is acceptable if book records are not readily available. Include all the activities conducted within the establishment: e.g., manufacturing, fabricating, processing,

and assembling; maintenance of plant and equipment; receiving, shipping, warehousing, storage; research; recordkeeping; health, safety, cafeteria, and other services.

Each report should cover the calendar year 1972. However, a report is required even if the establishment operated only part of the year. If your book records are not on a calendar year basis, carefully prepared estimates will be acceptable. If reporting on a calendar year basis will require considerable additional costs, and your fiscal year covers at least 10 months of the calendar year 1972 (i.e., ends between October 31, 1972 and February 28, 1973) you may report on a fiscal year basis. However, all employment, payroll, and man-hour figures should relate to the calendar year rather than the fiscal year. (Calendar year payroll records should be available from your tax records.)

In the certification, enter the exact dates of the period covered by the report. If the ownership changed during the year, complete the report only for that part of 1972 in which your company owned and operated the establishment. Report in item 13 the appropriate information on changes in ownership or operations.

If additional report forms are needed, write to the Bureau of the Census, 1201 East Tenth Street, Jeffersonville, Indiana 47130. Be sure to describe the type of activity of the establishments for which the additional report forms are requested.

#### INSTRUCTIONS FOR ITEMS 1 THROUGH 14

- **Item 1A and 1B—Physical Location and Employer Identification Number**—Accurate and precise information on the physical location of each establishment is needed in order to prepare the tabulation of manufacturing activity in each State, county, and city. Each establishment has tentatively been coded geographically based on the street address in the mailing label, on the assumption that the physical location and mailing address are the same. Please be certain to complete item 1A, part a, if this is not so. Item 1A, part b, and part c, must be completed even if the physical location and the mailing address are identical. Although the system devised by the Census Bureau codes adequately to State and county in all instances, in many localities it cannot clearly distinguish an address that is in the city from one that is out of the city.

Be certain to enter in item 1B, the current Employer Identification Number if it is different from the one printed in the address label. This information is needed so that the Census Bureau can avoid sending duplicate report forms for the same location. Our file of new business formations is based on the new employer identification numbers issued each year. However, we exclude mailing report forms to new employer identification numbers if we identify them as belonging to existing respondents.

(Definitions of employees and payrolls used to calculate withholding taxes generally may be followed in completing item 2 and 3A, Employment and Payrolls.)

- **Item 2—Number of Employees**—Report employees at the establishment who worked or received pay for part of the pay period including the 12th of specified months (March, May, August, and November). Include all persons on paid sick leave, paid holidays, and paid vacation during these pay periods; exclude members of Armed Forces and pensioners carried on your active rolls. Include officers at this establishment, if a corporation; if an unincorporated concern, exclude proprietor, or partners.
- **Items 2a–2d—Number of Production Workers**—Workers (up through the working foreman level) engaged in fabricating, processing, assembling, inspecting, receiving, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial, watchman services, product development, auxiliary production for plant's own use (e.g., powerplant), recordkeeping, and other closely associated services. Exclude proprietors and partners.
- **Item 2e—All Other Employees**—Nonproduction personnel, including those engaged in the following activities; supervision above working foreman level, sales (including driver salesmen), sales delivery (truck drivers and helpers), advertising, credit, collection, installation and servicing of own product, clerical and routine office functions, executive, purchasing, finance, legal, personnel (including cafeteria, etc.), professional and technical. Exclude proprietors and partners.
- **Item 3A—Payrolls**—Report the gross earnings paid in the calendar year to employees at the establishment prior to such deductions as employee's Social Security contributions, withholding taxes, group insurance premiums, union dues, and saving bonds.

Include in gross earnings commissions, dismissal pay, paid bonuses, vacation and sick-leave pay, and the cash equivalent of compensation paid in kind.

Include salaries of officers of this establishment, if a corporation; if an unincorporated concern, exclude payments to proprietors or partners.

Exclude payments to agricultural employees, fishermen, members of the Armed Forces, and pensioners carried on your active payroll.

- **Item 4—Plant Man-Hours of Production Workers by Quarter**—Include all man-hours worked or paid for, except hours paid for vacation, holidays, or sick leave. If an employee elects to work during the vacation period, report only actual hours worked by such employee. Overtime hours should be reported as actual hours worked, not straight-time equivalent hours.

- **Item 5—Cost of Materials**—Report total cost of the materials actually consumed or put in production during the year.

If there are no records of consumption, purchases may be reported instead for minor items. This can also be done for major items if purchases do not differ significantly from the amounts actually used. Where consumption of major items differs significantly from purchases, consumption may be estimated by adding beginning inventories to the amount purchased and subtracting ending inventories.

Cost is delivered cost—i.e., the amount paid or payable after discounts and including freight and other direct charges incurred by the establishment in acquiring the materials.

Include all materials received for consumption; i.e., purchases from other companies, transfers from other establishments of your own company, withdrawals from inventories.

If the establishment produces items subsequently consumed in further production, report cost of original materials consumed only.

- **Item 5a—Cost of Materials, Parts, Components, Containers, etc., Consumed**—The delivered cost figures reported in item 5a should cover all raw materials, containers, scrap, and supplies, etc., which were: (1) put into production, (2) used as operating supplies, (3) used in repair and maintenance. Item 5a should be consistent with the data in item 17.

Include also cost of materials owned by you but consumed by other companies to make products for your establishment under contract. (The value of these products should be reported in item 18). Amounts paid to other companies for such contract work should be reported on Line 5e and should include freight in and out.

Include only physical goods used or put into production.

Exclude services used or overhead charges, such as advertising, telephone, telegram and cable, insurance, developmental and research; services of engineering, management, marketing and other professional consultants, etc., unless charges for such services are included in the prices paid for materials.

Exclude also overhead items such as depreciation charges against plant and equipment; rent and rental allowances; interest payments, royalties, and patent fees.

Exclude materials, supplies, machinery, and equipment which were used in the construction of new structures or additions to your plant, or new machinery and equipment, and which are chargeable to fixed assets accounts. Exclude products purchased and resold without further manufacture or processing or assembly; their costs should be included in item 5b.

- **Item 5b—Cost of Products Bought and Resold**—Report the cost of all products bought and resold in the same condition as when purchased and not made part of another product manufactured by this establishment. (Total sales value of all products resold is to be reported in item 18 on the line for resales.)

- **Item 5c—Cost of Fuels Consumed**—Report the total amount actually paid or payable during the year for all fuels consumed for heat, power, transportation, or the generation of electricity. Do not include the estimated cost of fuels, such as sawdust or blast furnace gas, produced as a by-product of your manufacturing activities. Include anthracite and bituminous coal, coke, natural and manufactured gas, fuel oil, liquefied petroleum gas, gasoline, and all other fuels including purchased steam.

- **Item 5d—Cost of Purchased Electricity**—Report the total amount actually paid or payable for electric energy purchased during the year from other companies, or received from other establishments of your company. Exclude the value of electricity generated and used at this establishment.

- **Item 5e—Cost of Contract Work Done for You by Others on Your Materials**—If any contract work was done by others on materials furnished by your establishment, report the total payments made during the year for such work, including freight out and in. Exclude the cost of materials worked on, which should be included in item 5a.

- **Item 6—Inventories of This Establishment at Beginning and End of Year**—Inventories should be reported at approximate current costs, if feasible; otherwise at book values. It is important that inventories should be reported on a comparable basis at the beginning and end of year.

- **Item 7—Capital Expenditures During Year (Exclude expenditures for land)**—Include all cost actually incurred during 1972 chargeable to the fixed assets accounts and of the type for which depreciation or amortization accounts are ordinarily maintained.

- **Item 7a—New Structures and New Additions to Plant (Exclude expenditures for land)**—Report total expenditures during the year for new construction (whether constructed on contract or by your own force), major alterations, capitalized repairs, and improvement of buildings (including all new elevators, cranes, heating and ventilating equipment essentially a part of the buildings), other fixed structures (such as blast furnaces, brick kilns, fractionating towers, shipways, and similar types of structures), and site improvements (such as roads, docks, tracks, parking lots, fences, utilities).

- **Item 7b—New Machinery and New Equipment**—Report total expenditures at this establishment for new production machinery and equipment and other new machinery and equipment. Include replacements as well as additions to capacity. Include all new motors, lathes, punch presses and similar machinery and equipment for use in production, as well as all new office machines and fixtures, furniture, cafeteria and dressing room furnishings, automobiles and trucks, and other similar equipment. Report value of improvement and capitalized repairs to machinery and equipment, whether repairs and improvements were purchased or made by employees of your company.

- **Item 7c—Used Plant and Used Equipment Acquired From Others**—Report total expenditures at this establishment for old or existing plants and for second-hand equipment acquired from others (including the U.S. Government). Include at approximate market value machinery or equipment transferred from other plants of your company.

- **Items 13 and 14—Change in Ownership or Company Affiliation and Organization**—Please complete these items fully if pertinent. Accurate completion of these items will avoid unnecessary correspondence, as well as reduce the possibility of your receiving more than one report form for the manufacturing activity at this location.

# APPENDIX C—Continued

**PENALTIES FOR FAILURE TO REPORT** DUE DATE: FEBRUARY 15, 1973

ITEM 14B							
Other companies owned or establishments operated							
Complete only if item 14A b or c is marked "YES."							
Name, address, and Employer Identification Number: _____ Activity (Describe, e.g., manufacturing, retail, wholesale, etc., and chief products sold): _____ 1972 payroll and sales (\$000): _____ Are payroll and sales included on page 1 of this report? YES <input type="checkbox"/> NO <input type="checkbox"/>							
Payroll \$ _____ Sales \$ _____ Payroll \$ _____ Sales \$ _____							
ITEM 15							
CHECKS: The Census Bureau reviews your report for omissions, inconsistencies, and unusual figures. To save you future correspondence about these problems, please make the following checks before returning your report:							
(1) Review the report carefully to see that no items are omitted for the year being covered. (2) Calculate and enter figures for the four "reasonableness" checks below, and review the results. (3) Correct your report for any errors you find and explain unusual figures in "Remarks." For most manufacturing establishments, the figures computed usually fall within the ranges indicated.							
"Reasonableness" checks							
Calculation required for each check		Figures for 1972		Usual range			
a. Average hourly wages per production worker	Item 3Aa (Production workers' wages) ÷ item 4c (Total man-hours)	\$		\$1 - \$10			
b. Hours worked per week per production worker	Item 4c (Total man-hours) ÷ 20 ÷ item 2f (Average number of production workers)	Hrs.		20 - 60			
c. Salaries and wages per dollar of shipments	Item 3Ac (Total payroll) ÷ item 9p (Total value of shipments)	¢		05¢ - 95¢			
d. Materials cost per dollar of shipments	Item 5f (Total materials cost) ÷ item 9p (Total value of shipments)	¢		05¢ - 95¢			
e. Is the total for Value of Shipments (item 9p) greater than the sum for Payroll (item 3Ac) plus total Cost of Materials, etc. (item 5f)? <input type="checkbox"/> YES <input type="checkbox"/> NO - Explain in "Remarks"							
f. Is the gross value of depreciable assets (item 10c) minus total capital expenditures (item 7d), within 5% of gross depreciable assets at the beginning of the survey year? <input type="checkbox"/> YES <input type="checkbox"/> NO - Explain in "Remarks"							
Remarks

# APPENDIX C-Continued

<b>PENALTY FOR FAILURE TO REPORT</b> <b>DUE DATE: FEBRUARY 15, 1973</b> <b>Form Approved: O.M.B. No. 41-571116</b>	
<b>Form CB-511</b> <small>(5110)</small> <b>1972 CENSUS OF BUSINESS</b> <b>MANUFACTURERS' SALES BRANCHES AND SALES OFFICES</b> <b>ELECTRICAL MACHINERY, EQUIPMENT, AND SUPPLIES</b>	<b>U.S. DEPARTMENT OF COMMERCE</b> <b>SOCIAL AND ECONOMIC STATISTICS</b> <b>ADMINISTRATION</b> <b>BUREAU OF THE CENSUS</b> 1201 East Tenth Street Jeffersonville, Indiana 47130
Please complete this form and RETURN TO:	
<b>Important - Please read</b> a. Please answer the questions on this form and return it as soon as you can, but not later than February 15, 1973. If filing by the due date causes an undue burden, a request for extension should be sent to the address shown above. b. This report should cover the calendar year 1972. If book figures are not available, carefully prepared estimates are acceptable. c. A separate report is required for each sales branch and sales office operated during 1972. Each sales office without stock should be reported separately as well as each sales branch carrying stocks of merchandise from which deliveries are made to customers. Sales branches and sales offices located at plants or administrative offices should be reported on this form where separate records are available, or if substantially accurate reports can be prepared. Employment, payroll, inventories, and operating expenses reported here should not be included in manufacturer's plant report (MC series). Sales, however, will to some extent duplicate shipments on your plant reports. d. This report should cover only the establishment identified in the address box.	
<b>KEEP THIS COPY FOR YOUR FILES</b> <b>PLEASE COMPLETE AND RETURN THE FORM WHICH SHOWS YOUR NAME AND ADDRESS</b>	
(Please correct any error in name and address including ZIP code)	
Census use only 010 011 012 013	
<b>Item 1 - PHYSICAL LOCATION OF BUSINESS ESTABLISHMENT</b> a. The purpose of this inquiry is to determine the place (city, county, etc.) where your business is actually located (which may differ from the mailing address) so that data can be tabulated in the correct geographic area. b. Is this business establishment PHYSICALLY located at the address shown in the address box of this form? <input type="checkbox"/> YES - Answer b and c <input type="checkbox"/> NO - Enter PHYSICAL location Also answer b and c c. In what county is this business establishment PHYSICALLY located? Street name and number      State      ZIP code	
<b>Item 2 - EMPLOYER IDENTIFICATION NUMBER</b> a. Is the Employer Identification (E.I.) Number printed in the upper right of the address box the SAME as that used for this establishment on your latest 1972 Employer's Quarterly Federal Tax Return, Treasury Form 941? <input type="checkbox"/> YES <input type="checkbox"/> NO - Enter current E.I. number (9 digits) b. Did this establishment also use any other Employer Identification (E.I.) Number during 1972? <input type="checkbox"/> YES - Enter E.I. number or numbers (9 digits) <input type="checkbox"/> NO	
<b>Item 3 - PERIOD OPERATED IN 1972</b> a. Was this establishment in business at the end of 1972? <input type="checkbox"/> YES <input type="checkbox"/> NO      b. How many months during 1972 did you own this establishment? If establishment was inactive during December 1972 due to seasonal or part-time operations, answer "Yes" unless it was not owned by you at the end of the year.	
<b>Important - Please read</b> Dollar figures should be reported as illustrated. Please be careful to enter your figures in the correct columns. See example below: EXAMPLE: If figure is \$1,125,628.28 PREFERRED method . . . . . 1 125 628 Acceptable method . . . . . 1 125 628	
<b>Item 4 - DOLLAR VOLUME OF BUSINESS</b> Line a - Total net sales after deducting returns, allowances, and discounts, but include excise taxes and sales taxes. Include all company sales credited to the sales branch or sales office even though billings may be made from a central or district office and shipments made from a plant or central warehouse. Also include, at wholesale prices, sales or transfers to any relations you may own. Include only receipts from services rendered customers, but do not include any receipts derived from sources other than customers. Line b - Approximate percentage of sales (item 4a), if any, accounted for by goods produced by your company, your parent company, or companies corporateally affiliated with your company. Line c - Total receipts, if any, from work done by your employees at construction site including the value of any goods you put in place that became a permanent part of the structure or building. Amounts reported here should also be included in items 4a and 17.	
<b>Item 5 - PAYROLL AND EMPLOYMENT</b> Lines a and b - Report the gross earnings paid in calendar year to employees prior to such deductions as employee's Social Security contributions, withholding taxes, group insurance premiums, union dues, and savings bonds. Include in gross earnings all wages, salaries, commissions, dismissal pay, paid bonuses, vacation and sick-leave pay, and the cash equivalent of compensation paid in kind. If a corporation, include salaries of officers; if an unincorporated concern, exclude payments to proprietors or partners. Line c - Be sure to include all persons on paid sick leave, paid holidays, and paid vacation during the pay period indicated, as well as those actually working. If a corporation, include officers; if an unincorporated concern, exclude proprietor or partners.	
<b>Item 6 - Not applicable to this form</b>	
<b>Item 7 - OPERATING EXPENSES AND INVENTORIES</b> Line a - Include in addition to other operating expenses, the payroll of this establishment and the pro rata share of any general office expense. Do not include the cost of merchandise. Do not include income taxes and excise taxes. Unincorporated businesses should not include withdrawals by owners or part owners. Line b - Report inventories of goods for sale at cost value rather than sale price. Include goods owned by you and consigned to others, but not goods of others in your possession. Report inventories as of the date specified, or nearest inventory date.	
<b>Item 8 - SALES BY CUSTOMER CLASSES</b> Report the approximate percentage of your 1972 sales to each of the classes of customers. If book figures are not available, entries for these lines should represent your best approximations. Percentages should add to 100. Line a - Sales to manufacturers, farm operators, and other business concerns or institutions that normally buy for business use rather than for resale of the goods in the form purchased. Line b - Sales to the Federal government (including the military, post exchanges, GSA, GPO, and similar Federal agencies) and to State and local governments. Include here only sales made by this establishment DIRECT to governmental agencies. Sales to companies which in turn sell to governmental agencies should be included under other parts of this inquiry according to the classification of the purchaser. Line c - Sales to construction contractors and builders of all types (general contractors, highway, street, and other heavy construction contractors; and special trade contractors). Line d - Sales to transportation companies, communications and other public utilities. Include sales to railroads, interurban systems, and street railway systems; highway, water, and air transportation companies; telephone and telegraph communications, radio and television broadcasting and other communication services; electric light and power - including combination electric and gas utilities. Line e - Sales to repair shops of all types. Line f - Sales to retailers of all types (retail chain organizations, independent stores, department stores, etc.). Entry should represent percentage of your sales to purchasers who normally buy for resale to home consumers or to individual users. Line g - Sales to organizations that normally purchase for resale at wholesale (including sales to purchasers who buy for resale to industrial, institutional, and similar users). Line h - Sales to household consumers and individual users (including sales to your own employees). Line i - Include sales made direct to buyers in foreign countries, or through their agents in this country. Include transfers, if any, to your own foreign branches. United States possessions should not be considered as foreign countries.	
a. TOTAL SALES and other operating receipts in 1972 b. What percent of sales represents products produced by your company? c. Did this establishment do any construction work for others in 1972? If "YES," report the value of construction receipts during 1972 a. Total ANNUAL payroll in 1972 before deductions b. Payroll for the FIRST QUARTER of 1972 c. Number of paid employees for the pay period including March 12, 1972 a. Total 1972 operating expenses, including payroll b. Did you have merchandise inventories during 1972? If "YES," what were these merchandise inventories, at cost? (1) December 31, 1972 (2) December 31, 1971 Approximate percent of total sales (item 4a) (Report in whole percentages) a. To institutional, industrial, commercial, professional and farm users b. To governmental bodies (Federal, State, and local governments) c. To contractors and builders d. To public utilities e. To repair shops f. To retailers g. To wholesale organizations h. To household consumers and individual users i. Export sales j. TOTAL (Lines a through i should add to 100)	

Pls continue on page 2

# APPENDIX C —Continued

Page 2

Item 9 — EMPLOYMENT BY PRINCIPAL ACTIVITY				Approximate number of employees					
Distribute here the employees reported in item 5 according to their principal activity during the pay period including March 12, 1972. Each employee should be counted only once, according to his or her principal activity.  <b>Line a — Selling employees</b> — All employees primarily engaged in selling merchandise or services (traveling salesmen, house or telephone salesmen, etc.)  <b>Line b — Office, clerical, warehouse employees</b> — Employees primarily engaged in office, clerical, and warehouse work for this establishment (see instruction for central administration).  <b>Line c — Central administration</b> — Employees primarily engaged in performing various management, accounting, clerical, warehousing, etc., services for other establishments of your company.				a. Selling employees	121				
				b. Office, clerical, and warehousing employees servicing this establishment	122				
				c. Central administration, storage, etc.	123				
				d. Manufacturing (processing merchandise)	124				
				e. Other (Describe)	125				
				f. TOTAL (Should equal item 5c)	125				
Item 10 — Not applicable to this form									
Item 11 — WAREHOUSE, STOCKROOM, AND OTHER INVENTORY STORAGE SPACE, DECEMBER 31, 1972				140					
<b>Line a</b> — Please indicate if this item is applicable to this establishment by marking either "YES" or "NO."  <b>Line b</b> — Exclude floor space occupied by interior walls, permanent aisles, elevator shafts, stairways, offices, receiving and shipping platforms, etc.  <b>Line c</b> — Net piling space is space for storing commodities — inside space measured from wall to wall and from floor to ceiling, less space for ventilation (outside of the piling), coils, aisles, posts, sprinklers, etc.				a. Did you have warehouse, stockroom, or other inventory storage space on December 31, 1972?	<input type="checkbox"/> YES — Go to b <input type="checkbox"/> NO — SKIP to item 17				
				b. Occupiable floor space (under-roof) — occupied and unoccupied — of this establishment	Square feet Mil.    Thou.    000 141				
				c. Refrigerated (net piling) space 50 degrees Fahrenheit or below in this establishment	Cubic feet Mil.    Thou.    000 142				
Items 12 through 16 — Not applicable to this form									
Item 17 — ANALYSIS OF SALES BY PRODUCTS OR COMMODITY LINES									
Enter below, the total dollar sales of each product sold by this branch or office. Products are listed (at a less detailed level) in the same sequence as they appear on the reporting forms for your manufacturing plants.									
Report value of products bought and sold as well as value of products produced by your company and sold by this establishment. If figures based on records are not available, give best possible approximations.

U.S. DEPARTMENT OF COMMERCE  
SOCIAL AND ECONOMIC STATISTICS ADMINISTRATION  
BUREAU OF THE CENSUS

**1972 CENSUS OF BUSINESS**  
ELECTRICAL MACHINERY, EQUIPMENT, AND SUPPLIES—Continued

Please enter your Census  
File Number

**Item 18** — Not applicable to this form

**Item 19 — TRUCKS, TRUCK TRACTORS, AND TRUCK TRAILERS OPERATED, MID-DECEMBER 1972**

Line a — Please indicate if this item is applicable to this establishment by marking either "YES" or "NO."

Line b — Include all street and highway-type vehicles owned or leased (without drivers). Exclude vehicles held for sale and any vehicles leased by you to others.

208 ☐ YES — Go to b  
☐ NO — SKIP to item 21

**a. Did this establishment operate any trucks, truck tractors, or truck trailers mid-December 1972?**

b. Number and type of vehicles operated mid-December 1972		Total	Owned	Leased (without drivers)
Trucks, by body type	(1) Closed top vans	210	211	212
	(2) Open top vans, platform, stake, or other open top trucks	213	214	215
	(3) Pick-up, standard panel, or other light delivery trucks	216	217	218
	(4) Dump truck	219	220	221
	(5) Other over-the-road trucks	222	223	224
Truck tractors and trailers	(6) Truck tractors	225	226	227
	(7) Semi-trailers and full trailers	228	229	230

**Item 20** — Not applicable to this form

## APPENDIX D. Authority for Census: Title 13, United States Code

*(Codification of August 1954 amended by Acts of August 1957, September 1960, and June and October 1962, and of August 1964)*

### **Collection and publication:**

#### **Five-year periods (131)**

The Secretary shall take, compile, and publish censuses of manufactures, of mineral industries, and of other businesses... in the year 1964, then in the year 1968, and every fifth year thereafter, and each such census shall relate to the year immediately preceding the taking thereof.

#### **Geographic scope of censuses (191a)**

Each of the censuses authorized by this chapter (other than censuses of population) shall include each State, the District of Columbia, Alaska, Hawaii, the Virgin Islands, Guam, and the Commonwealth of Puerto Rico, and as may be determined by the Secretary, such other possessions and areas over which the United States exercises jurisdiction, control, or sovereignty. Censuses of population shall include all geographic areas referred to in the preceding sentence. Inclusion of other areas over which the United States exercises jurisdiction or control shall be subject to the concurrence of the Secretary of State.

#### **Wrongful disclosure of information (214)**

Whoever, being an employee referred to in subchapter II of chapter 1 of this title, having taken and subscribed the oath of

office, publishes or communicates, without the written authority of the Secretary or other authorized officer or employee of the Department of Commerce or bureau or agency thereof, any information coming into his possession by reason of his employment under the provisions of this title, shall be fined not more than \$1,000 or imprisoned not more than two years, or both.

#### **Failure to answer questions affecting companies, businesses, religious bodies, and other organizations: False answers (224)**

Whoever, being the owner, official, agent, person in charge, or assistant to the person in charge, of any company, business, institution, establishment, religious body, or organization of any nature whatsoever, neglects or refuses, when requested by the Secretary or other authorized officer or employee of the Department of Commerce or bureau or agency thereof, whether such request be made by registered mail, by certified mail, by telegraph, by visiting representative, or by one or more of these methods, to answer completely and correctly to the best of his knowledge all questions relating to his company, business, institution, establishment, religious body, or other organization, or to records or statistics in his official custody, contained on any census or other schedule prepared and submitted to him under the authority of this title, shall be fined not more than \$500 or imprisoned not more than sixty days, or both; and if he willfully gives a false answer to any such questions, he shall be fined not more than \$10,000 or imprisoned not more than one year, or both.
